New in 2016 FARS

Data Elements with Changes in Attributes

Below is a list of FARS data elements that have substantial changes for 2016. Changes are denoted in bold typeface (bold/italics for additions, bold/strikethrough for deletions). More detailed information on each data element can be found in the FARS/CRSS Coding and Validation Manual. NHTSA publishes these manuals for each year of data collection and they can be found at:

[NCSA Publications- FARS/NASS GES/CRSS Manuals and Documentation](#)

DATA ELEMENT #	DATA ELEMENT NAME	SAS TABLE.NAME	COMMENTS
C19	First Harmful Event	Accident.HARM_EV	<ul style="list-style-type: none"> ▪ Revised Attributes: 73 (Object <i>That Had Fallen</i> Fell From Motor Vehicle In-Transport) and 31 (Other Post, Other Pole or Other Supports). ▪ New Attribute: 74 (Road Vehicle on Rails).

NM9-PB36	Pedestrian/Bike Typing - Intersection Leg	Pbtype.PEDLEG	<ul style="list-style-type: none"> ▪ Revised Attribute: 9 (Unknown/None of the Above).

Summary of the SAS Naming Changes in 2016

Locator Code	2015 SAS Name	New 2016 SAS Name	Data Element Name
V15	N/A	Vehicle.TRLR1VIN, Vehicle.TRLR2VIN, Vehicle.TRLR3VIN, Parkwork.PTRLR1VIN, Parkwork.PTRLR2VIN, Parkwork.PTRLR3VIN	Trailer Vehicle Identification Number
		None	

The data elements in RED are new to 2016 FARS.

The data elements in BLUE are changed in 2016 FARS.

Preface

One of the primary objectives of the National Highway Traffic Safety Administration (NHTSA) is to reduce the staggering human toll and property damage that motor vehicle traffic crashes impose on our society. Crashes each year result in thousands of lives lost, hundreds of thousands of injured victims, and billions of dollars in property damage. Accurate data are required to support the development, implementation, and assessment of highway safety programs aimed at reducing this toll. NHTSA uses data from many sources, including the Fatality Analysis Reporting System (FARS) which began operation in 1975. Providing data about fatal crashes involving all types of vehicles, the FARS is used to identify highway safety problem areas, provide a basis for regulatory and consumer information initiatives, and form the basis for cost and benefit analyses of highway safety initiatives.

FARS is a census of fatal motor vehicle crashes with a set of data files documenting all qualifying fatalities that occurred within the 50 States, the District of Columbia, and Puerto Rico since 1975. To qualify as a FARS case, the crash had to involve a motor vehicle traveling on a trafficway customarily open to the public, and must have resulted in the death of a motorist or a non-motorist within 30 days of the crash.

This multi-year analytical user's manual provides documentation on the historical coding practices of the Fatality Analysis Reporting System from 1975 to 2016. In other words, this manual presents the evolution of FARS coding from inception through present. The manual includes the data elements that are contained in FARS and other useful information that will enable the users to become familiar with the data system. The FARS/NASS GES and FARS/CRSS Coding and Validation Manuals provide more detailed definitions for each data element and attribute for a given year. Years 2001 to current are available at:

[NCSA Publications- FARS/NASS GES/CRSS Manuals and Documentation](#).

The compilation of FARS data for more than four decades has been a priority for NHTSA. These data store valuable information that have been preserved over time and are available for present and future use. This analytical user's manual should help improve the usefulness and accessibility of the FARS data. With the exception of personal notes, there is no reason to keep older versions of this reference manual. All information in earlier editions has been retained in this newer version.

Thank you for your interest in highway traffic safety.

FARS Operations

The Fatality Analysis Reporting System (FARS), which became operational in 1975, contains data on a census of fatal traffic crashes within the 50 States, the District of Columbia, and Puerto Rico. To be included in FARS, a crash must involve a motor vehicle traveling on a trafficway customarily open to the public, and must result in the death of an occupant of a vehicle or a non-occupant within 30 days (720 hours) of the crash.

FARS is directed by the National Center for Statistics and Analysis (NCSA), which is a component of NHTSA. NHTSA has a cooperative agreement with an agency in each State's government to provide information on all qualifying fatal crashes in the State. These agreements are managed by NCSA's FARS Program staff. Trained State employees, called "FARS Analysts," are responsible for gathering, translating, and transmitting their State's data to NCSA in a standard format. The number of analysts varies by State.

FARS data are obtained from various States' documents, such as:

- Police Crash Reports
- Death Certificates
- State Vehicle Registration Files
- Coroner/Medical Examiner Reports
- State Driver Licensing Files
- State Highway Department Data
- Emergency Medical Service Reports
- Vital Statistics and other State Records

From these documents, the analysts code more than 100 FARS data elements. The specific data elements may be modified slightly each year to conform to changing user needs, vehicle characteristics, and highway safety emphasis areas. The data collected within FARS do not include any personal identifying information, such as names, addresses, or social security numbers. Thus, any data kept in FARS data files and made available to the public fully conform to the Privacy Act.

Each analyst interprets and codes data directly onto an electronic data file. The data are automatically checked when entered for acceptable range values and for consistency, enabling the analyst to make corrections immediately. Several programs continually monitor and improve the completeness and accuracy of the data.

Each analyst uses a coding manual which provides a set of written instructions on how to transfer the information from a police accident/crash report (PAR) to the FARS data. To augment the coding manual, classes are held each year to train the coders, and a system wide FARS meeting is held to reinforce uniform coding practices.

After the data file is created, quality checks are performed on the data. When these are completed, the electronic data are made available to the public. The FARS data are also used to respond to requests from the international and national highway safety communities, state and local governments, the Congress, federal agencies, research organizations, industry, the media, and private citizens. Annual FARS data files are available for 1975 through 2016.

FARS SAS Data Files

FARS data are made available to the public in Statistical Analysis System (SAS) data files as well as Database Files (DBF). Over the years, changes have been made to the type of data collected and the way the data are presented in the data files. Some data files have been discontinued and new ones have been created. For the current data collection year there are 20 data files.

This manual describes the 20 current data files as well as previously discontinued data files. The 20 current data files are: Accident, Vehicle, Person, Parkwork, Pbtpe, Cevent, Vevent, Vsue, Damage, Distract, Drimpair, Factor, Maneuver, Nmimpair, Nmprior, Nmcrash, Safetyeq, Violatn, Vindecode, and Vision data files. Eleven of these data files contain one data element each in which the analyst could code multiple responses: Damage, Distract, Drimpair, Factor, Maneuver, Nmimpair, Nmprior, Nmcrash, Safetyeq, Violatn, and Vision. That is, the FARS/CRSS Coding and Validation Manual instructs coders to "select all that apply" for these data elements. Discontinued data files are included after the current data files. The Vehnit data file was replaced by the Parkwork data file and its data element history can be found in the Parkwork data file.

The data files are presented with their data elements in the Data Elements Definitions and Codes section. For each of the data elements, a brief definition is provided along with any additional information which could assist analyses. SAS names and values are also provided for the data elements. Discontinued data elements are moved to the end of the data file.

The SAS data files and years of availability are:

- **Accident - (1975-current):** This data file contains information about crash characteristics and environmental conditions at the time of the crash. There is one record per crash.
- **Vehicle - (1975-current):** This data file contains information describing the in-transport motor vehicles and the drivers of in-transport motor vehicle who are involved in the crash. There is one record per in-transport motor vehicle. Parked and working vehicle information is in the Parkwork data file.
- **Person - (1975-current):** This data file contains information describing all persons involved in the crash including motorists (i.e., drivers and passengers of in-transport motor vehicles) and non-motorists (e.g., pedestrians and pedalcyclists). It provides information such as age, sex, vehicle occupant restraint use, and injury severity. There is one record per person.
- **Parkwork - (2010-current):** This data file contains information about parked and working vehicles that were involved in FARS crashes. A parked vehicle is a motor vehicle which is stopped off the roadway. A working vehicle is used to indicate that this is a motor vehicle that was in the act of performing highway construction, maintenance or utility work related to the trafficway when it became an involved in the crash. Data users are strongly advised to consult the annual FARS/CRSS Coding and Validation Manuals for a detailed description. There is one record per parked/working vehicle.
- **Pbtpe – (2014-current):** This data file contains information about crashes between motor vehicles and pedestrians, people on personal conveyances and bicyclists. Data from the crash are enter into the Pedestrian and Bicycle Crash Analysis Tool (PBCAT). The output fields from PBCAT, including the pre-crash actions of the parties involved (crash type), are included in this data set. There is one record for each pedestrian, bicyclist or person on a personal conveyance.

- **Cevent** – (2010-current): This data file contains information for all of the qualifying events (i.e., both harmful and non-harmful involving in-transport motor vehicles) which occurred in the crash. It details the chronological sequence of events resulting from an unstabilized situation that constitutes a motor vehicle traffic crash. There is one record per event. Included in each record is a description of the event or object contacted (e.g., ran off road-right, crossed center line, guardrail, parked motor vehicle), the vehicles involved, and the vehicles' area of impact.
- **Vevent** – (2010-current): This data file contains the sequence of events for each in-transport motor vehicle involved in the crash. This data file has the same data elements as the Cevent data file. In addition, this data file has a data element that records the sequential event number for each vehicle (VEVENTNUM). There is one record for each event for each in-transport motor vehicle.
- **Vsoe** – (2010-current): This data file contains the sequence of events for each in-transport motor vehicle involved in the crash. This data file has a subset of the data elements contained in the Vevent data file (It is a simplified Vevent data file). There is one record for each event for each in-transport motor vehicle.
- **Damage** - (2012-current): This data file contains information about all of the areas on this vehicle that were damaged in the crash. There is one record per damaged area.
- **Distract** - (2010-current): This data file contains information about driver distractions. There is at least one record per in-transport motor vehicle. Each distraction is a separate record.
- **Drimpair** - (2010-current): This data file contains information about physical impairments of drivers of motor vehicles. There is one record per impairment and there is at least one record for each driver of an in-transport motor vehicle.
- **Factor** - (2010-current): This data file contains information about vehicle circumstances which may have contributed to the crash. There is at least one record per in-transport motor vehicle. Each factor is a separate record.
- **Maneuver** - (2010-current): This data file contains information about actions taken by the driver to avoid something or someone in the road. There is at least one record per in-transport motor vehicle. Each maneuver is a separate record.
- **Violatn** - (2010-current): This data file contains information about violations which were charged to drivers. There is at least one record per in-transport motor vehicle. Each violation is a separate record.
- **Vision** - (2010-current): This data file contains information about circumstances which may have obscured the driver's vision. There is at least one record per in-transport motor vehicle. Each obstruction is a separate record.
- **Nmcrash** - (2010-current): This data file contains information about any contributing circumstances or improper actions of people who are not occupants of motor vehicles (e.g., pedestrians and bicyclists) noted on the PAR. There is one record per action and there is at least one record for each person who is not an occupant of a motor vehicle.
- **Nmimpair** - (2010-current): This data file contains information about physical impairments of people who are not occupants of motor vehicles. There is one record per impairment and there is at least one record for each person who is not an occupant of a motor vehicle.

- **Nmprior** - (2010-current): This data file contains information about the actions of people who are not occupants of motor vehicles (e.g., pedestrians and bicyclists) at the time of their involvement in the crash. There is one record per action and there is at least one record for each person who is not an occupant of a motor vehicle.
- **Safetyeq** - (2010-current): This data file contains information about safety equipment used by people who are not occupants of motor vehicles. There is one record per equipment item, and there is at least one record for each person who is not an occupant of a motor vehicle.
- **Vindecode** - (2013-current): This data file contains vehicle descriptors for all vehicles, mainly passenger vehicles, trucks and motorcycles, based on the vehicle's VIN which is decoded using the VINtelligence program. There is one record per vehicle.

Discontinued Data Files

- **Vehnit** - (2005-2009): This data file contains information about parked and working vehicles that were involved in FARS crashes. Prior to the Vehnit creation, the vehicles Not-In-Transport were not included in the FARS data. This data file had the same list of data elements and SAS structure as the Vehicle data file where the UNITTYPE of the vehicle is 2, 3, or 4. The vehicle data file will have the vehicles in-transport where the UNITTYPE of the vehicle is 1. Beginning in 2010, FARS discontinued the Vehnit data file and introduced the Parkwork data file. There is one record per parked/working vehicle. This data file was replaced in 2010 with the Parkwork data file. See the Parkwork data file in the Data Element Definitions and Codes section for the element history of this data file.

FARS Data Element List

The following lists all SAS data elements with their SAS data file locations.

DATA ELEMENT LIST

C1/V1/D1/PC1/			
P1/NM1	State Number	STATE	24

Data Element Definitions and Codes

This section represents the majority of the manual. It provides detailed information on the data elements, including definitions, SAS names, attribute codes and attribute labels. Over the years, changes have been made to the data collected. Some data elements have been dropped, new ones added, and coding of individual data elements has changed. Coding changes and the years for which individual attributes are available are shown for each data element. The FARS/CRSS Coding and Validation Manual contains a detailed description of each data element including coding instructions and attribute definitions. The Coding Manual is published for each year of data collection. Years 2001 to current are available at:

[NCSA Publications- FARS/NASS GES/CRSS Manuals and Documentation.](#)

The data elements are listed here under the primary data file in which the data are stored. Some data elements are provided in more than one data file to facilitate analyses analyses but they are not repeated. For example, Month of Crash (MONTH) is a crash-level data element but for convenience it is also provided in the Vehicle, Parkwork and Person files.

All data elements are numeric except the following, which are character:

- C13 Trafficway Identifier (TWAY_ID, TWAY_ID2) [30]
- C27 Rail Grade Crossing Identifier (RAIL) [7]
- V13 Vehicle Identification Number (VIN, PVIN) [12]
- V16 & V16B Motor Carrier ID (MCARR_ID) [11], (MCARR_I2) [9]
- V101-V112 VIN Characters 1-12 (VIN_1, VIN_2, VIN_3, VIN_4, VIN_5, VIN_6, VIN_7, VIN_8, VIN_9, VIN_10, VIN_11, VIN_12, PVIN_1, PVIN_2, PVIN_3, PVIN_4, PVIN_5, PVIN_6, PVIN_7, PVIN_8, PVIN_9, PVIN_10, PVIN_11, PVIN_12) [1]
- V200-V280 VIN decoded data elements in the Vindecode data file [255]
- NM9-PB37 Pedestrian Scenario (PEDSNR) [10]

All of the data files contain the following two (2) crash-level data elements:

Key Data Elements

C1/V1/D1/PC1/P1/NM1 State Number

Definition: This data element identifies the state in which the crash occurred. The codes are from the General Services Administration's (GSA) publication of worldwide Geographic Location Codes (GLC).

Additional Information: GSA state data elements except for 43, Puerto Rico. The State in which the vehicle is registered, REG_STAT, is found in the Vehicle data file; the coding is the same.

SAS Name: **STATE**

Attribute Codes

1975-Later

1 Alabama	31 Nebraska
2 Alaska	32 Nevada
4 Arizona	33 New Hampshire
5 Arkansas	34 New Jersey
6 California	35 New Mexico
8 Colorado	36 New York
9 Connecticut	37 North Carolina
10 Delaware	38 North Dakota
11 District of Columbia	39 Ohio
12 Florida	40 Oklahoma
13 Georgia	41 Oregon
15 Hawaii	42 Pennsylvania
16 Idaho	43 Puerto Rico
17 Illinois	44 Rhode Island
18 Indiana	45 South Carolina
19 Iowa	46 South Dakota
20 Kansas	47 Tennessee
21 Kentucky	48 Texas
22 Louisiana	49 Utah
23 Maine	50 Vermont
24 Maryland	52 Virgin Islands (<i>since 2004</i>)
25 Massachusetts	51 Virginia
26 Michigan	53 Washington
27 Minnesota	54 West Virginia
28 Mississippi	55 Wisconsin
29 Missouri	56 Wyoming
30 Montana	

C2/V2/D2/PC2/P2/NM2 Consecutive Number

Definition: This data element is the unique case number assigned to each crash. It appears on each data file and is used to merge information from the data files together.

Additional Information: This data element is a combination of the GSA State code and an assigned consecutive number. It is assigned by the data entry system to each crash and is the unique identifier for the crash within the year. It is used as the key, when any two of these files from the same year are merged.

This data element is stored as a numeric data element of six characters; the first two characters are the State code, and the next four characters are case number, with leading zeros if necessary.

SAS Name: ST_CASE

Attribute Codes**1975-Later**

xxxxxx	Two Characters for State Code followed by Four Characters for Case Number
--------	---------------------------------------------------------------------------

All of the vehicle level data files contain the preceding accident level data elements as well as VEH_NO:

V3/D3/PC3/P3/NM4 Vehicle Number

Definition: This data element is the consecutive number assigned to each vehicle in the case. This data element appears on each vehicle level data file and is used in conjunction with the ST_CASE data element to merge information from vehicle level data files.

Additional Information: All vehicles will have a positive integer value. The value 0 is only used for non-motorists (pedestrians, cyclists, etc.) in the Person File. There are no corresponding Vehicle records for non-motorists. ST_CASE and VEH_NO may be used to merge the complete Person File to the Accident File, but including the Vehicle File in the merge will eliminate non-motorists from the merged data.

Non-Occupants have VEH_NO = 0, in this case see STR_VEH (N_MOT_NO prior to 2011) under Non-Motorist Striking Vehicle Number in the Person data file.

SAS Name: VEH_NO

Attribute Codes

1975-	2009-
2008	Later
0-99	0-999 Assigned Number of Motor Vehicle

All of the person level data files contain the preceding accident level and vehicle level data elements as well as PER_NO:

P4/NM3 Person Number

Definition: This data element is the consecutive number assigned to each person in the case (i.e., each occupant, pedestrian, or non-motorists involved in the crash). This data element appears on each person level data file and is used in conjunction with the ST_CASE data element (and sometimes the VEH_NO data element) to merge information from person level data files.

Additional Information: Each occupant of the vehicle is numbered and each non-occupant is numbered, in the case of a non-occupant the vehicle number is zero. The numbers for occupants are consecutive, for each vehicle, beginning with 1. Numbers are never skipped. Drivers do not have to be coded 1. Non-Occupants are identified by vehicle number 0 and are numbered consecutively starting with 1 for each non-motorist. To get drivers see data element PER_TYP, under Person Type.

PER_NO can be used in merges, e.g., when merging the FARS person data file with the multiple cause of death file.

SAS Name: PER_NO

Attribute Codes

1975-	2009-
2008	<i>Later</i>
1-99	1-999 Assigned Person Number

The CEVENT and VEVENT data files contain the preceding crash level data elements as well as EVENTNUM:

C18 Event Number

Definition: This data element is the consecutive number assigned to each harmful and non-harmful event in a crash, in chronological order.

Additional Information: Prior to 2015, this data element's Locator Code or Data Element Number was C17.

SAS Name: EVENTNUM

Attribute Codes

2010-Later

1-999 Event Number

The VEVENT and VSOE data files contain the preceding crash level data elements and VEH_NO as well as VEVENTNUM:

C18 Vehicle Event Number

Definition: This data element is the consecutive number assigned to each harmful and non-harmful event for this vehicle, in chronological order.

Additional Information: Prior to 2015, this data element's Locator Code or Data Element Number was C17.

SAS Name: VEVENTNUM

Attribute Codes

2010-Later

1-999 Vehicle Event Number

The ACCIDENT Data File

The Accident data file includes crash data. It contains the data elements ST_CASE and STATE, which are described in the beginning of the Data Element Definitions and Codes section. The Accident data file also contains the data elements on the following pages.

ST_CASE is the unique case identifier for each record.

C3 Number of Forms Submitted for Persons Not in Motor Vehicles

Definition: This data element is the number of Person Forms (Not a Motor Vehicle Occupant) that are applicable to this case (i.e., non-occupants).

Additional Information: This represents the number of forms created for persons *not* in motor vehicles. It is the number of persons in the crash where "Person Type" is in (4, 5, 6, 7, 8, 10 or 19).

Note: Persons where "Person Type" = 3 (Occupant of a Motor Vehicle Not In-Transport) are *not* included in this data element but are counted in C3A below.

SAS Name: **PEDS**

Attribute Codes

1991-	2011-
2010	<i>Later</i>
1-99	0-99

Number of Persons Not in Motor Vehicles

C3A Number of Persons Not in Motor Vehicles in Transport (MVIT)

Definition: This data element is a count of the number of non-motorists in the crash. A non-motorist is defined as a pedestrian, a cyclist, an occupant of a motor vehicle not in-transport, a person riding a horse, an occupant of an animal drawn conveyance, person associated with non-motorist conveyance (e.g., baby carriage, skate board, wheelchair), or an other non-motorist (e.g., person outside a trafficway, person in a house).

Additional Information: This data element is derived as the count of all persons in the crash where "Person Type" is in (3, 4, 5, 6, 7, 8, 10 or 19).

SAS Name: **PERNOTMVIT**

Attribute Codes

2011-Later

0-98 Number of Persons Not in Motor Vehicles in Transport

C4 Number of Vehicle Forms Submitted- ALL

Definition: This data element is the number of contact motor vehicles that the officer reported on the PAR as a unit involved in the crash.

Additional Information: This number represents all of the vehicles in the crash. This includes the vehicles in-transport which are in the Vehicle data file and the vehicles not in-transport which are in the Parkwork data file (previously Vehnit). This data element only appears in the Accident data file. Note: The Parkwork data file replaced the Vehnit data file in 2010. The Vehnit data file does not exist prior to 2005.

SAS Name: **VE_TOTAL**

Attribute Codes

2005-	2009-
2008	Later
1-99	1-999

Number of Vehicles in Crash

C4A Number of Motor Vehicles in Transport (MVIT)

Definition: This data element is a count of the number of vehicles in-transport involved in the crash. Legally parked vehicles are not included.

Additional Information: This data element is derived as the count of all vehicles in the crash where "Unit Type" = 1. It is the number of records in the Vehicle data file.

It is unlikely that the number of vehicles involved in the crash is greater than the Number of Vehicle Forms plus two.

1975-1981: In the event of a hit-and-run crash, if the vehicle information was not known, then no vehicle form was filled out. Likewise, if no information was known on the person level, usually the driver of the unknown vehicle, then a Person Level form was not filled out. The result is that the number of unknowns is much smaller for this time period than 1982 and later.

Example: From 1975 to 1980, there were 30 to 40 drivers coded with unknown sex, approximately 0.05 percent of all drivers involved in fatal crashes. In 1981 the number of drivers with unknown sex rose to over 300, approximately 0.5 percent of all drivers involved in fatal crashes.

1982-Later: In the case of a hit-and-run crash, a Vehicle-Driver form and a Person Level form for the driver are filled out. When the information about the vehicle-driver or person is not known -- which is often the case with hit-and-runs -- the values are coded as unknown.

Example: Between 1982 and 1994, the number of drivers coded with unknown sex fluctuated between 700 and 1,000, approximately 1.5 percent of all drivers involved in fatal crashes. Reviewing the 768 persons in the 1994 Annual Report file, all were drivers and 90 percent of them were involved in hit-and-run crashes.

This data element also appears in the Vehicle and Person data files and in the Parkwork data file as PVE_FORMS.

C4B Number of Parked/Working Vehicles

Definition: This data element is a count of the number of parked and working vehicles involved in the crash.

Additional Information: This data element is calculated as the count of all vehicles in the crash where "Unit Type" is in (2, 3 or 4). It is the number of records in the Parkwork data file.

SAS Name: PVH_INVL

Attribute Codes***2011-Later***

0-999 Number of Parked/Working Vehicles in the Crash

C5 Number of Forms Submitted for Persons in Motor Vehicles

Definition: This data element is a count of the number of Person Level (Motor Vehicle Occupant) Forms that are applicable to this case (i.e., occupants).

Additional Information: This represents the number of forms created for persons in motor vehicles. It is the count of all persons where "Person Type" is in (1, 2, 3 or 9).

Before 2003, the policy was not to submit a Person Level form for occupants of van-based buses. Since 2003, a person level form has been submitted for all occupants of van-based vehicles, including van-based buses.

1975-1981: In the event of a hit-and-run crash, if the vehicle information was not known, then no vehicle form was filled out. Likewise, if no information was known on the person level, usually the driver of the unknown vehicle, then a Person Level form was not filled out. The result is that the number of unknowns is much smaller for this time period than 1982 and later.

Example: From 1975 to 1980, there were 30 to 40 drivers coded with unknown sex, approximately 0.05 percent of all drivers involved in fatal crashes. In 1981 the number of drivers with unknown sex rose to over 300, approximately 0.5 percent of all drivers involved in fatal crashes.

1982-Later: In the case of a hit-and-run crash, a Vehicle-Driver form and a Person Level form for the driver are filled out. When the information about the vehicle-driver or person is not known -- which is often the case with hit-and-runs -- the values are coded as unknown.

Example: Between 1982 and 1994, the number of drivers coded with unknown sex fluctuated between 700 and 1,000, approximately 1.5 percent of all drivers involved in fatal crashes. Reviewing the 768 persons in the 1994 Annual Report file, all were drivers and 90 percent of them were involved in hit-and-run crashes.

Number of Person Forms

C5A Number of Persons in Motor Vehicles in Transport (MVIT)

Definition: This data element is a count of the number of motorists in the crash. A motorist is a driver, passenger or unknown occupant type of a motor vehicle in-transport.

Additional Information: This data element is derived as the count of all persons in the crash where "Person Type" is in (1, 2 or 9).

Note: Persons where "Person Type" = 3 (Occupant of a Motor Vehicle Not In-Transport) are *not* included in this data element but are counted in C5 above.

SAS Name: PERMVIT

C19 First Harmful Event

Definition: This data element describes the first injury or damage producing event of the crash.

Additional Information: "First Harmful Event" applies to the crash. "Most Harmful Event" (M_HARM) applies to the vehicle. Harmful events are judgment calls of the FARS analysts based on the data within the PAR.

From 2004 to 2009, the data elements "First Harmful Event," "Most Harmful Event," and the "Sequence of Events" have the same attributes. The harmful event attributes were modified to be consistent with the sequence of events data elements. Starting in 2009, these data elements still have the same attributes except non-harmful event attributes were added to the Sequence of Events data element.

Starting in 2010, this data element is derived from the "Sequence of Events" data element as the first value that is not between codes 60 and 71 (non-harmful events). Prior to 2015, this data element's Locator Code or Data Element Number was C18.

This data element also appears in the Vehicle and Person data files and in the Parkwork data file as PHARM_EV.

C20 Manner of Collision

Definition: This data element describes the orientation of two motor vehicles in-transport when they are involved in the “First Harmful Event” of a collision crash. If the “First Harmful Event” is not a collision between two motor vehicles in-transport it is classified as such.

Additional Information: In the original data files, from 1975 to 1977 sideswipe was coded as 5 but has since been changed to 7. These years are not consistent with the documentation of the time. Prior to 2015, this data element’s Locator Code or Data Element Number was C19.

This data element also appears in the Vehicle and Person data files and in the Parkwork data file as PMAN_COLL.

C21 Relation to Junction

C21A Relation to Junction- Within Interchange Area

Definition: This data element identifies the crash's location with respect to presence in an interchange area. The coding of this data element is done in two sub-fields (see also C20B) and is based on the location of the "First Harmful Event" of the crash.

Additional Information: Prior to 2015, this data element's Locator Code or Data Element Number was C20A.

SAS Name: RELJCT1

C21B Relation to Junction- Specific Location

Definition: This data element identifies the crash's location with respect to presence in or proximity to components typically in junction or interchange areas. The coding of this data element is done in two sub-fields (see also C20A) and is based on the location of the "First Harmful Event" of the crash.

Additional Information: Prior to 2015, this data element's Locator Code or Data Element Number was C20B.

More Information on [Relation to Trafficway](#)

C24 Work Zone

Definition: This data element identifies a motor vehicle traffic crash in which the first harmful event occurs within the boundaries of a work zone or on an approach to or exit from a work zone, resulting from an activity, behavior, or control related to the movement of the traffic units through the work zone.

Additional Information: This data element identifies a "Work Zone Accident" as defined in ANSI D16.1, 7th Edition. If the crash qualifies as a "Work Zone Accident" then the type of work activity is identified. Use of the codes does not imply that the crash was caused by the construction, maintenance, or work activity.

The data element name was "Construction/Maintenance Zone" from 1975 to 2008. The data element name has been changed to "Work Zone" since 2009. Prior to 2015, this data element's Locator Code or Data Element Number was C23.

SAS Name: **C_M_ZONE 1975-2008**
WRK_ZONE 2009-Later

Attribute Codes

1975-1979

The data element exists in the data files but has not been initialized. The data was not collected.

C26 Atmospheric Conditions

Definition: This data element records the prevailing atmospheric conditions that existed at the time of the crash as indicated in the case material.

Additional Information: This data element identifies up to two values. If more than two atmospheric conditions were reported, the two conditions that most affect visibility were selected. Accident.WEATHER1 and Accident.WEATHER2 are coded data elements, and Accident.WEATHER is derived from these two.

Prior to 2015, this data element's Locator Code or Data Element Number was C25.

See [Appendix B: Rules for Derived Data Elements](#) for an expanded explanation of this data element and how it is derived.

C27 School Bus Related

Definition: This data element identifies if a school bus, or motor vehicle functioning as a school bus, is related to the crash.

Additional Information: A school bus crash is (1) a motor vehicle crash in which a school bus, with or without a pupil on board, is involved directly as a contact vehicle, or (2) a motor vehicle crash or an other-road-vehicle crash in which a school bus, with or without a pupil or board, is involved indirectly as a non-contact vehicle.

Prior to 2015, this data element's Locator Code or Data Element Number was C26.

This data element also appears on the Person data file.

C32 Related Factors- Crash Level

Definition: This data element records factors related to the crash expressed by the investigating officer.

Additional Information: There are also vehicle-level related factors in the Vehicle data file (VEH_SC1 and VEH_SC2), driver-level related factors, also in the Vehicle data file (DR_SF1, DR_SF2, DR_SF3 and DR_SF4), and person-level related factors in the Person data file (P_SF1, P_SF2, and P_SF3).

The FARS analyst may have used any of the three data elements to code a related factor. One must test all three data elements to ensure that the selected related factor is included.

Note: Starting in 1982, many of the "Related Factors-Crash Level" attributes, values 01-29, are coded as "Related Factors-Driver Level" attributes, values 61-87, in the Vehicle data file.

Prior to 2015, this data element's Locator Code or Data Element Number was C31.

- 99 99 Unknown

C101 Fatalities

Definition: This data element records the number of fatally injured persons in the crash.

Additional Information: The data element is derived by counting all persons with "Injury Severity" of 4 in the crash. The data element "Fatalities in Vehicle" in the Vehicle data file provides the number of deaths in a vehicle.

SAS Name: FATALS

Attribute Codes

1975-Later

1-99 Number of Fatalities that Occurred in the Crash

Discontinued ACCIDENT Data Elements

Federal Highway (discontinued)

Definition: This data element was discontinued after 1993.

Additional Information: The data element is in the data file, but was not initialized prior to 1978, i.e., no data exists for this data element. This may be due to the extensive revisions by the Federal Highway Administration (FHWA) in 1977, which caused extensive modifications to this field for all data before 1978.

SAS Name:

TA_1_CL 1975-1981

FED_AID 1982-1993

--	7	7	--	Non-Federal Aid Collectors
--	8	8	--	Non-Federal Aid Local
--	9	9	9	Unknown

Hit and Run (discontinued)

Definition: This data element identifies whether this vehicle was a contact vehicle in the crash that did not stop to render aid (this can include drivers who flee the scene on foot). Hit and run is coded when a motor vehicle in-transport, or its driver, departs from the scene; vehicles not in-transport are excluded. It does not matter whether the hit-and-run vehicle was striking or struck.

Additional Information: From 1975 to 1981 if no information was known about the Hit-and-Run vehicle and/or driver, the vehicle form and/or driver form were not filled out and were not counted as unknown. Starting in 1982 both a vehicle and a driver form were filled out and the data were identified as unknown. This is why, for example, there were approximately only 20 to 40 drivers with unknown sex listed in the FARS data file from 1975 to 1981 and 700 to 1,000 drivers with unknown sex from 1982 on.

In 2009, this data element was no longer collected at the Accident level and is now collected at the Vehicle level.

SAS Name: HIT_RUN

Attribute Codes

--	--	5	Hit-and-Run, Other Involved Person Left Scene <i>(Since 2007)</i>

Land Use (discontinued)

Definition: This data element was discontinued after 1986.

Additional Information: The data element LAND_USE is defined by the Federal Highway Administration and does not necessarily coincide with the U.S. Census Bureau's definition or any other definition of urban or rural. It has been determined there are errors in the 1975 and 1976 data for this data element; consequently, care should be taken when comparing data over several years.

From 1987 to 2014, urban and rural classifications can be obtained from the data element Roadway Function Class. Beginning in 2015, the data element Land Use (RUR_URB) was reintroduced.

SAS Name: **LAND_USE**

Attribute Codes

1975-1986

- 1 Urban
- 2 Rural
- 9 Unknown

Number of Drinking Drivers (discontinued)

Definition: This data element records the number of drinking drivers involved in the crash.

Additional Information: This data element is derived from data elements in the Person data files. If the blood alcohol concentration (BAC) is positive, or if the police reported alcohol involvement, then the driver is counted as a drinking driver.

A driver who is charged with an alcohol violation by itself does not have the driver counted as a drinking driver.

In the early years of FARS, especially 1975 and 1976, the alcohol data must be used with care. In these two years no drinking drivers were identified for North Dakota. In 1975 and 1976 Alabama, Mississippi, New Mexico, North Carolina, Texas, and West Virginia have a reported drinking driver rate for fatal crashes of less than 5 percent. In 1979 the data from these States reports a drinking driver rate for fatal crashes between 18.5 percent and 43 percent.

From 1999 through 2007, this data element was incorrectly derived for all person types rather than based on Drivers only. Beginning with the 2008 Final FARS data file, this element has been derived for Drivers only. For consistency, the number of drinking drivers should be derived manually when trying to obtain this data from 1999 to 2007 – refer to the DRUNK_DR Logic Derivation for “1975-1998 and 2008-2014” in [Appendix B: Rules for Derived Data Elements](#).

Prior to 2015, this data element was called “Drunk Drivers.” The former data element name implied that the individuals were drunk, however, this data element actually captures those individuals whom the police reported alcohol involvement OR who tested positive for alcohol (i.e., their blood alcohol concentration was .01 g/dL or greater prior to 2015 or .001 g/dL or greater for 2015 and later).

NOTES:

- Alcohol data is often missing. For that reason this data element may undercount the actual number of drinking drivers.
- The change to a three-digit BAC in 2015 means that a BAC of .001 or greater qualifies as a drinking driver whereas prior to 2015 a BAC of .01 or greater qualified as a drinking driver. This may have ramifications for trend analyses.

This data element, formerly C100, was discontinued after 2015.

SAS Name: **DRUNK_DR**

Attribute Codes

1975-2015

0-99 Number of Drinking Drivers Involved in the Fatal Crash

Roadway Alignment (discontinued)

Definition: This data element identifies the attribute that best represents the roadway alignment prior to this vehicle's critical precrash event, based on the case materials.

Additional Information: In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level and appears on the Vehicle data file as VALIGN.

SAS Name: ALIGNMNT

Attribute Codes**1975-2009**

- 1 Straight
- 2 Curved
- 9 Unknown

Roadway Function Class (discontinued)

Definition: This data element identifies the functional classification of the trafficway on which the crash occurred.

Additional Information: This data element also appears in the Person data file. This data element was discontinued in 2015.

SAS Name: ROAD_FNC

Attribute Codes

1975-1980

This data element is included in the format, but is not initialized. Do not use it.

1981-1986

- 1 Principal Arterial – Interstate
- 2 Principal Arterial – Other Urban Freeways and Expressways
- 3 Principal Arterial – Other
- 4 Minor Arterial
- 5 Urban Collector
- 6 Major Rural Collector
- 7 Minor Rural Collector
- 8 Local Road or Street
- 9 Unknown

1987-Later

RURAL

- 1 Principal Arterial – Interstate
- 2 Principal Arterial – Other
- 3 Minor Arterial
- 4 Major Collector
- 5 Minor Collector
- 6 Local Road or Street
- 9 Unknown

URBAN

- 11 Principal Arterial – Interstate
- 12 Principal Arterial – Other Freeways or Expressways
- 13 Other Principal Arterial
- 14 Minor Arterial
- 15 Collector
- 16 Local Road or Street
- 19 Unknown

- 99 Unknown

More Information on [Roadway Function Class and Land Use](#)

Roadway Profile (discontinued)

Definition: This data element identifies the attribute that best represents the roadway grade prior to this vehicle's critical precrash event, based on the case materials.

Additional Information: In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level and appears on the Vehicle data file as VPROFILE.

SAS Name: PROFILE

Attribute Codes

1975-1981

- 1 Level
- 2 Grade
- 9 Unknown

1982-2009

- 1 Level
- 2 Grade
- 3 Hillcrest
- 4 Sag
- 9 Unknown

Roadway Surface Condition (discontinued)

Definition: This data element identifies the attribute that best represents the roadway surface condition prior to this vehicle's critical precrash event, based on the case materials.

Additional Information: In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level and appears on the Vehicle data file as VSURCOND.

SAS Name: **SUR_COND**

Attribute Codes

1975- 2007-

2006 2009

1	1	Dry
2	2	Wet
3	3	Snow or Slush
4	--	Ice
--	4	Ice/Frost
5	--	Sand, Dirt, Oil
--	5	Sand, Dirt, Mud, Gravel
--	6	Water (<i>Standing or Moving</i>)
--	7	Oil
8	8	Other
9	9	Unknown

Roadway Surface Type (discontinued)

Definition: This data element identifies the attribute that best represents the roadway surface type prior to this vehicle's critical precrash event, based on the case materials.

Additional Information: In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level and appears on the Vehicle data file as VPAVETYP.

SAS Name: PAVE_TYP

Attribute Codes

1975-2009

- 1 Concrete
- 2 Blacktop, Bituminous, or Asphalt
- 3 Brick or Block
- 4 Slag, Gravel or Stone
- 5 Dirt
- 8 Other
- 9 Unknown

Speed Limit (discontinued)

Definition: This data element identifies the attribute that best represents the posted speed limit just prior to this vehicle's critical precrash event, based on the case materials.

Additional Information: In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level and appears on the Vehicle data file as VSPD_LIM.

SAS Name: SP_LIMIT

Attribute Codes

1975-	1977-		1980-	
1976	1978	1979	2009	
1-94	1-94	1-98	1-98	Speed Limit (<i>mph</i>)
95	95	--	--	Speed Limit Is 95 mph or Greater
96	96	--	0	No Statutory Limit
98	--	--	--	Not Reportable
99	99	99	99	Unknown

Total Lanes in Roadway (discontinued)

Definition: This data element identifies the attribute that best describes the number of travel lanes just prior to this vehicle's critical precrash event, based on the case materials.

Additional Information: The number of lanes refers to the number of lanes of a continuous cross-section of roadway. For example, a local roadway with one lane going north and one lane going south would be coded as two lanes. However, if a trafficway is a divided highway, with two lanes going north, a median, and two lanes going south, then the number of lanes is coded as two. If a trafficway has two lanes going north immediately adjacent to two lanes going south, one continuous cross-section of roadway, then the number of lanes is coded as four. This data element can be used with the trafficway flow data element TRAF_FLO to determine the trafficway geometry. For example: If (NO_LANES EQ 2) AND (TRAF_FLO EQ 1), then one has a two-lane roadway that is not physically divided, that is what most people think of as a two-lane road, one lane going in each direction.

In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level and appears on the Vehicle data file as VNUM_LAN.

SAS Name: NO_LANES

Attribute Codes

1975- 1980-

1979 2009

1	1	One Lane
2	2	Two Lanes
3	3	Three Lanes
4	4	Four Lanes
5	5	Five Lanes
6	6	Six or More Lanes
--	7	Seven or More Lanes
9	9	Unknown

Traffic Control Device (discontinued)

Definition: This data element identifies the attribute that best describes the traffic controls in the vehicle's environment just prior to this vehicle's critical precrash event, based on the case materials.

Additional Information: In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level and appears on the Vehicle data file as VTRAFCON.

SAS Name: TRA_CONT

Attribute Codes**1975-1981**

Traffic Control Device Functioning (discontinued)

Definition: This data element identifies the functionality of the traffic control device recorded for this vehicle in the data element Traffic Control Device.

Additional Information: Data not collected prior to 1982.

In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level and appears on the Vehicle data file as VTCONT_F.

SAS Name: **T_CONT_F**

Attribute Codes**1982-2009**

- 0 No Controls
- 1 Device Not Functioning
- 2 Device Functioning – Functioning Improperly
- 3 Device Functioning Properly
- 9 Unknown

Trafficway Description (discontinued)

Definition: This data element identifies the attribute that best describes the trafficway flow just prior to this vehicle's critical precrash event, based on the case materials.

Additional Information: In 1975 and 1976 all divided highway traffic is coded as Level Data element 3, i.e., divided highway, other barrier or barrier type unknown. There is no distinction made among median strips, guardrails and other barriers for these two years.

Prior to 2010, this data element was called Trafficway Flow. In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level and appears on the Vehicle data file as VTRAFWAY.

SAS Name: **ROAD_FLO** **1975-1981**
TWAY_FLO **1982-1986**
TRAF_FLO **1987-2009**

Attribute Codes**1975-1981**

- 1 Divided Highway, Median Strip (*Since 1977*)
- 2 Divided Highway, Guardrail (*Since 1977*)
- 3 Divided Highway, Other Barrier or Barrier Type Unknown
- 4 Not Physically Divided
- 5 One Way Traffic
- 9 Unknown

Vehicles in Transport (discontinued)

Definition: This data element counts the number of vehicles in-transport involved in the crash. Legally parked vehicles are not included.

Additional Information: This data element was discontinued after 1981.

SAS Name: VEHICLES

Attribute Codes

1976-1981

01-99

The VEHICLE Data File

The Vehicle data file includes in-transport motor vehicle data as well as driver and precrash data. It contains the data elements ST_CASE, STATE, and VEH_NO, which are described in the beginning of the Data Element Definitions and Codes section. The Vehicle data file also contains the data elements on the following pages.

ST_CASE and VEH_NO are the unique identifiers for each record. ST_CASE should be used to merge the Vehicle data file with the Accident data file. ST_CASE and VEH_NO should be used to merge the Vehicle data file with other vehicle-level data files and the Person data file.

V4 Number of Occupants

Definition: This data element is a count of the number of occupants in this vehicle.

Additional Information: All, some, or none of the individuals may have died in the crash.

This data element also appears in the Parkwork data file as PNUMOCCS.

SAS Name: **OCUPANTS 1975-2008**
NUMOCCS 2009-Later

Attribute Codes

1975- 2008	2009- 2015	2016- Later	
0	0	0	None
1-95	1-95	1-98	Actual Number of Occupants in The Vehicle
96	96	--	96 or More Occupants in The Vehicle
97	--	--	Unknown – Only Injured Reported
--	98	--	Not Reported (2010 Only)
99	99	99	Unknown

V5 Unit Type

Definition: This data element identifies the type of unit that applies to this motor vehicle at the time it became an involved vehicle in the crash and was reported as a unit on the PAR.

Additional Information: This data element also appears in the Parkwork data file as PTYPE. The valid attributes for PTYPE are:

- 2 Motor Vehicle Not in Transport Within the Trafficway
- 3 Motor Vehicle Not in Transport Outside the Trafficway
- 4 Working Motor Vehicle (*Highway Construction, Maintenance, Utility Only*)

SAS Name: **UNITTYPE**

Attribute Codes

2005- 2008-

2007 Later

- 1 -- Motor Vehicle in Transport
- 1 Motor Vehicle in Transport (*Inside or Outside the Trafficway*)

V6 Hit and Run

Definition: This data element identifies whether this vehicle was a contact vehicle in the crash that did not stop to render aid (this can include drivers who flee the scene on foot). Hit and run is coded when a motor vehicle in-transport, or its driver, departs from the scene; vehicles not in-transport are excluded. It does not matter whether the hit-and-run vehicle was striking or struck.

Additional Information: From 1975 to 1981 if no information was known about the Hit-and-Run vehicle and/or driver, the vehicle form and/or driver form were not filled out and were not counted as unknown. Starting in 1982 both a vehicle and a driver form were filled out and the data were identified as unknown. This is why, for example, there were approximately only 20 to 40 drivers with unknown sex listed in the FARS data file from 1975 to 1981 and more than 700 drivers with unknown sex from 1982 on.

This data element was removed from Accident data file in 2009.

This data element also appears in the Parkwork data file as PHIT_RUN.

SAS Name: HIT_RUN

Attribute Codes

	1975-	1977-	1982-	
	1976	1981	2008

1	1	1	Yes	
--	8	--	Not Reported	
9	9	9	Unknown	

V7 Registration State

Definition: This element identifies the state in which this vehicle was registered.

Additional Information: For multiple state registrations prior to 1997 the value is 94. In 1997, values 93 and 94 were combined into 93. After 1997, the value for multiple state registrations is 93.

This variable also appears in the Parkwork data set as PREG_STAT.

SAS Name: REG_STAT

V10 Vehicle Model

Definition: This data element identifies the model of this vehicle within a given make.

Additional Information: This data element also appears in the Person data file and in the Parkwork data file as PMODEL.

SAS Name: **MODEL**

Attribute Codes

1975-Later

See the current [FARS/CRSS Coding and Validation Manual](#) for vehicle model codes.

V11 Body Type

Definition: This data element identifies a classification of this vehicle based on its general body configuration, size, shape, doors, etc.

Additional Information: This data element also appears in the Person data file and in the Parkwork data file as PBODYTYP.

1975-1981: Within the yearly NHTSA report *Fatal Accident Reporting System*, the term "Light Trucks" includes Vans.

The body type data do not track with the original documentation. For example, the documentation states that BODY_TYP EQ 7 is for utility vehicles. However, when the data files are examined one sees that BODY_TYP EQ 43 is the value that will provide the desired result. The data files have been modified to make the early years for this data element compatible with 1981.

Note: Utility vehicles are also part of the light truck category

Note: BODY_TYP 40, large limousines, are not included as part of Passenger Cars or Passenger Vehicles.

1982-1990: Within the yearly NHTSA report *Fatal Accident Report System*, the term "Light Truck" includes Vans. Utility vehicles are also part of the light-truck category.

Note: BODY_TYP 13, large limousines and BODY_TYP 14, three-wheel automobiles or automobile derivatives, are not included as part of Passenger Cars or Passenger Vehicles.

Note: A single-unit truck that tows another vehicle, or a bobtail by itself, is considered a combination truck.

1991-Later: Within the yearly NHTSA publication *Traffic Safety Facts*, the term "Light Trucks" includes Vans.

Note: BODY_TYP 12, large limousines and BODY_TYP 13, three-wheel automobiles or automobile derivatives, are not included as part of Passenger Cars or Passenger Vehicles.

When defining School Buses 1993 and later be sure to include the new body type 24 (van-based school bus). However, body type 24 is not part of Buses.

When defining Transit Buses 1993 and later be sure to include the new body type 25 (van-based transit bus). However, body type 25 is not part of Buses.

Note: A single-unit truck that tows another vehicle, or a bobtail, is considered a combination truck.

More Information on [Vehicle Body Type Classification](#)

V12 Vehicle Model Year

Definition: This data element identifies the manufacturer's model year of this vehicle.

Additional Information: This data element also appears in the Person data file and in the Parkwork data file as PMODYEAR.

SAS Name: **MOD_YEAR**

Attribute Codes

1975-	1998-	2010-	
1997	2009	Later	
0-98	xxxx	xxxx	Actual Model Year
--	--	9998	Not Reported
99	9999	9999	Unknown

V13 Vehicle Identification Number (VIN)

Definition: This data element records the vehicle identification number (VIN) of this vehicle assigned by the vehicle manufacturer. The VIN contains information on the vehicle such as: manufacturer, model year, model, body type, restraint type, etc.

Additional Information: From 1975 to 1993 the first ten characters of the VIN are recorded; from 1994 onward the first 12 are used. The vehicle manufacturers use the VIN to describe certain characteristics of a vehicle and to assign a serial number to the vehicle.

VINA is a software program, maintained by R. L. Polk & Co. that deciphers the VIN for 1966 and newer vehicles that are within the scope of the program. In FARS, the VINA program uses the VIN as input values and returns decoded values for automobiles, trucks, and motorcycles. Vehicle type, determined by the analyst-coded body type, is also used as input to facilitate the program processing. The names of many data elements decoded from the VIN begin with "VIN" or "PVIN." Some of the results from the VINA program are used as edit checks for these data.

Starting in 1981, the Vehicle Identification Numbers were required to conform to an international standard. For vehicles built prior to 1981 one may consult the National Automobile Theft Bureau's publication Passenger Vehicle Identification Manual for the year in question.

This data element also appears in the Parkwork data file as PVIN.

SAS Name: **VIN**

More Information on [Vehicle Identification Number \(VIN\)](#)

V14 Vehicle Trailing

Definition: This data element identifies whether this vehicle had any attached trailing units or was towing another motor vehicle. A trailing unit can be a horse trailer, fifth wheel trailer, camper, boat, truck trailer, towed vehicle or any other trailer.

Additional Information: This data element not only applies to tractor trailers, but also to boats, cars, and U-Haul-type vehicles that are towed with a trailer hitch. Vehicles pulled by a rope or chain are not counted as towed vehicles.

Note that the number of unknowns is 0 until 1982. From 1982 to 1984 the number of unknowns is approximately 2,500 per year. Starting in 1985 the number of unknowns falls to about 300 per year.

This data element also appears in the Person data file and in the Parkwork data file as PTRAILER.

SAS Name: TOW_VEH

000000000000	No VIN Required
xxxxxxxxxxxx	First 12 Characters of the VIN
777777777777	No Trailing Units
888888888888	Not Reported
999999999999	Unknown

V16 Jackknife

Definition: This data element identifies whether this vehicle experienced a jackknife anytime during the unstabilized situation.

Additional Information: Jackknife applies to a condition which occurs to a "semi" truck (i.e., cab and one or more trailers) while in motion. The condition reflects a loss of control of the truck by the driver in which the trailer yaws more than 15 degrees from its normal straight line path behind the cab. If the final resting configuration of the vehicle is in the jackknife position, it does not necessarily mean that the vehicle has jackknifed (such as, a crash occurring while the vehicle is backing up or parking).

From 1975 to 1979, the data element exists in the data files but has not been initialized. These data were not collected. Prior to 2016, this data element's Locator Code or Data Element Number was V15.

SAS Name: J_KNIFE

V17 Motor Carrier Identification Number (MCID)

Definition: This data element records the issuing authority and motor carrier identification number (if applicable) to this vehicle.

Additional Information: This 11-character data element is the combination of two data elements, the 2-digit "Motor Carrier Issuing Authority" code (MCARR_I1) followed by the 9-character "Identification Number" (MCARR_I2).

The Carrier Identification Number is found only on vehicles of interstate for-hire or private carriers in the transportation business. It is the unique number assigned to the Carrier by the United States Department of Commerce Commission, or the State. The number can be either a US DOT number (on interstate private carriers) or an ICC MC number (interstate for-hire carriers). Collected only for buses and trucks over 4,500 kg GVWR (Bodytype (V5)= 60, 64, 66-79), this data element is applicable to the following vehicles:

- Medium/Heavy Trucks: vehicles with two axles/six tires and/or gross weight greater than 10,000 pounds.
- Buses with 16 or more seats (including the driver)
- Trucks and Vans of any size carrying hazardous cargo.
- Light commercial trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 pounds.

Prior to 2016, this data element's Locator Code or Data Element Number was V16.

This data element also appears in the Parkwork data file as PMCARR_ID.

SAS Name: MCARR_ID**Attribute Codes**

1998- 2009	2010- Later

V17A MCID Issuing Authority

Definition: This data element records the issuing authority if applicable to this vehicle.

Additional Information: This data element is only applicable for the following vehicles:

- Medium/Heavy Trucks: vehicles with two axles/six tires and/or gross weight greater than 10,000 pounds.
- Buses with 16 or more seats (including the driver)
- Trucks and Vans of any size carrying hazardous cargo.
- Light commercial trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 pounds.

Prior to 2016, this data element's Locator Code or Data Element Number was V16A.

This data element also appears in the Parkwork data file as PMCARR_I1.

SAS Name: MCARR_I1

V17B MCID Identification Number

Definition: This data element records the motor carrier identification number if applicable to this vehicle.

Additional Information: The Carrier Identification Number is found only on vehicles of interstate for-hire or private carriers in the transportation business. It is the unique number assigned to the Carrier by the United States Department of Commerce Commission, or the State. The number can be either a US DOT number (on interstate private carriers) or an ICC MC number (interstate for-hire carriers). Collected only for buses and trucks over 4,500 kg GVWR (Bodytype (V5)= 60, 64, 66-79), this data element is applicable to the following vehicles:

- Medium/Heavy Trucks: vehicles with two axles/six tires and/or gross weight greater than 10,000 pounds.
- Buses with 16 or more seats (including the driver)
- Trucks and Vans of any size carrying hazardous cargo.
- Light commercial trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 pounds.

Prior to 2016, this data element's Locator Code or Data Element Number was V16B.

This data element also appears in the Parkwork data file as PMCARR_I2.

V18 Gross Vehicle Weight Rating

Definition: This data element identifies the gross vehicle weight rating of this vehicle if applicable.

Additional Information: The Gross Vehicle Weight Rating (GVWR) or Gross Combination Weight Rating (GCWR) is a value specified by the manufacturer for a single-unit truck, truck tractor, or trailer. In the absence of a gross vehicle weight rating, an estimate of the gross weight of a fully loaded unit can be substituted.

In 2000 the GVWR was the sum of the weight of the power unit and its trailers. Since 2001 this data element is the gross vehicle weight of the Power Unit only. The weight of trailers is not added.

Prior to 2016, this data element's Locator Code or Data Element Number was V17.

This data element also appears in the Parkwork data file as PGVWR.

V21E/HM5 Release of Hazardous Material from the Cargo Compartment

Definition: This data element identifies whether any hazardous cargo was released from the cargo tank or compartment of this vehicle.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V20E/HM5.

This data element also appears in the Parkwork data file as PHAZ_REL.

SAS Name: HAZ_REL

2007-Later

0	Not Applicable
1	No
2	Yes
8	Not Reported

V22 Bus Use

Definition: This data element describes the common type of bus service this vehicle was being used as at the time of the crash or the primary use for the bus if not in service at the time of the crash.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V21.

This data element also appears in the Parkwork data file as PBUS_USE.

SAS Name: **BUS_USE**

Attribute Codes**2000-2009**

- 0 Not Used as a Bus
- 1 Used as a Public School Bus
- 2 Used as a Private School Bus
- 3 Used as a School Bus, Public or Private Unknown
- 4 Used as a Scheduled Service Bus
- 5 Used as a Tour Bus
- 6 Used as a Commuter Bus
- 7 Used as a Shuttle Bus
- 8 Modified for Personal/Private Use
- 9 Unknown Bus Use

2010-Later

- 0 Not a Bus
- 1 School Bus
- 4 Intercity Bus
- 5 Charter/Tour Bus
- 6 Transit/Commuter Bus
- 7 Shuttle Bus
- 8 Modified for Personal/Private Use
- 98 Not Reported
- 99 Unknown

V23 Special Use

Definition: This data element identifies any special use associated with this vehicle at the time of the crash.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V22.

This data element also appears in the Person data file set and in the Parkwork data file as PSP_USE.

SAS Name: SPEC_USE

V24 Emergency Motor Vehicle Use

Definition: This data element identifies whether this vehicle was engaged in emergency use. Emergency Use indicates operation of any motor vehicle that is legally authorized by a government authority to respond to emergencies with or without the use of emergency warning equipment, such as a police vehicle, fire truck or ambulance while actually engaged in such response.

Additional Information: This data element is applicable only if the vehicle was being used as an emergency vehicle at the time of the crash.

Prior to 2013, this data element was called "Emergency Use." Prior to 2016, this data element's Locator Code or Data Element Number was V23.

This data element also appears in the Person data file and in the Parkwork data file as PEM_USE.

SAS Name: EMER_USE

--	--	--	6	Emergency Operation, Emergency Warning Equipment In Use Unknown
--	8	8	8	Not Reported
--	9	9	9	Unknown

V25 Travel Speed

Definition: This data element records the speed the vehicle was traveling prior to the occurrence of the crash as reported by the investigating officer.

Additional Information: This data is collected after the crash, and is an estimate of the travel speed, which is often a judgment, rather than a measurement. Computing the mean without removing the unknowns will increase the mean travel speed.

For the years 1980 and 1981 travel speed was not collected. However, the data element is currently in the database for these two years with all data as missing. With this data element there has always been a high number of unknown cases. Since the data were considered somewhat "uncollectible," a decision was made not to collect the data for these two years. However, although the data were often unavailable, it was considered too important not to try to collect it.

Since 2005, data have been collected for parked vehicles and vehicles not in-transport. The value 0 only applies to motor vehicles in-transport, for example, a vehicle that is in-transport, but stopped at a stop light.

Prior to 2016, this data element's Locator Code or Data Element Number was V24.

SAS Name: TRAV_SP

Reported Speed Up to 151 mph
Speed Greater than 96 mph
Speed Greater than 151 mph
Not Reported
Unknown

V26 Underride/Override

Definition: This data element identifies this vehicle's involvement in an underride or override during the crash.

Additional Information: Note the striking vehicle, not the vehicle struck, determines the underride/override condition. From 1975 to 1993 both the initial and principal impacts were counted. In the event and only in the event, that the initial or principal impact point was an underride/override were the data element IMPACT1 or IMPACT2 flagged/counts as such. However, all other underrides/overrides were not counted, nor should they have been counted. Impacts were counted, not underrides. Therefore, the data element UNDERIDE was added to the FARS in 1994.

The data element UNDERIDE is dependent on the data contained in the PAR. The NASS CDS is based on the efforts of professional crash investigators performing detailed analysis of crashes. An analysis of the 1994-1996 FARS and NASS CDS data systems and the 1997 Trucks in Fatal Accident file revealed that underrides and overrides are generally not identified on the PARs.

Prior to 2016, this data element's Locator Code or Data Element Number was V25.

This data element also appears in the Parkwork data file as PUNDERIDE.

SAS Name: **UNDERIDE**

Attribute Codes

1994-Later

- 0 No Underride or Override (1994-2011)
- 0 No Underride or Override Noted (2012-Later)

WITH MOTOR VEHICLE IN TRANSPORT

- 1 Underride (*Compartment Intrusion*)
- 2 Underride (*No Compartment Intrusion*)
- 3 Underride (*Compartment Intrusion Unknown*)

WITH MOTOR VEHICLE NOT IN TRANSPORT

- 4 Underride (*Compartment Intrusion*)
- 5 Underride (*No Compartment Intrusion*)
- 6 Underride (*Compartment Intrusion Unknown*)

7 Override, Motor Vehicle in Transport

8 Override, Motor Vehicle Not in Transport

9 Unknown if Underride or Override

V27 Rollover

Definition: This data element identifies this vehicle's involvement in a rollover or overturn during the crash. Rollover is defined as any vehicle rotation of 90 degrees or more about any true longitudinal or lateral axis. Rollover can occur at any time during the crash.

Additional Information: Data are not available from 1975 to 1977. Prior to 2016, this data element's Locator Code or Data Element Number was V26.

This data element also appears in the Person data file.

SAS Name: ROLLOVER

Attribute Codes

1978- 2009-

2008 Later

0	0	No Rollover
1	--	First Event

V29A Initial Contact Point

Definition: This data element identifies the area on this vehicle that produced the first instance of injury to non-motorists or occupants of this vehicle, or that resulted in the first instance of damage to other property or to this vehicle.

Additional Information: Prior to 2010 this data element was called “Initial Point of Impact.” In 2010 and 2011 it was called “Initial Damaged Area.” Since 2012 it is called “Initial Contact Point.” Starting in 2010, this data element is derived from the crash events for the vehicle. It is the first recorded “Area of Impact (This Vehicle)” value for this vehicle.

The attributes Underride and Override were discontinued in 1993 and “Underride/Override” became its own data element in 1994. Prior to 1994, the striking vehicle, not the vehicle struck, determined the underride/override condition. After the crash, in the case of an override or underride one vehicle is over the other. If the striking vehicle is over the other, then the crash is an override. If the striking vehicle is under the other, the crash is an underride. See the information under “Underride/Override” about using this data element. Prior to 2016, this data element’s Locator Code or Data Element Number was V28A.

This data element also appears in the Person data file and in the Parkwork data file as PIMPACT1.

V30 Extent of Damage

Definition: This data element records the amount of damage sustained by this vehicle as indicated in the case materials based on an operational damage scale.

Additional Information: The data on 8 (Not Reportable) collected in 1976 are no longer contained in the data file. The data for that year are not consistent with the documentation of the time.

The data element name was “Extent of Deformation” from 1975 to 2008. The data element name was changed to “Extent of Damage” in 2009. Prior to 2016, this data element’s Locator Code or Data Element Number was V29.

This data element also appears in the Parkwork data set as PVEH_SEV.

V31 Vehicle Removal

Definition: This data element describes the mode by which this vehicle left the scene of the crash.

Additional Information: The early years are not consistent with the documentation of the time.

The data element name was “Manner of Leaving Scene” from 1975 to 2008. The data element name was changed to “Vehicle Removal” in 2009. Prior to 2016, this data element’s Locator Code or Data Element Number was V30.

This data element also appears in the Parkwork data set as PTOWED.

V33 Most Harmful Event

Definition: This data element describes the event that resulted in the most severe injury or, if no injury, the greatest property damage involving this vehicle.

Additional Information: “First Harmful Event” (HARM_EV) applies to the crash. “Most Harmful Event” (M_HARM) applies to the vehicle. Harmful events are judgment calls of the FARS analysts based on the data within the PAR.

From 2004 to 2009, the data elements “First Harmful Event,” “Most Harmful Event,” and the “Sequence of Events” have the same attributes. The harmful event attributes were modified to be consistent with the sequence of events data elements. Starting in 2009, these data elements still have the same attributes except non-harmful event attributes were added to the “Sequence of Events” data element. Prior to 2016, this data element’s Locator Code or Data Element Number was V32.

This data element also appears in the Parkwork data file as PM_HARM.

V34 Related Factors- Vehicle Level

Definition: This data element records factors related to this vehicle expressed by the investigating officer.

Additional Information: There are also crash-level related factors in the Accident data file (CF1, CF2, and CF3), driver-level related factors in the Vehicle data file (DR_SF1, DR_SF2, DR_SF3 and DR_SF4) and person-level related factors in the Person data file (P_SF1, P_SF2, and P_SF3).

The FARS analyst may have used either of the two data elements to code a related factor. One must test both data elements to ensure that the selected related factor is included.

The set of *Pre-existing Vehicle Defects* that had been collected under “Related Factors- Vehicle Level” is now captured in the precrash level data element “Contributing Circumstances, Motor Vehicle” (Factor.MFACTOR).

Prior to 2016, this data element’s Locator Code or Data Element Number was V33.

These data elements also appear in the Parkwork data file as PVEH_CF1 and PVEH_CF2 in 2009 and prior and as PVEH_SC1 and PVEH_SC2 in 2010 and later.

SAS Name:	VEH_CF1, VEH_CF2	1975-2009

V100 Make Model Combined

Definition: This derived data element represents the 5-digit combination of two data elements, the 2-digit "Vehicle Make" code (MAKE) followed by the 3-digit "Vehicle Model" code (MODEL).

Additional Information: This data element also appears in the Person data file and in the Parkwork data file as PMAK_MOD.

SAS Name: MAK_MOD

Attribute Codes**1975-Later**

See the current [FARS/NASS GES/CRSS Coding and Validation Manual](#) for vehicle make and model codes.

V101 VIN Character 1

Definition: This data element represents the first character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_1.

SAS Name: VIN_1

Attribute Codes**1975-Later**

- x First Character in the VIN String

V102 VIN Character 2

Definition: This data element represents the second character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_2.

SAS Name: VIN_2

Attribute Codes**1975-Later**

- x Second Character in the VIN String

V103 VIN Character 3

Definition: This data element represents the third character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_3.

SAS Name: **VIN_3**

Attribute Codes**1975-Later**

- x Third Character in the VIN String

V104 VIN Character 4

Definition: This data element represents the fourth character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_4.

SAS Name: VIN_4

Attribute Codes**1975-Later**

- x Fourth Character in the VIN String

V105 VIN Character 5

Definition: This data element represents the fifth character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_5.

SAS Name: VIN_5

Attribute Codes**1975-Later**

- x Fifth Character in the VIN String

V106 VIN Character 6

Definition: This data element represents the sixth character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_6.

SAS Name: VIN_6

Attribute Codes**1975-Later**

- x Sixth Character in the VIN String

V107 VIN Character 7

Definition: This data element represents the seventh character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_7.

SAS Name: VIN_7

Attribute Codes**1975-Later**

- x Seventh Character in the VIN String

V108 VIN Character 8

Definition: This data element represents the eighth character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_8.

SAS Name: VIN_8

Attribute Codes**1975-Later**

- x Eighth Character in the VIN String

V109 VIN Character 9

Definition: This data element represents the ninth character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_9.

SAS Name: VIN_9

Attribute Codes**1975-Later**

- x Ninth Character in the VIN String

V110 VIN Character 10

Definition: This data element represents the tenth character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_10.

SAS Name: VIN_10

Attribute Codes**1975-Later**

- x Tenth Character in the VIN String

V111 VIN Character 11

Definition: This data element represents the eleventh character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_11.

SAS Name: **VIN_11**

Attribute Codes**1994-Later**

- x Eleventh Character in the VIN String

V112 VIN Character 12

Definition: This data element represents the twelfth character in the VIN string for this vehicle.

Additional Information: This data element also appears in the Parkwork data set as PVIN_12.

SAS Name: VIN_12

Attribute Codes**1994-Later**

- x Twelfth Character in the VIN String

V150 Fatalities in Vehicle

Definition: This data element records the number of fatalities that occurred in this vehicle.

Additional Information: The data element is derived by counting all persons with "Injury Severity" of 4 in the vehicle. The data element "Fatalities" in the Accident data file provides the number of deaths for the entire crash.

This is a derived data element and is not coded on the form directly. In 1976, this value is always set to 0.

This data element also appears in the Parkwork data file as PDEATHS.

SAS Name: DEATHS

Attribute Codes**1975-Later**

01-99 Number of Fatalities that Occurred in the Vehicle.

V151 Driver Drinking

Definition: This data element records whether the driver was drinking.

Additional Information: This data element is derived from data elements in the Vehicle and Person data files. Data are analyzed and if there is "sufficient information" to conclude that a driver was drinking, i.e., positive BAC data or police-reported alcohol involvement, then a driver is classified as drinking.

A driver is classified as drinking (alcohol-involved) if the driver has (1) police-reported alcohol involvement, or (2) a positive alcohol test result.

A driver who is charged with an alcohol violation does not by itself make the driver a "drinking driver" by this definition.

Note that alcohol data is often missing. For that reason this data element may under-count the actual number of drinking drivers.

SAS Name: DR_DRINK

Attribute Codes

1975- 1982-

1981 Later

0	0	No Drinking
1	1	Drinking
9	--	Unknown

D4 Driver Presence

Definition: This data element identifies whether a driver was present in this vehicle at the onset of the unstabilized situation.

Additional Information:

SAS Name: DR_PRES

Attribute Codes

D9 Compliance with CDL Endorsements

Definition: This data element identifies whether the vehicle driven at the time of the crash required endorsement(s) on a Commercial Driver's License (CDL) and whether this driver was complying with the CDL endorsements.

Additional Information: Data was not collected prior to 1991.

Prior to 2011, if no driver was present or the driver presence was unknown, then this data element was left blank. In SAS, these blank values are represented by a single dot or period (.).

SAS Name: L_ENDORS

--	8	8	--	Not Reported
9	9	9	9	Unknown, if Required

D10 License Compliance with Class of Vehicle

Definition: This data element identifies the type of license possessed or not possessed by this driver for the class of vehicle being driven at the time of the crash.

Additional Information: Data not available before 1982.

Since 2004, this data element addresses license compliance with class of vehicle.

Prior to 2011, if no driver was present or the driver presence was unknown, then this data element was left blank. In SAS, these blank values are represented by a single dot or period (.).

SAS Name: L_CL_VEH 1982-1986

More Information on [Driver License Type Compliance](#)

D11 Compliance with License Restrictions

Definition: This data element indicates whether this driver was compliant with restrictions on their license.

Additional Information: Prior to 2011, if no driver was present or the driver presence was unknown, then this data element was left blank. In SAS, these blank values are represented by a single dot or period (.).

SAS Name: L_RESTRI

Attribute Codes

1975- 2009			2012- Later	
2010	2011			
0	0	0	0	No Restrictions or Not Applicable
1	1	1	1	Restrictions Complied With
2	2	2	2	Restrictions Not Complied With
3	3	3	3	Restrictions, Compliance Unknown
--	--	7	7	No Driver Present/Unknown if Driver Present
--	8	8	--	Not Reported
9	9	9	9	Unknown

D12 Driver Height

Definition: This data element identifies this driver's height (in inches).

Additional Information: This information was coded in 2 sub fields which are in Feet or in Inches. If both the Driver Height in Feet and Driver Height in Inches are known then we do the conversion using (Feet)*12 + inches; If Feet is Unknown or if Inches are 98 (Other) or 99 (Unknown) then DR_HGT=999 (Unknown). Minimum height 2 feet = 24 inches, Maximum height 8 feet 11 inches = 107 inches.

In 2009, if feet and/or inches are unknown (9,99) or blank then the Driver Height is left blank. However in 2010, if feet and/or inches are unknown (9,99) then the Driver Height is computed as 999 (Unknown). The Driver Presence data element is not taken into account. In 2011, if feet and/or inches are unknown (9,99) and Driver Presence is 1, then the Driver Height is computed as 999 (Unknown) otherwise Driver Height is computed as 998 (No Driver Present/Unknown if Driver Present).

SAS Name: DR_HGT

D24 Related Factors- Driver Level

Definition: This data element records factors related to this driver expressed by the investigating officer.

Additional Information: There are also crash-level related factors in the Accident data file (CF1, CF2, and CF3), vehicle-level related factors in the Vehicle data file (VEH_SC1 and VEH_SC2), and person-level related factors in the Person data file (P_SF1, P_SF2, and P_SF3).

The person-related factors P_SF1, P_SF2, and P_SF3 are all set to 0 for drivers.

The FARS Analyst may have used any of the three data elements (1975-1996) or four data elements (1997-later) to code a driver-related factor. One must test all of these data elements to ensure that the selected related factor is included.

Early data files are not consistent with the documentation of the time. The following interpretation is suggested for current/future analysis.

A police pursuit is an event that is initiated when a law enforcement officer, operating an authorized emergency vehicle, gives notice to stop (either through the use of visual or audible emergency signals or a combination of emergency devices) to a motorist who the officer is attempting to apprehend and that motorist fails to comply with the signal by either maintaining speed, increasing speed, or taking other evasive action to elude the officer's continued attempts to stop the motorist. This is recorded if any "Related Factor – Driver Level" is coded as 37.

From 1975 to 1981, see "Related Factors- Crash Level" for attributes under *Swerving Due To* and *Vision Obscured By*.

Some information that had been collected under "Related Factors- Driver Level" is now captured in "Condition (Impairment) at Time of Crash- Driver or in two Non-Motor Vehicle Occupant data elements; "Non-Motorist Action/Circumstances Prior to Crash" and "Non-Motorist Action/Circumstances at Time of Crash."

PC5 Trafficway Description

Definition: This data element identifies the attribute that best describes the trafficway flow just prior to this vehicle's critical precrash event.

Additional Information: In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level.

SAS Name: **VTRAFWAY**

Attribute Codes

2010- 2013-

2012 Later

0	--	Non-Trafficway Area
--	0	Non-Trafficway or Driveway Access
1	1	Two-Way, Not Divided
2	2	Two-Way, Divided, Unprotected (<i>Painted > 4 Feet</i>) Median
3	3	Two-Way, Divided, Positive Median Barrier
4	4	One-Way Trafficway
5	5	Two-Way, Not Divided With a Continuous Left-Turn Lane
6	6	Entrance/Exit Ramp
8	8	Not Reported
9	9	Unknown

PC6 Total Lanes in Roadway

Definition: This data element identifies the attribute that best describes the number of travel lanes just prior to this vehicle's critical precrash event.

Additional Information: The number of lanes refers to the number of lanes of a continuous cross-section of roadway. For example, a local roadway with one lane going north and one lane going south would be coded as two lanes. However, if a trafficway is a divided highway with two lanes going north, a median, and two lanes going south, then the number of lanes is coded as two. If a trafficway has two lanes going north immediately adjacent to two lanes going south, one continuous cross-section of roadway, then the number of lanes is coded as four. This data element can be used with the Trafficway Description data element VTRAFWAY to determine the trafficway geometry. For example: If (VNUM_LAN= 2) AND (VTRAFWAY=1), then one has a two-lane roadway that is not physically divided, which is what most people think of as a two-lane road (i.e., one lane going in each direction).

If the roadway is a divided trafficway, the number of travel lanes counts only lanes in the direction of travel of the first harmful event. If the roadway is an undivided trafficway, the number of travel lanes are all the lanes regardless of their direction of travel.

In 2010, this data element was no longer collected at the Accident level. It is now collected at the Vehicle level.

SAS Name: VNUM_LAN

PC20 Attempted Avoidance Maneuver

Definition: This data element identifies the attribute that best describes the movements/actions taken by this driver, within a critical crash envelope, in response to the “Critical Precrash Event.”

Additional Information: This data element identifies the actions taken by the driver in response to the impending danger. Because this data element focuses upon the driver's action just prior to the first harmful event it is coded independently of any maneuvers associated with this vehicle's “Crash Type.”

SAS Name: P_CRASH3

Discontinued VEHICLE Data Elements

Axle (discontinued)

Definition: This data element counts the total number of axles on the vehicle (and converter dolly), including the trailing units (includes raised axles).

Additional Information: The major change in this data element from 1994 to 1995 is the count of axles on the vehicle rather than the deployed axles on the ground. From 1991 to 1994, this data element counts the total number of deployed axles on the *ground* for the vehicle including trailing units. From 1995 to 2007, this data element counts the total number of axles on the *vehicle* for the vehicle including trailing units.

This data element was discontinued after 2007.

SAS Name: AXLES

Attribute Codes

1991-	1995-	
1994	2007	
0	0	Not Applicable, Not a Medium/Heavy Truck or Bus
2-97	2-97	Number of Axles
98	98	Medium/Heavy Truck or Bus, Number of Axles Unknown
99	--	Unknown Vehicle Type
--	99	Unknown if Light or Medium/Heavy Truck or Bus

Carburetion (discontinued)

Definition: This data element identifies the number of barrels for the engine of this vehicle or a code indicating that the engine is high-performance, fuel-injected, turbocharged, or electronically-controlled.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V129, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PCARBUR.

SAS Name: CARBUR

Attribute Codes**2011-2012**

0-8	Actual Number of Barrels
A	1 Barrel, Lower HP
B	1 Barrel, Higher HP
C	1 Barrel, Turbo
D	1 Barrel, Turbo Low HP
E	1 Barrel, Turbo High HP
F	Number of Barrels Not Specified, Fuel injection
G	1 Barrel, Electronically controlled
H	Number of Barrels Not Specified, High performance
J	2 Barrels, Lower HP
K	2 Barrels, Higher HP
L	2 Barrels, Turbo
M	2 Barrels, Turbo Low HP
N	2 Barrels, Turbo High HP
P	2 Barrels, Electronically controlled
Q	Number of Barrels Not Specified, Electronically controlled
R	4 Barrels, Electronically controlled
S	4 Barrels, Lower HP
T	1, 2 or 4 Barrels, Turbo Fuel Injected
U	4 Barrels, Higher HP
V	4 Barrels, Turbo
W	4 Barrels, Turbo Low HP
X	4 Barrels, Turbo High HP
Y	Number of Barrels Not Specified, Turbo
Z	Number of Barrels Not Specified, Super Charged

Crash Avoidance Maneuver (discontinued)

Definition: This data element is collected to indicate if an avoidance maneuver was taken by the driver to avoid the crash.

Additional Information: AVOID is the maneuver that the driver executed to attempt to avoid the crash. See VEH_MAN, Vehicle Maneuver, for the maneuver the driver was executing just prior to entering a crash situation.

This data element was discontinued after 2009.

SAS Name: AVOID

Attribute Codes**1991-2009**

- 0 No Avoidance Maneuver Reported
- 1 Braking (*Skid Marks Evident*)
- 2 Braking (*No Skid Marks; Driver Stated*)
- 3 Braking (*Other Reported Evidence*)
- 4 Steering (*Evidence or Stated*)
- 5 Steering and Braking (*Evidence or Stated*)
- 6 Other Avoidance Maneuver
- 8 Not Reported / (*Inconclusive Since 1999, By Police*)

Cubic Inch Displacement (discontinued)

Definition: This data element identifies the manufacturer's cubic inch displacement of the engine pistons for this vehicle.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V127, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PDISPLACE.

SAS Name: **DISPLACE**

Attribute Codes**2011-2012**

xxx Actual Cubic Inch Displacement (*cid*)

Curb Weight (discontinued)

Definition: This data element identifies the base weight of the series for this vehicle. This is available for Passenger Type Vehicles only (VINTYPE='P').

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V118, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PVIN_WGT.

SAS Name: **VIN_WGT**

Attribute Codes

1975-2012

0	Not Available
1-9998	Actual weight of Automobile (lbs)
9999	Unavailable

More Information on [VIN Weight- Auto](#)

Driver Training (discontinued)

Definition: This data element was discontinued after 1986.

Additional Information:

SAS Name: DR_TRAIN

| 9 | Unknown |

Driver's Vision Obscured by (discontinued)

Definition: This data element records impediments to a driver's visual field that were noted in the case materials.

Additional Information: Most of these data elements can be found in "Related Factor – Driver Level" from 1982 to 2008. This data element was added here in 2009. In 2010, the data element was changed to identify all that apply in the crash and was therefore moved to its own data file, Vision.

SAS Name: **D_VISION1, D_VISION2, D_VISION3**

Attribute Codes**2009**

- 0 No Obstruction Noted
- 1 Rain, Snow, Fog, Smoke, Sand, Dust
- 2 Reflected Glare, Bright Sunlight, Headlights
- 3 Curve, Hill, or Other Roadway Design Features
- 4 Building, Billboard, or Other Structure
- 5 Trees, Crops, Vegetation
- 6 In-Transport Motor Vehicle (*Including Load*)
- 7 Not-in-Transport Motor Vehicle (*Parked, Working*)
- 8 Splash or Spray of Passing Vehicle
- 9 Inadequate Defrost or Defog System
- 10 Inadequate Vehicle Lighting System
- 11 Obstructing Interior to the Vehicle
- 12 External Mirrors
- 13 Broken or Improperly Cleaned Windshield
- 14 Obstructing Angles on Vehicle
- 97 Vision Obscured – No Details
- 98 Other Visual Obstruction
- 99 Unknown

Fuel Code (discontinued)

Definition: This data element identifies the fuel type for this vehicle determined by the manufacturer specification and recommendation.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

Prior to 2010, this data element was derived for trucks only. Since 2010 this data element is coded for all vehicles.

This data element, formerly V121, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PFUECODE.

SAS Name: **FLDCD_TR 1975-2009**

G	G	Gas
H	H	Ethanol Fuel Only
M	M	Methanol Gas Only
N	N	Compressed Natural Gas
P	P	Propane
9	9	Unknown

Hazardous Cargo (discontinued)

Definition: This data element identifies the presence of hazardous cargo for this vehicle and records information about the hazardous cargo when present.

Additional Information: The data element HAZ_CARG is no longer in FARS. It has been replaced with the following five data elements HAZ_INV, HAZ_PLAC, HAZ_ID, HAZ_CNO, and HAZ_REL.

SAS Name: **HAZ_CARG**

Attribute Codes

1982- 1991-

1990 2006

0	0	No
1	--	Yes
--	1	Yes, Placarded
--	2	Yes, Not Placarded
--	3	Yes, Unknown if Placarded
9	9	Unknown

Most Damaged Area (discontinued)

Definition: This data element identifies the area on this vehicle that was most damaged during an event in the crash.

Additional Information: Prior to 2010 this data element was called "Principal Point of Impact." In 2010 and 2011 it was called "Most Damaged Area." This data element was replaced with "Damaged Areas" (MDAREAS) in 2012 which records all damaged areas to this vehicle in the Damage data file.

The attributes Underride and Override were discontinued in 1993 and "Underride/Override" became its own data element in 1994. Prior to 1994, the striking vehicle, not the vehicle struck, determined the underride/override condition. After the crash, in the case of an override or underride one vehicle is over the other. If the striking vehicle is over the other, then the crash is an override. If the striking vehicle is under the other, the crash is an underride. See the information under "Underride/Override" about using and interpreting the data element UNDERIDE.

This data element also appears in the Person data file and in the Parkwork data file as PIMPACT2.

SAS Name: IMPACT2**Attribute Codes**

1975- 1993	1994- 2009	2010- 2011

Motorcycle Dry Weight (discontinued)

Definition: This data element identifies the dry weight of this motorcycle model.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V135, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PMCYCL_WT.

SAS Name: MCYCL_WT

Attribute Codes**2011-2012**

xxxx Weight (lbs)

Motorcycle Engine Displacement (CC) (discontinued)

Definition: This data element identifies the piston bore measured in cubic centimeters for this motorcycle.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V124, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PMCYCL_DS.

SAS Name: MCYCL_DS

Attribute Codes**1975-2012**

xxxx Actual Displacement (cc)

Motorcycle Type (discontinued)

Definition: This is the VINA Body Type (example, Dirt Bike).

Additional Information: This data element was discontinued after 1981.

SAS Name: MCYCL_TY

Attribute Codes**1975-1981**

xx Two-character representation of the motorcycle type

Number of Cylinders (discontinued)

Definition: This data element identifies the number of cylinders for the engine of this vehicle.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V128, was discontinued in 2013. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PCYLINDER.

SAS Name: CYLINDER

Attribute Codes**2011-2012**

0-18 Number of Cylinders
R Rotary Engine

Number of Motorcycle Engine Cycles (discontinued)

Definition: This data element identifies the number of engine cycles for this motorcycle model.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V136, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PMCYCL_CY.

SAS Name: MCYCL_CY

Attribute Codes**2011-2012**

- | | |
|---|--------------------|
| 2 | Two-stroke engine |
| 4 | Four-stroke engine |
| R | Rotary engine |

Number of Wheels/Drive Wheels (discontinued)

Definition: This data element identifies the number of wheels/driving wheels for this truck (trucks only, VINTYPE='T'). The length of this data element is two digits; the first position represents the number of axles on the vehicle times two and the second position represents the number of drive axles times two.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V130, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PWHLDRWHL.

SAS Name: WHLDRWHL

Attribute Codes**2011-2012**

xx Number of Wheels (*1st digit*) followed by the Number of Drive Wheels (*2nd digit*)

Original Tire Size (discontinued)

Definition: This data element identifies the manufacturer's original equipment specified tire size for the series of this vehicle. The length of this data element is six characters; the first two positions represent rim size and the remaining four positions represent tire size.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V126, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PTIRE_SZE.

SAS Name: **TIRE_SZE**

Attribute Codes**2011-2012**

xxxxxx 6-Character Tire Size

Sequence of Events (discontinued)

Definition: The events in sequence related to this motor vehicle, regardless of injury and/or property damage. Events for the vehicle are recorded in the order in which they occur, time-wise, from the PAR narrative and diagram.

Additional Information: Starting in 2004, HARM_EV, M_HARM and the sequence of events data elements have the same values. The harmful event values were modified to be consistent with the sequence of event data elements.

Truck Shipping Weight (discontinued)

Definition: This data element identifies the shipping weight for the shortest wheel base of this truck model.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V132, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PTRK_WT.

SAS Name: TRK_WT

Attribute Codes**2011-2012**

xxxxx	Actual Shipping Weight (<i>lbs</i>)
-------	---------------------------------------

Truck Shipping Weight Variance (discontinued)

Definition: This data element identifies the difference (coded in 100 pound increments) between the shipping weights of the shortest wheel base and the longest wheel base for this truck model. (e.g., a 200 lb. difference appears as "02".) Incremental weights for optional equipment are not included.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V133, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PTRKWTVAR.

SAS Name: TRKWTVAR

Attribute Codes

2011-2012

xx Shipping Weight Variance (100 lbs)

Truck Ton Rating (discontinued)

Definition: This data element identifies the payload capacity of this vehicle based on manufacturer's specifications. The length of this data element is two characters. A single code indicates a single capacity rating. Two codes indicate a range of capacity rating. For example, a Ford F150 pickup truck with a payload capacity from $\frac{1}{2}$ to $\frac{3}{4}$ tons would have a rating of "BC."

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V131, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PTON_RAT.

SAS Name: **TON_RAT**

Truck VIN Restraint Type (discontinued)

Definition: This data element identifies restraint type information for this truck. This includes information about vehicle seat belts and air bags.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V134, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PVIN_REST.

SAS Name: **VIN_REST**

- 9 Unknown

Truck Weight Rating (discontinued)

Definition: This data element identifies weight ranges for this truck of model year 1966 and later based on manufacturer specifications.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

Often coded as 9 for buses.

This data element, formerly V123, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PWGTCD_TR.

SAS Name: **WGTCD_TR**

Attribute Codes**1975-2012**

- 1 6,000 lbs or Less
- 2 6,001 - 10,000 lbs

- 6 19,501 - 26,000 lbs
- 7 26,001 - 33,000 lbs
- 8 33,001 and Up
- 9 Unknown

Vehicle Maneuver (discontinued)

Definition: This data element captures the driver's action, or intended action, prior to the commencement of the unstabilized event as indicated on the crash report.

Additional Information: This data element was discontinued after 2009.

VEH_MAN is the maneuver that the driver was executing just prior to entering a crash situation. For the maneuver that the driver executed to attempt to avoid the crash, see the data element AVOID under Crash Avoidance Maneuver.

SAS Name: **VEH_MAN**

Attribute Codes**1982-2009**

- 1 Going Straight
- 2 Slowing or Stopping in Traffic Lane
- 3 Starting in Traffic Lane
- 4 Stopped in Traffic Lane
- 5 Passing or Overtaking another Vehicle
- 6 Leaving a Parked Position

- 13 Turning Left
- 14 Making a U-Turn
- 15 Backing Up (*Not Parking*)
- 16 Changing Lanes or Merging
- 17 Negotiating a Curve
- 98 Other
- 99 Unknown

Vehicle Role (discontinued)

Definition: This data element Indicates the vehicle's role in single or multi-vehicle crashes.

Additional Information: This data element was discontinued after 2009.

Note when a vehicle is both striking and struck, i.e., Value = 3, the event cannot simultaneously be at the same point of the vehicle. A vehicle must have at least one striking impact point and a struck impact point. A classic example is a chain reaction rear-end crash, where a vehicle which is both striking and struck is located within the chain.

SAS Name: IMPACTS

9	9	Unknown

1997-2009

0 None

RECKLESS/CARELESS/HIT-AND-RUN OFFENSES

- 1 Manslaughter or Homicide
- 2 Willful Reckless Driving; Driving to Endanger; Negligent Driving
- 3 Unsafe Reckless (*Not Willful, Wanton Reckless*) Driving
- 4 Inattentive, Careless, Improper Driving
- 5 Fleeing or Eluding Police
- 6 Fail to Obey Police, Fireman, Authorized Person Directing Traffic
- 7 Hit-and-Run, Fail to Stop After Crash
- 8 Fail to Give Aid, Information, Wait for Police after Crash
- 9 Serious Violation Resulting in Death

Violations Charged (continued)

1997-2009**IMPAIRMENT OFFENSES**

- 11 Driving While Intoxicated (*Alcohol or Drugs*) or BAC above Limit (*Any Detectable BAC for CDLs*)
- 12 Driving While Impaired; Driving Under Influence of Substance Not Intended to Intoxicate
- 13 Driving under Influence of Substance not intended to intoxicate
- 14 Drinking While Operating
- 15 Illegal Possession of Alcohol or Drugs
- 16 Driving With Detectable Alcohol
- 18 Refusal to Submit to Chemical Test
- 19 Alcohol, Drug, or Impairment Violations Generally

SPEED-RELATED OFFENSES

- 21 Racing
- 22 Speeding (*Above the Speed Limit*)
- 23 Speed Greater Than Reasonable and Prudent (*Not Necessarily Over the Limit*)
- 24 Exceeding Special Speed Limit (*e.g., for Trucks, Buses, Cycles, or on Bridge, in School Zone, etc.*)
- 25 Energy Speed (*Exceeding 55 mph, Non-Pointable*)
- 26 Driving Too Slowly
- 29 Speed-Related Violations Generally

RULES OF THE ROAD – TRAFFIC SIGN & SIGNALS

- 31 Fail to Stop for Red Signal
- 32 Fail to Stop for Flashing Red
- 33 Violation of Turn on Red (*Fail to Stop & Yield, Yield to Pedestrians before Turning*)
- 34 Fail to Obey Flashing Signal (*Yellow or Red*)
- 35 Fail to Obey Signal Generally
- 36 Violate RR Grade Crossing Device/Regulations
- 37 Fail to Obey Stop Sign
- 38 Fail to Obey Yield Sign
- 39 Fail to Obey Traffic Control Device Generally

RULES OF THE ROAD – TURNING, YIELDING, SIGNALING

- 41 Turn in Violation of Traffic Control (*Disobey Signs, Turn Arrow Or Pavement Markings; This Is Not A Right-On-Red Violation*)
- 42 Improper Method & Position of Turn (*Too Wide, Wrong Lane*)
- 43 Fail to Signal for Turn or Stop
- 45 Fail to Yield to Emergency Vehicle
- 46 Fail to Yield Generally
- 48 Enter Intersection When Space Insufficient
- 49 Turn, Yield, Signaling Violations Generally

Violations Charged (continued)

1997-2009**RULES OF THE ROAD – WRONG SIDE, PASSING & FOLLOWING**

- 51 Driving Wrong Way on One-Way Road
- 52 Driving on Left, Wrong Side of Road Generally
- 53 Improper, Unsafe Passing
- 54 Pass on Right (*Drive off Pavement to Pass*)
- 55 Pass Stopped School Bus
- 56 Fail to Give Way When Overtaken
- 58 Following Too Closely
- 59 Wrong Side, Passing, Following Violations Generally

RULES OF THE ROAD – LANE USAGE

- 61 Unsafe or Prohibited Lane Change
- 62 Improper Use of Lane (*Enter of 3-Lane Road, HOV Designated Lane*)
- 63 Certain Traffic to Use Right Lane (*Trucks, Slow Moving, etc.*)
- 66 Motorcycle Lane Violations (*More than two per Lane, Riding Between Lanes, etc.*)
- 67 Motorcyclist Attached to another Vehicle
- 69 Lane Violations Generally

NON-MOVING – LICENSE & REGISTRATION VIOLATIONS

- 71 Driving While License Withdrawn
- 72 Other Driver License Violations
- 73 Commercial Driver Violations
- 74 Vehicle Registration Violations
- 75 Fail to Carry Insurance Card
- 76 Driving Uninsured Vehicle
- 79 Non-Moving Violations Generally

EQUIPMENT

- 81 Lamp Violations
- 82 Brake Violations
- 83 Failure to Require Restraint Use (*By Self or Passenger*)
- 84 Motorcycle Equipment Violations (*Helmet, Special Equipment*)
- 85 Violation of Hazardous Cargo Regulations
- 86 Size, Weight, Load Violations
- 89 Equipment Violations Generally

OTHER VIOLATIONS

- 91 Parking
- 92 Theft, Unauthorized Use of Motor Vehicle
- 93 Driving Where Prohibited (*Sidewalk, Limited Access, Off Truck Route*)
- 98 Other Moving Violation
- 99 Unknown Violation

VIN Body Type (discontinued)

Definition: This data element identifies the two-character representation of this vehicle's body style.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers. The VINA program decodes these data and partitions vehicles into three classes, passenger vehicles, trucks, and motorcycles.

This data element, formerly V116, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PVIN_BT.

SAS Name: **VIN_BT**

99	99	Unknown

VIN Length (discontinued)

Definition: This data element identifies the actual length of the VIN for this vehicle.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V125, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Parkwork data file as PVIN_LNGT.

SAS Name: **VIN_LNGT**

Attribute Codes**1981-2012**

1-17	Actual Value
99	Unknown VIN Length

VIN Make (discontinued)

Definition: This data element identifies the National Crime Information Center (NCIC) Standard Make Abbreviation for this vehicle.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers. For a listing of these codes please refer to the Polk VINtelligence Manual.

This data element, formerly V114, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PVINMAKE.

SAS Name: **VINMAKE**

Attribute Codes**2010-2012**

xxxx 4-Character Make Abbreviation

VIN Model (discontinued)

Definition: This data element identifies the VIN model for this vehicle obtained from the VINA program.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers. For a listing of these codes please refer to the Polk VINtelligence Manual.

If one needs to select cars based on make and model the data element of choice is VINA_MOD rather than MAK_MOD.

The VINA_MOD is only unique within the vehicle make. That is, different makes of vehicles can have the same VINA_MOD. To ensure that the correct vehicle is selected the data element MAKE or VIN_MAKE (available 2010 and later) must be used in conjunction with VINA_MOD. The data elements VINA_MOD, MAKE and VINMAKE are in the Vehicle data file and the Person data file.

This data element, formerly V115, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PVINA_MOD.

SAS Name: **VINA_MOD**

Attribute Codes**1975-2012**

xxx 3-Character Model (Series) Abbreviation

VIN Model Year (discontinued)

Definition: This data element identifies the model year of this vehicle.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V117, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PVINMODYR.

SAS Name: **VINMODYR**

Attribute Codes**2010-2012**

xx 2-Digit Model Year

VIN Truck Series (discontinued)

Definition: This data element identifies the model (series) of this truck.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers. For a listing of these codes please refer to the Polk VINtelligence Manual.

This data element, formerly V122, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PSER_TR.

SAS Name: SER_TR

Attribute Codes**1975-2012**

xxx 3-Character Model (Series) Abbreviation

VIN Vehicle Type (discontinued)

Definition: This data element identifies the basic vehicle type of his vehicle from the VINA program.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V113, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PVINTYPE.

SAS Name: **VINTYPE**

Attribute Codes**2010-2012**

P	Passenger Vehicle
T	Truck
M	Motorcycle
U	Unknown

Wheelbase Short (discontinued)

Definition: This data element identifies the shortest wheelbase respectively for the manufactured model of this vehicle.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V119, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PWHLBS_SH.

SAS Name: **WHLBS_SH**

Attribute Codes**1975-2012**

0	Value Not Available from the VINA Program
1-9998	Actual Value (<i>in</i>)
9999	Value Not Coded

Wheelbase Long (discontinued)

Definition: This data element identifies the longest wheelbase respectively for the manufactured model of this vehicle.

Additional Information: This data element is derived by the VINA analysis system scanning the VIN for vehicles of model year 1966 and later that have verifiable VIN numbers.

This data element, formerly V120, was discontinued after 2012. See the Vindecode data file for VIN decoded data elements. Prior to 2013, this data element also appeared in the Person data file and in the Parkwork data file as PWHLBS_LG.

SAS Name: **WHLBS_LG**

Attribute Codes**1975-2012**

0	Value Not Available from the VINA Program
1-9998	Actual Value (<i>in</i>)
9999	Value Not Coded

The PERSON Data File

The Person data file includes motorist and non-motorist data. It contains the data elements ST_CASE, STATE, VEH_NO, and PER_NO, which are described in the beginning of the Data Element Definitions and Codes section. The Person data file also contains the data elements on the following pages.

ST_CASE, VEH_NO, and PER_NO are the unique identifiers for each record. ST_CASE should be used to merge the Person data file with the Accident data file for a set of all motorists and non-motorists. ST_CASE and VEH_NO should be used to merge the Person data file with the Vehicle and Parkwork data files for a set of all motor vehicle occupants. ST_CASE and PER_NO should be used to merge the Person data file with non-motorist person-level data files.

In the Person data file, motor vehicle occupants are PER_TYPE = 1, 2, 3, 9. Motor vehicle occupants have assigned vehicle numbers starting with 1. When PER_TYPE = 3, the occupied vehicle will be found in the PARKWORK data file. Non-motor vehicle occupants are PER_TYPE = 4, 5, 6, 7, 8, 10 or 19. VEH_NO = 0 for non-motor vehicle occupants.

P5/NM5 Age

Definition: This data element identifies this person's age at the time of the crash, in years, with respect to their last birthday.

Additional Information:**SAS Name:** AGE**Attribute Codes****1975-2008**

0	Up to One Year
1-96	Age of the Individual in Years
97	97 Years Old or Older
99	Unknown

**2010-
2009 Later**

0	0	Less than One Year
1-120	1-120	Age of the Individual in Years
--	998	Not Reported
999	999	Unknown

P6/NM6 Sex

Definition: This data element identifies the sex of this person involved in the crash.

Additional Information: From 1975 to 1981, if no information was known about the hit-and-run vehicle and/or driver, then neither the vehicle form nor the driver form were filled out and were not counted in the FARS census. Starting in 1982 both a vehicle and a driver form were filled out and the data were identified as unknown. This is why there were approximately only 20 to 40 drivers with unknown sex listed in the FARS data file from 1975 to 1981 and 700 to 1000 drivers with unknown sex from 1982 on.

On March 22, 1995, a quick review of the 1994 Annual Report File revealed that of the 768 persons in the 1994 data file with unknown sex; over 90 percent were involved in hit-and-run crashes.

SAS Name: **SEX**

Attribute Codes

1975- 2010-

2009 Later

1	1	Male
2	2	Female
--	8	Not Reported
9	9	Unknown

P7/NM7 Person Type

Definition: This data element describes the role of this person involved in the crash.

More Information on [Person Type](#)

P8/NM8 Injury Severity

Definition: This data element describes the severity of the injury to this person in the crash using the KABCO scale.

Additional Information: It is important to realize that some States do not always collect data on persons who were in a crash but were not injured. If the analysis being performed depends on non-injured occupants -- for example some paired comparisons -- check the data at the State level.

SAS Name: INJ_SEV

Attribute Codes

P11 Indication of Misuse of Restraint System/Helmet

Definition: This data element indicates any misuse of the restraint system or helmet used by this person.

Additional Information:

SAS Name: REST_MIS

Attribute Codes

2010-Later

- 0 No
- 1 Yes
- 8 Not a Motor Vehicle Occupant

P12 Air Bag Deployed

Definition: This data element records air bag availability and deployment for this person as reported in the case materials.

Additional Information: This data element is designed to collect both air bag availability and deployment for each occupied seat position. Variation in the presentation of the source data on the state crash report forms and the selections coded on the PAR may produce unlikely combinations or missing data. For example:

1. If the seat position does not have an air bag at the time of manufacture, but the information on the PAR indicates an air bag was available or deployed, the information on the PAR may have taken precedence.
2. If the seat position has an air bag installed at the time of manufacture and the PAR indicates there is no air bag available, then the PAR information may have taken precedence.

SAS Name: AIR_BAG

Attribute Codes

1991-1997

- 0 Non-Motorist
- 3 Deployed Air Bag
- 4 Non-Deployed Air Bag
- 9 Unknown or Not Applicable

1998-2008

- 0 Non-Motorist (*Not a Motor Vehicle Occupant, Since 2005*)

DEPLOYED (FOR THIS SEAT)

- 1 Deployed Air Bag From Front (1998-2006)
- 1 From Front (*Steering Wheel, Dashboard, Since 2007*)
- 2 Deployed Air Bag From Side (1998-2006)
- 2 From Side (*Door, Seat, Canopy, Since 2007*)
- 7 Deployed Air Bag Other Direction (1998-2006)
- 7 From Other Direction (*Knee, Airbelt, etc, Since 2007*)
- 8 Deployed Air Bag Multiple Directions
- 9 Deployed Air Bag Direction Unknown

NOT DEPLOYED (FOR THIS SEAT)

- 20 Air Bag Available but Not Deployed for This Seat
- 28 Air Bag Available and Switched Off

UNKNOWN IF DEPLOYED

- 29 Air Bag Available, Deployment Not Known for This Seat

NOT AVAILABLE

- 30 Air Bag Not Available for This Seat
- 31 Air Bag Previously Deployed and Not Replaced
- 32 Air Bag Disabled or Removed
- 99 Unknown (*If Airbag Available*)

--	97	Not a Motor Vehicle Occupant
--	98	Not Reported
99	99	Deployment Unknown

P13 Ejection

Definition: This data element describes the ejection status and degree of ejection for this person, excluding motorcycle occupants.

Additional Information: In the mid 1970's there were a large number of people coded as ejection unknown and a corresponding small number of people coded as not ejected. However, the totally ejected and partially ejected counts are the same magnitude as in later years.

Starting in 2011, "Not Applicable" includes people not in motor vehicles (i.e., pedestrians, bicyclists, etc.)

SAS Name: EJECTION

Attribute Codes

1975-2006

- 0 Not Ejected or Not Applicable
- 1 Totally Ejected
- 2 Partially Ejected
- 9 Unknown

2007- 2010-

2009 Later

- 0 0 Not Ejected
- 1 1 Totally Ejected
- 2 2 Partially Ejected
- 3 3 Ejected – Unknown Degree (Since 2008)
- 7 Not Reported
- 8 8 Not Applicable
- 9 -- Unknown (2007-2008)
- 9 9 Unknown if Ejected (Since 2009)

More Information on [Ejection](#)

P14 Ejection Path

Definition: This data element identifies the path by which this person was ejected from the vehicle.

Additional Information:

SAS Name: EJ_PATH

Attribute Codes

1991- 2015-

2014 Later

0	--	Not Ejected/Not Applicable
--	0	Ejection Path Not Applicable
1	1	Through Side Door Opening (<i>All Side Doors</i>)
2	2	Through Side Window (<i>All Side Windows, Bus Side Windows</i>)
3	3	Through Windshield (<i>Front Windshield Only</i>)
4	4	Through Back Window (<i>Standard Rear Window, Back Window of Bronco, Van</i>)
5	5	Through Back Door/Tailgate Opening (<i>Station Wagon Tailgate, Back Door of Truck, Back Door of Bronco, Van</i>)
6	6	Through Roof Opening (<i>Sun Roof, Convertible Top Down, T-Top, Targa Top</i>)
7	7	Through Roof (<i>Convertible Top Up</i>)
8	8	Other Path (<i>e.g., Back of Pickup Truck, Torn-Off Roof, Car Cut in Half</i>)
9	--	Unknown/Unknown Path
--	9	Ejection Path Unknown

P15 Extrication

Definition: This data element identifies if equipment or other force was used to remove this person from the vehicle.

Additional Information: In Massachusetts, if an occupant is not injured, data for Protection system use and ejection are not coded on the PAR.

From 1975 to 1976 the EXTRICAT and EJECTION data elements were combined in a single field. The data files were changed in 1977 to the current format. In 1975 and 1976 there are fewer persons identified as not extricated than in later years. Both the count of extricated persons and unknowns seem high for these years. From 1977 to 1981 there was not an edit check to prevent one coding an occupant as being both ejected and extricated. There are 69, 48, 83, 98, and 88 persons coded as both totally ejected and extricated in the 1977, 1978, 1979, 1980, and 1981 respectively.

SAS Name: EXTRICAT

Attribute Codes

1975-Later

- 0 Not Extricated/Not Applicable
- 1 Extricated
- 9 Unknown

P16/NM15 Police Reported Alcohol Involvement

Definition: This data element records whether alcohol was involved for this person and reflects the judgment of law enforcement.

Additional Information: This data element does not indicate that alcohol was a cause of the crash. If a PAR indicates that opened or unopened alcohol bottles were found in the vehicle, then this information does not by itself constitute involvement.

SAS Name: DRINKING

Attribute Codes**1975-Later**

- 0 No (*Alcohol Not Involved*)
- 1 Yes (*Alcohol Involved*)
- 8 Not Reported
- 9 Unknown (*Police Reported*)

More Information on [Alcohol](#)

P17/NM16 Method of Alcohol Determination by Police

Definition: This data element describes the method by which the police made the determination as to whether alcohol was involved for this person.

Additional Information: 1975 to 1979 data on the type of blood alcohol test were collected, but this data has since been removed from the analysis data files.

SAS Name: ALC_DET

Attribute Codes**1987-Later**

- 1 Evidential Test (*Breath, Blood, Urine*)

P18C/NM17C**Alcohol Test Result**

Definition: This data element identifies the alcohol test result for this person.

Additional Information: In 2015, this data element changed from a 2-digit field to a 3-digit field. Prior to 2015, the 3rd digit was truncated – not rounded. A BAC of .10 is coded as 10 prior to 2015 and as 100 in 2015 and later. The decimal is implied. The BAC is expressed in grams per deciliter (g/dL) or a clinical evaluation of the same.

SAS Name: **TEST_RES 1975-1990**

P26/NM25 Related Factors- Person Level

Definition: This data element records factors related to motor vehicle occupants other than drivers and persons not in motor vehicles as expressed by the investigating officer.

Additional Information: There are also crash-level related factors in the Accident data file (CF1, CF2, and CF3), vehicle-level related factors in the Vehicle data file (VEH_SC1 and VEH_SC2), and driver-level related factors, also in the Vehicle data file (DR_SF1, DR_SF2, DR_SF3 and DR_SF4).

Any of the three data elements may have been used to code a related factor. One must test all three data elements to ensure that the selected related factor is included.

Person-related factors for all drivers are coded 00. Person-related factors for non-drivers can have non-zero values as listed below.

For 1975 to 1981, values 02 to 06 correspond to 01 to 05 for the 1982 to 2009 data. Values of 20 and higher correspond directly the same values for 1982 to 2009.

SAS Name: **P_CF1, P_CF2, P_CF3 1975-2009**
P_SF1, P_SF2, P_SF3 2010-Later

Attribute Codes**1975-1981**

P100 Lag Time

P100A Lag Hours

Definition: This data element records the hours between the time of the crash and this person's time of death.

Additional Information: This is a computed data element.

SAS Name: LAG_HRS

Attribute Codes

1975- **2009-**

2008 **Later**

0-24	0-719	Hours
99	999	Unknown

P100B Lag Minutes

Definition: This data element records the minutes, in addition to hours ("Lag Hours"), between the time of the crash and this person's time of death.

Additional Information: This is a computed data element.

SAS Name: LAG_MINS

Attribute Codes

1975-Later

0-59	Minutes
99	Unknown

SP2 Fatal Injury at Work

Definition: This data element records whether the death certificate indicated this person was "at work" at the time of the crash.

Additional Information:

SAS Name: WORK_INJ

Attribute Codes

1987-Later

- 0 No (*The Injury Was Not At Work*)
- 1 Yes (*The Injury Was At Work*)
- 8 Not Applicable (*Not A Fatality*)
- 9 Unknown

SP3 Race/Hispanic Origin

SP3A Race

Definition: This data element records the race of this person from the death certificate.

Additional Information: This data element is only coded for fatalities.

SAS Name: RACE

Attribute Codes

1999- 2001-

2000 Later

NM4 Number of Motor Vehicle Striking Non-Motorist

Definition: This data element identifies the “Vehicle Number” (VEH_NO) of the in-transport vehicle that made contact with this non-motorist.

Additional Information: This data element applies only to non-motorists/non-occupants and reflects the vehicle that made contact with the non-motorist/non-occupant identified by the Person Number (PER_NO).

The number must match the vehicle number of the striking vehicle. This number is similar to VEH_NO, except that the non-motorist/non-occupant was struck by the vehicle, rather than being within the vehicle.

SAS Name: **N_MOT_NO** 1982-2010
STR_VEH 2011-Later

Attribute Codes

1982- **2009-**
2008 **Later**

0	0	Occupant of a Motor Vehicle
1-98	1-998	Vehicle Number of Striking Vehicle
99	999	Unknown

NM10 Non-Motorist Location at Time of Crash

Definition: This data element identifies the attribute which best describes the location of this non-motorist with respect to the roadway at the time of the crash.

Additional Information:

SAS Name: LOCATION

Attribute Codes**1975-1981**

- 0 Not Applicable-Vehicle Occupant

Manual Restraint (discontinued)

Definition: This data element was discontinued after 1990.

Additional Information:

SAS Name: MAN_REST

Attribute Codes**1975-1990**

- 0 None Used – Vehicle Occupant; Not Applicable – Non-Motorist
- 1 Shoulder Belt
- 2 Lap Belt
- 3 Lap and Shoulder Belt
- 4 Child Safety Seat
- 5 Motorcycle Helmet
- 8 Restraint Used – Type Unknown or Other Including Other Helmet
- 9 Unknown

The PARKWORK Data File

The Parkwork data file includes Vehicle data elements applicable to Parked and Working Vehicles. It contains the data elements ST_CASE, STATE, and VEH_NO, which are described in the beginning of the Data Element Definitions and Codes section. The Parkwork data file also contains the data elements on the following pages.

ST_CASE and VEH_NO are the unique identifiers for each record. ST_CASE should be used to merge the Parkwork data file with the Accident data file. ST_CASE and VEH_NO should be used to merge the Parkwork data file with the Vindecode and Person data files.

The Parkwork data file replaced the Vehnit data file in 2010. The Vehnit data file ran from 2005 to 2009 and its element and attribute history is also provided below.

C4A Number of Motor Vehicles in Transport (MVIT)

Definition: This data element is a count of the number of vehicles in-transport involved in the crash. Legally parked vehicles are not included.

Additional Information: See this data element in the Accident data file section for more information.

SAS Name: **VE_FORMS** **2005-2009**
PVE_FORMS **2010-Later**

Attribute Codes

2005-	2009-
2008	Later
1-99	1-999 Number of Vehicle Forms

C8 Crash Date

C8A Month of Crash

Definition: This data element records the month in which the crash occurred.

Additional Information: See this data element in the Accident data file section for more information.

SAS Name: MONTH 2005-2009
PMONTH 2010-Later

Attribute Codes**2005-Later**

C20 Manner of Collision

Definition: This data element describes the orientation of two motor vehicles in-transport when they are involved in the “First Harmful Event” of a collision crash. If the “First Harmful Event” is not a collision between two motor vehicles in-transport it is classified as such.

Additional Information: See this data element in the Accident data file section for more information.

SAS Name: **MAN_COLL 2005-2009**

PMAN_COLL 2010-Later

Attribute Codes

1-95	1-98	The Actual Number of Occupants in The Vehicle
96	--	96 Or More Occupants in The Vehicle
98	--	Not Reported (2010 Only)
99	99	Unknown

V5 Unit Type

Definition: This data element identifies the type of unit that applies to this motor vehicle at the time it became an involved vehicle in the crash and was reported as a unit on the PAR.

Additional Information: This data element also appears in the Vehicle data file as UNITTYPE. The only valid attribute for UNITTYPE is 1 (Motor Vehicle in Transport (*Inside or Outside the Trafficway*)).

SAS Name: **UNITTYPE** **2005-2009**
PTYPE **2010-Later**

Attribute Codes

2005-Later

- 2 Motor Vehicle Not in Transport Within the Trafficway
- 3 Motor Vehicle Not in Transport Outside the Trafficway
- 4 Working Motor Vehicle (*Highway Construction, Maintenance, Utility Only*)

V6 Hit and Run

Definition: This data element identifies whether this vehicle was a contact vehicle in the crash that did not stop to render aid (this can include drivers who flee the scene on foot). Hit and run is coded when a motor vehicle in-transport, or its driver, departs from the scene; vehicles not in-transport are excluded. It does not matter whether the hit-and-run vehicle was striking or struck.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **HIT_RUN** **2005-2009**
PHIT_RUN **2010-Later**

Attribute Codes

2005- 2008	2009	2010- 2011	2012- Later	
0	0	0	0	No / No Hit-and-Run
1	--	--	--	Hit Motor Vehicle in Transport

V21A/HM1 Hazardous Material Involvement

Definition: This data element identifies whether this vehicle was carrying hazardous materials.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V20A/HM1.

SAS Name: **HAZ_INV** **2007-2009**

PHAZ_INV **2010-Later**

2007-Later

- 1 No
- 2 Yes

V21B/HM2 Hazardous Material Placard

Definition: This data element identifies the presence of hazardous materials for this vehicle and whether this vehicle displayed a hazardous materials placard.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V20B/HM2.

SAS Name: **HAZ_PLAC** **2007-2009**

PHAZPLAC **2010-Later**

2007-Later

- 0 Not Applicable
- 1 No
- 2 Yes
- 8 Not Reported

V21C/HM3 Hazardous Material Identification Number

Definition: This data element identifies the 4-digit hazardous material identification number for this vehicle.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V20C/HM3.

SAS Name: **HAZ_ID** **2007-2009**

PHAZ_ID **2010-Later**

2007-Later

- 0 Not Applicable
- xxxx Actual 4-Digit Number
- 8888 Not Reported

V21D/HM4 Hazardous Material Class Number

Definition: This data element identifies the single-digit hazardous material class number for this vehicle.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V20D/HM4.

SAS Name: **HAZ_CNO** *2007-2009*
PHAZ_CNO *2010-Later*

2007

0	Not Applicable
1-7 or 9	Actual Number
8	Not Reported

2008-Later

0	Not Applicable
1-9	Actual Number
88	Not Reported

V21E/HM5 Release of Hazardous Material from the Cargo Compartment

Definition: This data element identifies whether any hazardous cargo was released from the cargo tank or compartment of this vehicle.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V20E/HM5.

SAS Name: **HAZ_REL** *2007-2009*
PHAZ_REL *2010-Later*

2007-Later

0	Not Applicable
1	No
2	Yes
8	Not Reported

V22 Bus Use

Definition: This data element describes the common type of bus service this vehicle was being used as at the time of the crash or the primary use for the bus if not in service at the time of the crash.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V21.

SAS Name: **BUS_USE** **2005-2009**

PBUS_USE **2010-Later**

Attribute Codes**2005-2009**

- 0 Not Used as a Bus
- 1 Used as a Public School Bus
- 2 Used as a Private School Bus
- 3 Used as a School Bus, Public or Private Unknown
- 4 Used as a Scheduled Service Bus
- 5 Used as a Tour Bus
- 6 Used as a Commuter Bus
- 7 Used as a Shuttle Bus
- 8 Modified for Personal/Private Use
- 9 Unknown Bus Use

2010-Later

- 0 Not a Bus
- 1 School Bus
- 4 Intercity Bus
- 5 Charter/Tour Bus
- 6 Transit/Commuter Bus
- 7 Shuttle Bus
- 8 Modified for Personal/Private Use
- 98 Not Reported
- 99 Unknown

V23 Special Use

Definition: This data element identifies any special use associated with this vehicle at the time of the crash.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V22.

SAS Name: **SPEC_USE 2005-2009**
PSP_USE 2010-Later

Attribute Codes

2005- 2009	2010- 2011	2012	2013- Later	
0	0	0	0	No Special Use
1	1	1	1	Taxi
2	2	--	--	Vehicle Used for School Bus
--	--	2	2	Vehicle Used as School Transport
3	3	3	3	Vehicle Used as Other Bus
4	4	4	4	Military
5	5	5	5	Police
6	6	6	6	Ambulance
7	7	7	7	Fire Truck
8	8	8	--	Emergency Services Vehicle (2009-2012)
--	--	--	8	Non-Transport Emergency Services Vehicle
--	--	--	13	Incident Response
--	98	98	98	Not Reported
9	99	99	99	Unknown

V24 Emergency Motor Vehicle Use

Definition: This data element identifies whether this vehicle was engaged in emergency use. Emergency Use indicates operation of any motor vehicle that is legally authorized by a government authority to respond to emergencies with or without the use of emergency warning equipment, such as a police vehicle, fire truck or ambulance while actually engaged in such response.

Additional Information: Prior to 2013 this data element was called “Emergency Use.” Prior to 2016, this data element’s Locator Code or Data Element Number was V23.

See this data element in the Vehicle data file section for more information.

SAS Name: **EMER_USE 2005-2009**

PEM_USE 2010-Later

Attribute Codes

2005- 2009	2010- 2012	2013	2014- Later	
0	0	--	--	No
--	--	0	0	Not Applicable
1	1	--	--	Yes
--	--	2	2	Non-Emergency, Non-Transport
--	--	3	3	Non-Emergency Transport
--	--	4	4	Emergency Operation, Emergency Warning Equipment Not In Use
--	--	5	5	Emergency Operation, Emergency Warning Equipment In Use
--	--	--	6	Emergency Operation, Emergency Warning Equipment In Use Unknown
--	8	8	8	Not Reported
--	9	9	9	Unknown

V26 Underride/Override

Definition: This data element identifies this vehicle's involvement in an underride or override during the crash.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V25.

See this data element in the Vehicle data file section for more information.

SAS Name: **UNDERIDE 2005-2009**

PUNDERIDE 2010-Later

Attribute Codes

2005-Later

- 0 No Underride or Override (2005-2011)
- 0 No Underride or Override Noted (2012-Later)

WITH MOTOR VEHICLE IN TRANSPORT

- 1 Underride (*Compartment Intrusion*)
- 2 Underride (*No Compartment Intrusion*)
- 3 Underride (*Compartment Intrusion Unknown*)

WITH MOTOR VEHICLE NOT IN TRANSPORT

- 4 Underride (*Compartment Intrusion*)
- 5 Underride (*No Compartment Intrusion*)
- 6 Underride (*Compartment Intrusion Unknown*)

- 7 Override, Motor Vehicle in Transport
- 8 Override, Motor Vehicle Not in Transport
- 9 Unknown if Underride or Override

V29A Initial Contact Point

Definition: This data element identifies the area on this vehicle that produced the first instance of injury to non-motorists or occupants of this vehicle, or that resulted in the first instance of damage to other property or to this vehicle.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V28A.

See this data element in the Vehicle data file section for more information.

SAS Name: IMPACT1 2005-2009
PIMPACT1 2010-Later

More Information on [Impact](#)

V30 Extent of Damage

Definition: This data element records the amount of damage sustained by this vehicle as indicated on the PAR based on an operational damage scale.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V29.

See this data element in the Vehicle data file section for more information.

SAS Name: **VEH_SEV 2005-2009**
PVEH_SEV 2010-Later

Attribute Codes

--	--	8	8	Not Reported
9	9	9	9	Unknown

V33 Most Harmful Event

Definition: This data element describes the event that resulted in the most severe injury or, if no injury, the greatest property damage involving this vehicle.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V32.

See this data element in the Vehicle data file section for more information.

SAS Name: M_HARM 2005-2009

1	1	--	Fire Occurred in This Vehicle during Crash
--	--	1	Yes
--	2	--	Fire Occurred in This Vehicle and Initiated Fire/Explosion in Another Vehicle

V100 Make Model Combined

Definition: This derived data element represents the 5-digit combination of two data elements, the 2-digit "Vehicle Make" code (MAKE) followed by the 3-digit "Vehicle Model" code (MODEL).

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **MAK_MOD** *2005-2009*
PMAK_MOD *2010-Later*

Attribute Codes***2005-Later***

See the current FARS/NASS GES/CRSS Coding and Validation Manual for vehicle make and model codes.

V101 VIN Character 1

Definition: This data element represents the first character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_1** **2005-2009**
PVIN_1 **2010-Later**

Attribute Codes

2005-Later

- First Character in the VIN String

V102 VIN Character 2

Definition: This data element represents the second character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_2** **2005-2009**
PVIN_2 **2010-Later**

Attribute Codes

2005-Later

Second Character in the VIN String

V103 VIN Character 3

Definition: This data element represents the third character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_3** *2005-2009*
PVIN_3 *2010-Later*

Attribute Codes

2005-Later

Third Character in the VIN String

V104 VIN Character 4

Definition: This data element represents the fourth character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_4** **2005-2009**
PVIN_4 **2010-Later**

Attribute Codes

2005-Later

Fourth Character in the VIN String

V105 VIN Character 5

Definition: This data element represents the fifth character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_5** *2005-2009*
PVIN_5 *2010-Later*

Attribute Codes

2005-Later

- Fifth Character in the VIN String

V106 VIN Character 6

Definition: This data element represents the sixth character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_6** **2005-2009**
PVIN_6 **2010-Later**

Attribute Codes

2005-Later

Sixth Character in the VIN String

V107 VIN Character 7

Definition: This data element represents the seventh character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_7** **2005-2009**

PVIN_7 **2010-Later**

Attribute Codes**2005-Later**

- x Seventh Character in the VIN String

V108 VIN Character 8

Definition: This data element represents the eighth character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_8** **2005-2009**
PVIN_8 **2010-Later**

Attribute Codes

2005-Later

- Eighth Character in the VIN String

V109 VIN Character 9

Definition: This data element represents the ninth character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_9** **2005-2009**

PVIN_9 **2010-Later**

Attribute Codes

2005-Later

Ninth Character in the VIN String

V110 VIN Character 10

Definition: This data element represents the tenth character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_10** **2005-2009**
PVIN_10 **2010-Later**

Attribute Codes

2005-Later

x Tenth Character in the VIN String

V111 VIN Character 11

Definition: This data element represents the eleventh character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_11** **2005-2009**

PVIN_11 **2010-Later**

Attribute Codes**2005-Later**

- x Eleventh Character in the VIN String

V112 VIN Character 12

Definition: This data element represents the twelfth character in the VIN string for this vehicle.

Additional Information:

SAS Name: **VIN_12** *2005-2009*
PVIN_12 *2010-Later*

Attribute Codes

2005-Later

- Twelfth Character in the VIN String

V150 Fatalities in Vehicle

Definition: This derived data element records the number of fatalities that occurred in this vehicle and is derived by counting all persons with "Injury Severity" of 4 in the vehicle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **DEATHS** **2005-2009**
PDEATHS **2010-Later**

Attribute Codes***2005-Later***

0-99 Number of Fatalities that Occurred in the Vehicle.

Discontinued PARKWORK Data Elements

Axle (discontinued)

Definition: This data element counts the total number of axles on the vehicle (and converter dolly), including the trailing units (includes raised axles).

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: AXLES

Attribute Codes

2005-2007

0	Not Applicable, Not a Medium/Heavy Truck or Bus
2-97	Number of Axles
98	Medium/Heavy Truck or Bus, Number of Axles Unknown
99	Unknown if Light or Medium/Heavy Truck or Bus

Carburetion (discontinued)

Definition: This data element identifies the number of barrels for the engine of this vehicle or a code indicating that the engine is high-performance, fuel-injected, turbocharged, or electronically-controlled.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PCARBUR

Attribute Codes**2011-2012**

0-8	Actual Number of Barrels
A	1 Barrel, Lower HP
B	1 Barrel, Higher HP
C	1 Barrel, Turbo
D	1 Barrel, Turbo Low HP
E	1 Barrel, Turbo High HP
F	Number of Barrels Not Specified, Fuel injection
G	1 Barrel, Electronically controlled
H	Number of Barrels Not Specified, High performance
J	2 Barrels, Lower HP
K	2 Barrels, Higher HP
L	2 Barrels, Turbo
M	2 Barrels, Turbo Low HP
N	2 Barrels, Turbo High HP
P	2 Barrels, Electronically controlled
Q	Number of Barrels Not Specified, Electronically controlled
R	4 Barrels, Electronically controlled
S	4 Barrels, Lower HP
T	1, 2 or 4 Barrels, Turbo Fuel Injected
U	4 Barrels, Higher HP
V	4 Barrels, Turbo
W	4 Barrels, Turbo Low HP
X	4 Barrels, Turbo High HP
Y	Number of Barrels Not Specified, Turbo
Z	Number of Barrels Not Specified, Super Charged

Crash Avoidance Maneuver (discontinued)

Definition: This data element is collected to indicate if an avoidance maneuver was taken by the driver to avoid the crash.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: AVOID

Attribute Codes**2005-2009**

- 0 No Avoidance Maneuver Reported
- 1 Braking (*Skid Marks Evident*)
- 2 Braking (*No Skid Marks; Driver Stated*)
- 3 Braking (*Other Reported Evidence*)
- 4 Steering (*Evidence or Stated*)
- 5 Steering and Braking (*Evidence or Stated*)
- 6 Other Avoidance Maneuver
- 8 Not Reported / (*Inconclusive Since 1999, By Police*)

Commercial Motor Vehicle License Status (discontinued)

Definition: This data element indicates the status of the driver's Commercial Driver's License (CDL) if applicable.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **CDL_STAT**

Attribute Codes**2005-2009**

- 0 No Commercial Driver's License (*CDL*)
- 1 Suspended
- 2 Revoked
- 3 Expired
- 4 Cancelled or Denied
- 5 Disqualified
- 6 Valid
- 7 Learner's Permit
- 8 Other – Not Valid
- 9 Unknown CDL

Compliance with CDL Endorsements (discontinued)

Definition: This data element identifies whether the vehicle driven at the time of the crash required endorsement(s) on a Commercial Driver's License (CDL) and whether this driver was complying with the CDL endorsements.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: L_ENDORS

Attribute Codes**2005-2009**

- 0 No Endorsements Required For This Vehicle
- 1 Endorsement(s) Required, Complied With
- 2 Endorsement(s) Required, Not Complied With
- 3 Endorsement(s) Required, Compliance Unknown
- No Driver Present/Unknown if Driver Present
- Not Reported
- 9 Unknown, if Required

Compliance with License Restrictions (discontinued)

Definition: This data element indicates whether this driver was compliant with restrictions on their license.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: L_RESTRI

Attribute Codes**1975-2009**

- 0 No Restrictions or Not Applicable
- 1 Restrictions Complied With
- 2 Restrictions Not Complied With
- 3 Restrictions, Compliance Unknown
- 9 Unknown

Cubic Inch Displacement (discontinued)

Definition: This data element identifies the manufacturer's cubic inch displacement of the engine pistons for this vehicle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PDISPLACE

Attribute Codes**2011-2012**

xxx Actual Cubic Inch Displacement (*cid*)

Curb Weight (discontinued)

Definition: This data element identifies the base weight of the series for this vehicle. This is available for Passenger Type Vehicles only (VINTYPE='P').

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **VIN_WGT** **2005-2009**

PVIN_WGT **2010-2012**

Attribute Codes

2005-2012

0	Not Available
1-9998	Actual weight of Automobile (lbs)
9999	Value Not Coded

Driver Drinking (discontinued)

Definition: This data element records whether the driver was drinking and is derived from data elements in the Vehicle and Person data files.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: DR_DRINK

Attribute Codes**2005-2009**

- | | |
|---|-------------|
| 0 | No Drinking |
| 1 | Drinking |

Driver Height (discontinued)

Definition: This data element identifies this driver's height (in inches).

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: DR_HGT

Attribute Codes**2005-2009**

24-107	Actual Height in Inches
999	Unknown

Driver Presence (discontinued)

Definition: This data element identifies whether a driver was present in this vehicle at the onset of the unstabilized situation.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: DR_PRES

Attribute Codes

2005-

2008 2009

--	0	No Driver Present/Not Applicable
1	--	Driver Operated Vehicle
--	1	Yes
2	--	Driverless (<i>No Driver</i>)
3	--	Driver Left Scene
4	--	Motor Vehicle not In-Transport (<i>Parked/Stopped Off Roadway/ Working Motor Vehicle/In Motion Outside Trafficway, 2008 Only</i>)
4	--	Motor Vehicle not In-Transport (<i>Parked/Stopped Off Roadway/Working/ In Motion Outside Trafficway, 2005-2007</i>)
9	9	Unknown

Driver Weight (discontinued)

Definition: This data element identifies this driver's weight (in pounds).

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: DR_WGT

Attribute Codes**2005-2009**

40-700	Actual Weight in Pounds
998	Other
999	Unknown

Driver's License State (discontinued)

Definition: This element identifies the state of issue for the license held by this driver.

Additional Information:

SAS Name: L_STATE

Attribute Codes**2005-2009**

1 Alabama	30 Montana
2 Alaska	31 Nebraska
3 American Samoa	32 Nevada
4 Arizona	33 New Hampshire
5 Arkansas	34 New Jersey

Driver's Vision Obscured by (discontinued)

Definition: This data element records impediments to a driver's visual field that were noted in the case materials.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **D_VISION1, D_VISION2, D_VISION3**

Attribute Codes**2009**

- 0 No Obstruction Noted
- 1 Rain, Snow, Fog, Smoke, Sand, Dust
- 2 Reflected Glare, Bright Sunlight, Headlights
- 3 Curve, Hill, or Other Roadway Design Features
- 4 Building, Billboard, or Other Structure
- 5 Trees, Crops, Vegetation
- 6 In-Transport Motor Vehicle (*Including Load*)
- 7 Not-in-Transport Motor Vehicle (*Parked, Working*)
- 8 Splash or Spray of Passing Vehicle
- 9 Inadequate Defrost or Defog System
- 10 Inadequate Vehicle Lighting System
- 11 Obstructing Interior to the Vehicle
- 12 External Mirrors
- 13 Broken or Improperly Cleaned Windshield
- 14 Obstructing Angles on Vehicle
- 97 Vision Obscured – No Details
- 98 Other Visual Obstruction
- 99 Unknown

Driver's ZIP Code (discontinued)

Definition: This data element records the zip code of the driver's address as listed in the case material.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: DR_ZIP

Attribute Codes**2005-2009**

00000	Not a Resident of U. S. or Territories
xxxxx	Actual Zip Code, Five Numeric
99999	Unknown

Fuel Code (discontinued)

Definition: This data element identifies the fuel type for this vehicle determined by the manufacturer specification and recommendation.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **FLDCD_TR 2005-2009**
PFUECODE 2010-2012

G	G	Gas
H	H	Ethanol Fuel Only
M	M	Methanol Gas Only
N	N	Compressed Natural Gas
P	P	Propane
9	9	Unknown

Hazardous Cargo (discontinued)

Definition: This data element identifies the presence of hazardous cargo for this vehicle and records information about the hazardous cargo when present.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: HAZ_CARG

Attribute Codes**2005-2006**

- 0 No
- Yes
- 1 Yes, Placarded
- 2 Yes, Not Placarded
- 3 Yes, Unknown if Placarded
- 9 Unknown

Jackknife (discontinued)

Definition: This data element identifies whether this vehicle experienced a jackknife anytime during the unstabilized situation.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: J_KNIFE

Attribute Codes**2005-2009**

- 0 Not an Articulated Vehicle
- 1 No
- 2 Yes, First Event
- 3 Yes, Subsequent Event

License Compliance with Class of Vehicle (discontinued)

Definition: This data element identifies the type of license possessed or not possessed by this driver for the class of vehicle being driven at the time of the crash.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: L_COMPL

2005-2009

- 0 Not Licensed
- 1 No License Required for This Class Vehicle
- 2 No Valid License for This Class Vehicle
- 3 Valid License for This Class Vehicle
- 8 Unknown if CDL and/or CDL Endorsement Required for This Vehicle
- 9 Unknown

More Information on [Driver License Type Compliance](#)

Location of Rollover (discontinued)

Definition: This data element identifies the location of the trip point or start of this vehicle's roll.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: ROLINLOC

Attribute Codes**2009**

- 0 No Rollover
- 1 On Roadway
- 2 On Shoulder
- 3 On Median/Separator
- 4 In Gore
- 5 On Roadside
- 6 Outside of Trafficway
- 9 Unknown

Month of First Crash, Suspension or Conviction (discontinued)

Definition: This data element records the month of the first crash, suspension, or conviction for this driver that occurred within three years of the crash date.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: FIRST_MO

Attribute Codes**2005-2009**

Motorcycle Dry Weight (discontinued)

Definition: This data element identifies the dry weight of this motorcycle model.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **PMCYCL_WT**

Attribute Codes

2011-2012

xxxx Weight (lbs)

Motorcycle Engine Displacement (CC) (discontinued)

Definition: This data element identifies the piston bore measured in cubic centimeters for this motorcycle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: MCYCL_DS 2005-2009

PMCYCL_DS 2010-2012

Attribute Codes**2005-2012**

xxxx Actual Displacement (cc)

Non-CDL License Status (discontinued)

Definition: This data element identifies the status of the driver's license at the time of the crash.

Additional Information:

SAS Name: L_STATUS

Attribute Codes

2005-2009

- 0 Not Licensed
- 1 Suspended
- 2 Revoked
- 3 Expired
- 4 Cancelled or Denied
- 6 Valid License
- 9 Unknown License Status

Non-CDL License Type (discontinued)

Definition: This data element identifies the type of license held by this driver at the time of the crash.

Additional Information:

SAS Name: L_TYPE

Attribute Codes

2005-2009

- 0 Not Licensed
- 1 Full Driver License
- 2 Intermediate Driver License
- No Driver Present/Unknown if Driver Present
- 7 Learner's Permit
- 8 Temporary License
- 9 Unknown License Type

More Information on [Driver License Status/Type](#)

Number of Cylinders (discontinued)

Definition: This data element identifies the number of cylinders for the engine of this vehicle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PCYLINDER

Attribute Codes**2011-2012**

0-18 Number of Cylinders
R Rotary Engine

Number of Motorcycle Engine Cycles (discontinued)

Definition: This data element identifies the number of engine cycles for this motorcycle model.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **PMCYCL_CY**

Attribute Codes**2011-2012**

- | | |
|---|--------------------|
| 2 | Two-stroke engine |
| 4 | Four-stroke engine |
| R | Rotary engine |

Number of Wheels/Drive Wheels (discontinued)

Definition: This data element identifies the number of wheels/driving wheels for this truck (trucks only, VINTYPE='T'). The length of this data element is two digits; the first position represents the number of axles on the vehicle times two and the second position represents the number of drive axles times two.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PWHLDRWHL

Attribute Codes

2011-2012

xx Number of Wheels (*1st digit*) followed by the Number of Drive Wheels (*2nd digit*)

Original Tire Size (discontinued)

Definition: This data element identifies the manufacturer's original equipment specified tire size for the series of this vehicle. The length of this data element is six characters; the first two positions represent rim size and the remaining four positions represent tire size.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PTIRE_SZE

Attribute Codes**2011-2012**

xxxxxx 6-Character Tire Size

Previous DWI Convictions (discontinued)

Definition: This data element records any previous DWI convictions for this driver that occurred within three years of the crash date.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PREV_DWI

Attribute Codes**2005-2009**

0	None
1-97	Actual Value
99	Unknown

Previous Other Harmful Moving Violation Convictions (discontinued)

Definition: This data element records any other previous moving violations or convictions for this driver that occurred within three years of the crash date.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PREV_OTH

Attribute Codes**2005-2009**

0	None
1-97	Actual Value
99	Unknown

Previous Recorded Crashes (discontinued)

Definition: This data element records any previous crashes for this driver that occurred within three years of the crash date.

Additional Information See this data element in the Vehicle data file section for more information.

SAS Name: PREV_ACC

Attribute Codes**2005-2009**

0	None
1-97	Actual Value
98	Not Reported on Driving Record
99	Unknown

Previous Recorded Suspensions and Revocations (discontinued)

Definition: This data element records any previous license suspensions or revocations for this driver that occurred within three years of the crash date.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PREV_SUS

Attribute Codes**2005-2009**

0	None
1-97	Actual Value
99	Unknown

Previous Speeding Convictions (discontinued)

Definition: This data element records any previous speeding convictions for this driver that occurred within three years of the crash date.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PREV_SPD

Attribute Codes**2005-2009**

0	None
1-97	Actual Value
99	Unknown

Related Factors- Driver Level (discontinued)

Definition: This data element records factors related to this driver expressed by the investigating officer.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: DR_CF1, DR_CF2, DR_CF3, DR_CF4

Attribute Codes**2005-2009**

0 None

PHYSICAL/MENTAL CONDITION

- 1 Drowsy, Sleepy, Asleep, Fatigued
- 2 Ill, Passed Out/Blackout
- 3 Emotional (e.g., Depression, Angry, Disturbed)
- 4 Reaction to or Failure to Take Drugs/Medication
- 5 Under the Influence of Alcohol, Drugs, or Medication
- 6 Inattentive/Careless (*Talking, Eating, Car Phones, etc.*)
- 7 Restricted to Wheelchair
- 8 Road Rage/Aggressive Driving
- 9 Impaired Due to Previous Injury
- 11 Other Physical Impairment (*Includes Paraplegic*)
- 12 Mother of Dead Fetus/Mother of Infant Born Post Crash
- 13 Mentally Challenged
- 15 Seat Back Not in Normal Position, Seat Back Reclined

MISCELLANEOUS FACTORS

- 16 Police or Law Enforcement Officer
- 18 Traveling on Prohibited Trafficways
- 19 Legally Driving on Suspended or Revoked License
- 20 Leaving Vehicle Unattended with Engine Running; Leaving Vehicle Unattended in Roadway
- 21 Overloading or Improper Loading of Vehicle with Passenger or Cargo
- 22 Towing or Pushing Vehicle Improperly
- 23 Failing to Dim Lights or to Have Lights on When Required
- 24 Operating Without Required Equipment
- 25 Creating Unlawful Noise or Using Equipment Prohibited by Law
- 26 Following Improperly
- 27 Improper or Erratic Lane Changing
- 28 Failure to Keep in Proper Lane
- 29 Illegal Driving on Road Shoulder, in Ditch, or Sidewalk, or on Median
- 30 Making Improper Entry to or Exit from Trafficway
- 31 Starting or Backing Improperly
- 32 Opening Vehicle Closure into Moving Traffic or Vehicle is in Motion
- 33 Passing Where Prohibited by Posted Signs, Pavement Markings, Hill or Curve, or School Bus Displaying Warning Not to Pass

D24 Related Factors- Driver Level (continued)

Attribute Codes**2005-2009**

- 34 Passing on Wrong Side
- 35 Passing with Insufficient Distance or Inadequate Visibility or Failing to Yield to Overtaking Vehicle
- 36 Operating the Vehicle in an Erratic, Reckless, Careless or Negligent Manner or Operating at Erratic or Suddenly Changing Speeds
- 37 High-Speed Chase with Police in Pursuit (*See Police Pursuit Note*)
 - Police Pursuing this Driver or Police Officer in Pursuit
- 38 Failure to Yield Right of Way
- 39 Failure to Obey Actual Traffic Signs, Traffic Control Devices or Traffic Officers, Failure to Observe Safety Zone Traffic Laws
- 40 Passing Through or Around Barrier
- 41 Failure to Observe Warnings or Instructions on Vehicle Displaying Them
- 42 Failure to Signal Intentions
- 43 Driving too Fast for Conditions (*2008 Only*)
- 44 Driving too Fast for Conditions or in Excess of Posted Speed Limit (*2005-2007*)
- 44 Driving in Excess of Posted Speed Limit (*2008 Only*)
- 45 Driving Less Than Posted Maximum
- 46 Racing (*2005-2008*)
- 47 Making Right Turn from Left-Turn Lane or Making Left Turn from Right-Turn Lane
- 48 Making Improper Turn
- 50 Driving Wrong Way on One-Way Trafficway
- 51 Driving on Wrong Side of Road (*Intentionally or Unintentionally*)
- 52 Operator Inexperience
- 53 Unfamiliar With Roadway
- 54 Stopping in Roadway (*Vehicle Not Abandoned*)
- 55 Underriding a Parked Truck (*2005-2008*)
- 56 Improper Tire Pressure (*2005 Only*)
- 57 Locked Wheel
- 58 Over Correcting
- 59 Getting Off/Out of or On/In to Moving Vehicle

VISION OBSCURED BY

- 61 Rain, Snow, Fog, Smoke, Sand, Dust (*2005-2008*)
- 62 Reflected Glare, Bright Sunlight, Headlights (*2005-2008*)
- 63 Curve, Hill, or Other Design Features (*Including Traffic Signs, Embankment 2005-2008*)

D24 Related Factors- Driver Level (continued)

Attribute Codes**2005-2009****SPECIAL CIRCUMSTANCES**

- 73 Driver Has Not Complied with Learners Permit or Intermediate Driver License Restrictions (*GDL Restrictions*)
- 74 Driver Has Not Complied With Physical or Other Imposed Restrictions
- 75 Broken or Improperly Cleaned Windshield (2005-2008)
- 76 Other Obstruction (2005-2008)

SKIDDING, SWERVING, OR SLIDING DUE TO

- 77 Severe Crosswind
- 78 Wind from Passing Truck
- 79 Slippery or Loose Surface
- 80 Tire Blow-Out or Flat
- 81 Debris or Objects in Road
- 82 Ruts, Holes, Bumps in Road
- 83 Live Animals in Road
- 84 Vehicle in Road
- 85 Phantom Vehicle
- 86 Pedestrian, Pedalcyclist, or Other Non-Motorist in Road
- 87 Ice, Water, Snow, Slush, Sand, Dirt, Oil, Wet Leaves on Road
- 88 Trailer Fishtailing or Swaying

OTHER MISCELLANEOUS FACTORS

- 89 Carrying Hazardous Cargo Improperly (2005-2009)
- Driver has a Driving Record or Driver's License from More than One State
- 90 Hit-and-Run Vehicle Driver
- 91 Non-Traffic Violation Charged (*Manslaughter, Homicide or Other Assault Offense Committed Without Malice*)
- 92 Other Non-Moving Traffic Violation

POSSIBLE DISTRACTIONS INSIDE VEHICLE

- 93 Cellular Telephone
- 94 Cellular Telephone in Use in Vehicle
- 95 Computer Fax Machines/Printers
- 96 On-Board Navigation System
- 97 Two-Way Radio
- 98 Head-Up Display
- 99 Unknown

Rollover **(discontinued)**

Definition: This data element identifies this vehicle's involvement in a rollover or overturn during the crash. Rollover is defined as any vehicle rotation of 90 degrees or more about any true longitudinal or lateral axis. Rollover can occur at any time during the crash.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **ROLLOVER**

Attribute Codes

2005-

2008 2009

0	0	No Rollover
1	--	First Event
--	1	Rollover, Tripped by Object/Vehicle
2	--	Subsequent Event
--	2	Rollover, Untripped
--	9	Rollover, Unknown Type

Sequence of Events (discontinued)

Definition: The events in sequence related to this motor vehicle, regardless of injury and/or property damage. Events for the vehicle are recorded in the order in which they occur, time-wise, from the PAR narrative and diagram.

Additional Information: See this data element in the Vehicle data file section for more information..

SAS Name: SEQ1, SEQ2, SEQ3, SEQ4, SEQ5, SEQ6

Attribute Codes**2005-2009**

- 1 Rollover/Overtur
- 2 Fire/Explosion
- 3 Immersion
- 4 Gas Inhalation
- 5 Fell/Jumped from Vehicle
- 6 Injured in Vehicle
- 7 Other Non-Collision
- 8 Pedestrian
- 9 Pedalcycle
- 10 Railway Train
- 11 Animal
- 12 Motor Vehicle in Transport on Same Roadway
- 13 Motor Vehicle in Transport on Other Roadway
- 14 Parked Motor Vehicle
- 15 Non-Motorist on Personal Conveyance
- 16 Thrown or Falling Object
- 17 Boulder
- 18 Other Object (*Not Fixed*)
- 19 Building
- 20 Impact Attenuator/Crash Cushion
- 21 Bridge Pier or Abutment
- 22 Bridge Parapet End
- 23 Bridge Rail
- 24 Guardrail Face
- 25 Concrete Traffic Barrier
- 26 Other Traffic Barrier
- 27 Highway/Traffic Sign Post
- 28 Overhead Sign Support/Sign
- 29 Luminary/Light Support
- 30 Utility Pole
- 31 Other Post, Other Pole, or Other Support
- 32 Culvert

Speeding Related (discontinued)

Definition: This data element records whether the driver's speed was related to the crash as indicated by law enforcement.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: SPEEDREL

Attribute Codes**2009**

- | | |
|---|---------|
| 0 | No |
| 1 | Yes |
| 9 | Unknown |

More Information on [Speeding](#)

Travel Speed (discontinued)

Definition: This data element records the speed the vehicle was traveling prior to the occurrence of the crash as reported by the investigating officer.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: TRAV_SP

Attribute Codes

2005-		
2008	2009	
0	0	Stopped Motor Vehicle in Transport
1-96	1-151	Reported Speed Up to 151 mph
97	--	Speed Greater than 96 mph
--	997	Speed Greater than 151 mph
98	998	Not Reported
99	999	Unknown

Truck Ton Rating (discontinued)

Definition: This data element identifies the payload capacity of this vehicle based on manufacturer's specifications. The length of this data element is two characters. A single code indicates a single capacity rating. Two codes indicate a range of capacity rating. For example, a Ford F150 pickup truck with a payload capacity from $\frac{1}{2}$ to $\frac{3}{4}$ tons would have a rating of "BC."

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PTON_RAT

R	10 and Over

Truck Shipping Weight (discontinued)

Definition: This data element identifies the shipping weight for the shortest wheel base of this truck model.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PTRK_WT

Attribute Codes**2011-2012**

xxxxx Actual Shipping Weight (*lbs*)

Truck Shipping Weight Variance (discontinued)

Definition: This data element identifies the difference (coded in 100 pound increments) between the shipping weights of the shortest wheel base and the longest wheel base for this truck model. (e.g., a 200 lb. difference appears as "02".) Incremental weights for optional equipment are not included.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PTRKWTVAR

Attribute Codes**2011-2012**

xx Shipping Weight Variance (100 lbs)

Truck VIN Restraint Type (discontinued)

Definition: This data element identifies restraint type information for this truck. This includes information about vehicle seat belts and air bags.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: PVIN_REST

Attribute Codes**2011-2012**

- A Active (*Manual*) belts
- B Driver front air bag/passenger side belt unknown

Violations Charged (discontinued)

Definition: This data element identifies violations charged to this driver in this crash.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **VIOLCHG1, VIOLCHG2, VIOLCHG3**

Attribute Codes

2005-2009

0 None

RECKLESS/CARELESS/HIT-AND-RUN OFFENSES

- 1 Manslaughter or Homicide
- 2 Willful Reckless Driving; Driving to Endanger; Negligent Driving
- 3 Unsafe Reckless (*Not Willful, Wanton Reckless*) Driving
- 4 Inattentive, Careless, Improper Driving
- 5 Fleeing or Eluding Police
- 6 Fail to Obey Police, Fireman, Authorized Person Directing Traffic
- 7 Hit-and-Run, Fail to Stop After Crash
- 8 Fail to Give Aid, Information, Wait for Police after Crash
- 9 Serious Violation Resulting in Death

IMPAIRMENT OFFENSES

- 11 Driving While Intoxicated (*Alcohol or Drugs*) or BAC above Limit (*Any Detectable BAC for CDLs*)
- 12 Driving While Impaired; Driving Under Influence of Substance Not Intended to Intoxicate
- 13 Driving under Influence of Substance not intended to intoxicate
- 14 Drinking While Operating
- 15 Illegal Possession of Alcohol or Drugs
- 16 Driving With Detectable Alcohol
- 18 Refusal to Submit to Chemical Test
- 19 Alcohol, Drug, or Impairment Violations Generally

SPEED-RELATED OFFENSES

- 21 Racing
- 22 Speeding (*Above the Speed Limit*)
- 23 Speed Greater Than Reasonable and Prudent (*Not Necessarily Over the Limit*)
- 24 Exceeding Special Speed Limit (*e.g., for Trucks, Buses, Cycles, or on Bridge, in School Zone, etc.*)
- 25 Energy Speed (*Exceeding 55 mph, Non-Pointable*)
- 26 Driving Too Slowly
- 29 Speed-Related Violations Generally

Violations Charged (continued)

2005-2009**RULES OF THE ROAD – TRAFFIC SIGN & SIGNALS**

- 31 Fail to Stop for Red Signal
- 32 Fail to Stop for Flashing Red
- 33 Violation of Turn on Red (*Fail to Stop & Yield, Yield to Pedestrians before Turning*)
- 34 Fail to Obey Flashing Signal (*Yellow or Red*)
- 35 Fail to Obey Signal Generally
- 36 Violate RR Grade Crossing Device/Regulations
- 37 Fail to Obey Stop Sign
- 38 Fail to Obey Yield Sign
- 39 Fail to Obey Traffic Control Device Generally

RULES OF THE ROAD – TURNING, YIELDING, SIGNALING

- 41 Turn in Violation of Traffic Control (*Disobey Signs, Turn Arrow Or Pavement Markings; This Is Not A Right-On-Red Violation*)
- 42 Improper Method & Position of Turn (*Too Wide, Wrong Lane*)
- 43 Fail to Signal for Turn or Stop
- 45 Fail to Yield to Emergency Vehicle
- 46 Fail to Yield Generally
- 48 Enter Intersection When Space Insufficient
- 49 Turn, Yield, Signaling Violations Generally

RULES OF THE ROAD – WRONG SIDE, PASSING & FOLLOWING

- 51 Driving Wrong Way on One-Way Road
- 52 Driving on Left, Wrong Side of Road Generally
- 53 Improper, Unsafe Passing
- 54 Pass on Right (*Drive off Pavement to Pass*)
- 55 Pass Stopped School Bus
- 56 Fail to Give Way When Overtaken
- 58 Following Too Closely
- 59 Wrong Side, Passing, Following Violations Generally

RULES OF THE ROAD – LANE USAGE

- 61 Unsafe or Prohibited Lane Change
- 62 Improper Use of Lane (*Enter of 3-Lane Road, HOV Designated Lane*)
- 63 Certain Traffic to Use Right Lane (*Trucks, Slow Moving, etc.*)
- 66 Motorcycle Lane Violations (*More than two per Lane, Riding Between Lanes, etc.*)
- 67 Motorcyclist Attached to another Vehicle
- 69 Lane Violations Generally

NON-MOVING – LICENSE & REGISTRATION VIOLATIONS

- 71 Driving While License Withdrawn
- 72 Other Driver License Violations
- 73 Commercial Driver Violations
- 74 Vehicle Registration Violations
- 75 Fail to Carry Insurance Card
- 76 Driving Uninsured Vehicle
- 79 Non-Moving Violations Generally

Violations Charged (continued)

2005-2009**EQUIPMENT**

- 81 Lamp Violations
- 82 Brake Violations
- 83 Failure to Require Restraint Use (*By Self or Passenger*)
- 84 Motorcycle Equipment Violations (*Helmet, Special Equipment*)
- 85 Violation of Hazardous Cargo Regulations
- 86 Size, Weight, Load Violations
- 89 Equipment Violations Generally

OTHER VIOLATIONS

- 91 Parking
- 92 Theft, Unauthorized Use of Motor Vehicle
- 93 Driving Where Prohibited (*Sidewalk, Limited Access, Off Truck Route*)
- 98 Other Moving Violation
- 99 Unknown Violation

Wheelbase Long (discontinued)

Definition: This data element identifies the longest wheelbase respectively for the manufactured model of this vehicle.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: **WHLBS_LG 2005-2009**

PWHLBS_LG 2010-2012

Year of First Crash, Suspension or Conviction (discontinued)

Definition: This data element records the year of the first crash, suspension, or conviction for this driver that occurred within three years of the crash date.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: FIRST_YR

Attribute Codes**2005-2009**

0	No Record
xxxx	Actual Year
9999	Unknown

Year of Last Crash, Suspension or Conviction (discontinued)

Definition: This data element records the year of the last crash, suspension, or conviction for this driver that occurred within three years of the crash date.

Additional Information: See this data element in the Vehicle data file section for more information.

SAS Name: LAST_YR

Attribute Codes**2005-2009**

0	No Record
xxxx	Actual Year
9999	Unknown

The PBTYPE Data File

The Pbtype data file includes data on pedestrians, bicyclists, and people on personal conveyances. It contains the data elements ST_CASE, STATE, VEH_NO, and PER_NO, which are described in the beginning of the Data Element Definitions and Codes section. The Pbtype data file also contains the data elements on the following pages.

ST_CASE, VEH_NO and PER_NO are the unique identifiers. ST_CASE should be used to merge the Pbtype data file with the Accident data file.

P5/NM5 Age

Definition: This data element identifies the person's age, in years, with respect to the person's last birthday.

Additional Information:

SAS Name: **PBAGE**

Attribute Codes***2014-Later***

0	Less than One Year
1-120	Age of the Individual in Years
998	Not Reported
999	Unknown

P6/NM6 Sex

Definition: This data element identifies the sex of the person involved in the crash

Additional Information:

SAS Name: PBSEX

Attribute Codes

2014-Later

- 1 Male
- 2 Female
- 8 Not Reported
- 9 Unknown

P7/NM7 Person Type

Definition: This data element describes the role of this person involved in the crash.

Additional Information:

SAS Name: PBPTYPE

Attribute Codes***2014-Later***

- 5 Pedestrian
- 6 Bicyclist
- 7 Other Cyclist
- 8 Person on Personal Conveyances

NM9-PB27 Marked Crosswalk Present

Definition: This data element indicates if a marked crosswalk was present at the crash site.

Additional Information: This data element is applicable to both pedestrians and bicyclists.

SAS Name: **PBCWALK**

Attribute Codes***2014-Later***

- | | |
|---|------------|
| 0 | None Noted |
| 1 | Yes |
| 9 | Unknown |

NM9-PB28 Sidewalk Present

Definition: This data element indicates if a sidewalk was present at the crash site.

Additional Information: This data element is applicable to both pedestrians and bicyclists.

SAS Name: PBSWALK

Attribute Codes***2014-Later***

- | | |
|---|------------|
| 0 | None Noted |
| 1 | Yes |
| 9 | Unknown |

NM9-PB29 School Zone

Definition: This data element indicates if the crash occurred in a school zone.

Additional Information: This data element is applicable to both pedestrians and bicyclists.

SAS Name: PBSZONE

Attribute Codes***2014-Later***

- | | |
|---|------------|
| 0 | None Noted |
| 1 | Yes |
| 9 | Unknown |

NM9-PB30 Crash Type – Pedestrian

Definition: This data element summarizes the circumstances of the crash for this pedestrian.

Additional Information: This data element is applicable to pedestrians only.

SAS Name: **PEDCTYPE**

NM9-PB31 Crash Location – Pedestrian

Definition: This data element identifies where the pedestrian crash occurred with respect to an intersection.

Additional Information: This data element is applicable to pedestrians only.

SAS Name: **PEDLOC**

Attribute Codes**2014-Later**

- 1 At Intersection
- 2 Intersection-Related
- 3 Not At Intersection
- 4 Non-Trafficway Location
- 7 Not a Pedestrian
- 9 Unknown/Insufficient Information

NM9-PB31B Crash Location – Bicycle

Definition: This data element identifies where the bicyclist crash occurred with respect to an intersection.

Additional Information: This data element is applicable to bicyclists only.

SAS Name: BIKELOC

Attribute Codes**2014-Later**

- 1 At Intersection
- 2 Intersection-Related
- 3 Not At Intersection
- 4 Non-Trafficway Location
- 7 Not a Cyclist
- 9 Unknown/Insufficient Information

NM9-PB32 Pedestrian Position

Definition: This data element identifies the position/location of the pedestrian with respect to the trafficway when contacted.

Additional Information: This data element is applicable to pedestrians only.

SAS Name: **PEDPOS**

Attribute Codes**2014-Later**

- 1 Intersection Area
- 2 Crosswalk Area
- 3 Travel Lane
- 4 Paved Shoulder/Bicycle Lane/Parking Lane
- 5 Sidewalk/Shared-Use Path/Driveway Access
- 6 Unpaved Right-of-Way
- 7 Non-Trafficway – Driveway
- 8 Non-Trafficway – Parking Lot/Other
- 9 Other/Unknown
- 77 Not a Pedestrian

NM9-PB32B Bicyclist Position

Definition: This data element identifies the position/location of the bicyclist with respect to the trafficway when contacted.

Additional Information: This data element is applicable to bicyclists only.

SAS Name: BIKEPOS

Attribute Codes**2014-Later**

- 1 Travel Lane
- 2 Bicycle Lane/Paved Shoulder/Parking Lane
- 3 Sidewalk/Crosswalk/Driveway Access
- 4 Shared-Use Path
- 5 Non-Trafficway – Driveway
- 6 Non-Trafficway – Parking Lot/Other
- 7 Not a Cyclist
- 8 Other
- 9 Unknown

NM9-PB33 Pedestrian Initial Direction of Travel

Definition: This data element identifies the initial direction of travel of the pedestrian prior to being contacted in the crash.

Additional Information: This data element is applicable to pedestrians only.

SAS Name: **PEDDIR**

Attribute Codes**2014-Later**

- 1 Northbound
- 2 Eastbound
- 3 Southbound
- 4 Westbound
- 7 Not a Pedestrian
- 8 Not Applicable
- 9 Unknown Initial Direction of Travel

NM9-PB33B Bicyclist Initial Direction of Travel

Definition: This data element identifies the initial travel direction of the bicyclist with respect to the flow of traffic prior to being contacted in the crash.

Additional Information: This data element is applicable to bicyclists only.

SAS Name: BIKEDIR

Attribute Codes***2014-Later***

- 1 With Traffic
- 2 Facing Traffic
- 3 Not Applicable
- 7 Not a Cyclist
- 9 Unknown

NM9-PB34 Motorist Initial Direction of Travel

Definition: This data element identifies the initial direction of travel of the motorist prior to being involved in a pedestrian crash.

Additional Information: This data element is applicable to pedestrians only.

SAS Name: MOTDIR

Attribute Codes**2014-Later**

- 1 Northbound
- 2 Eastbound
- 3 Southbound
- 4 Westbound
- 7 Not a Pedestrian
- 8 Not Applicable
- 9 Unknown Initial Direction of Travel

NM9-PB35 Motorist Maneuver

Definition: This data element identifies if the motorist was engaged in a turning maneuver at an intersection prior to being involved in a pedestrian crash. The data element indicates the maneuver being made by the motorist at the time of a pedestrian collision.

Additional Information: This data element is applicable to pedestrians only.

SAS Name: MOTMAN

Attribute Codes***2014-Later***

- 1 Left Turn
- 2 Right Turn
- 3 Straight Through
- 7 Not a Pedestrian
- 8 Not Applicable
- 9 Unknown Motorist Maneuver

NM9-PB36 Intersection Leg

Definition: The data element identifies the leg of the intersection where the pedestrian crash occurred.

Additional Information: This data element is applicable to pedestrians only.

SAS Name: PEDLEG

Attribute Codes

2014- 2016-

2015 Later

1	1	Nearside
2	2	Farside

9	--	Unknown
--	9	Unknown/None of the Above

NM9-PB37 Pedestrian Scenario

Definition: This data element identifies the location and travel directions of the motorist and pedestrian for those crashes that occur at intersections. This data element summarizes the movements of the pedestrian and motorist in an intersection area.

Additional Information: This data element is applicable to pedestrians only.

SAS Name: PEDSNR

Attribute Codes

2014-Later

MOTORIST TRAVELING STRAIGHT THROUGH – CRASH OCCURRED ON NEAR (APPROACH) SIDE OF INTERSECTION

- 1a Pedestrian Within Crosswalk Area, Traveled From Motorist's Left.
- 1b Pedestrian Within Crosswalk Area, Traveled From Motorist's Right.
- 1c Pedestrian Within Crosswalk Area, Approach Direction Unknown.
- 2a Pedestrian Outside Crosswalk Area, Traveled From Motorist's Left.
- 2b Pedestrian Outside Crosswalk Area, Traveled From Motorist's Right.
- 2c Pedestrian Outside Crosswalk Area, Approach Direction Unknown.

MOTORIST TRAVELING STRAIGHT THROUGH – CRASH OCCURRED ON FAR SIDE OF INTERSECTION

- 3a Pedestrian Within Crosswalk Area, Traveled From Motorist's Left.
- 3b Pedestrian Within Crosswalk Area, Traveled From Motorist's Right.
- 3c Pedestrian Within Crosswalk Area, Approach Direction Unknown.
- 4a Pedestrian Outside Crosswalk Area, Traveled From Motorist's Left.
- 4b Pedestrian Outside Crosswalk Area, Traveled From Motorist's Right.
- 4c Pedestrian Outside Crosswalk Area, Approach Direction Unknown.

MOTORIST TURNING RIGHT – CRASH OCCURRED ON NEAR (APPROACH) SIDE OF INTERSECTION

- 5a Pedestrian Within Crosswalk Area, Traveled From Motorist's Left.
- 5b Pedestrian Within Crosswalk Area, Traveled From Motorist's Right.
- 5c Pedestrian Within Crosswalk Area, Approach Direction Unknown.
- 6a Pedestrian Outside Crosswalk Area, Traveled From Motorist's Left.
- 6b Pedestrian Outside Crosswalk Area, Traveled From Motorist's Right.
- 6c Pedestrian Outside Crosswalk Area, Approach Direction Unknown.

MOTORIST TURNING RIGHT – CRASH OCCURRED ON FAR SIDE OF INTERSECTION

- 7a Pedestrian Within Crosswalk Area, Approach Direction Same as Motorist's.
- 7b Pedestrian Within Crosswalk Area, Approach Direction Opposite Motorist's.
- 7c Pedestrian Within Crosswalk Area, Approach Direction Unknown.
- 8a Pedestrian Outside Crosswalk Area, Approach Direction Same as Motorist's.
- 8b Pedestrian Outside Crosswalk Area, Approach Direction Opposite Motorist's.
- 8c Pedestrian Outside Crosswalk Area, Approach Direction Unknown.

NM9-PB37 Pedestrian Scenario (continued)

Attribute Codes**2014-Later****MOTORIST TURNING LEFT – CRASH OCCURRED ON NEAR (APPROACH) SIDE OF INTERSECTION**

- 9a Pedestrian Within Crosswalk Area, Traveled From Motorist's Left.

The CEVENT Data File

The Cevent data file includes harmful and non-harmful events in the crash. It contains the data elements ST_CASE, STATE, and EVENTNUM, which are described in the beginning of the Data Element Definitions and Codes section. The Cevent data file also contains the data elements on the following pages.

ST_CASE and EVENTNUM are the unique identifiers for each record. ST_CASE should be used to merge the Cevent data file with the Accident data file.

C18A Vehicle Number (This Vehicle)

Definition: This data element identifies the “Vehicle Number” (VEH_NO) of this in-transport motor vehicle described in this event.

Additional Information: This is the vehicle described in “Sequence of Events” for this event.

Prior to 2015, this data element’s Locator Code or Data Element Number was C17.

SAS Name: VNUMBER1

Attribute Codes***2010-Later***

1-999 Vehicle Number

C18B Area of Impact (This Vehicle)

Definition: This data element identifies the impact point, if any, on this in-transport motor vehicle that produced property damage or personal injury in this event.

Additional Information: This is the impact area of the vehicle recorded in "Vehicle Number (This Vehicle)" and described in "Sequence of Events."

Prior to 2015, this data element's Locator Code or Data Element Number was C17.

SAS Name: AOI1

V32 Sequence of Events

Definition: This data element describes this event. A motor vehicle traffic crash is a series of events resulting from an unstabilized situation. This series of harmful and non-harmful events is recorded in chronological order based on the PAR narrative and diagram.

Additional Information: From 2004 to 2009, Sequence of Events was collected at the vehicle level and up to six events (SEQ1-SEQ6) were stored in the Vehicle data file. Prior to 2016, this data element's Locator Code or Data Element Number was V31.

"First Harmful Event," "Most Harmful Event," and the "Sequence of Events" data elements have the same harmful event attributes. The harmful event attributes were modified to be consistent. "Sequence of Events" also has non-harmful event attributes.

C18C Vehicle Number (Other Vehicle)

Definition: This data element identifies the “Vehicle Number” (VEH_NO) of the other motor vehicle, if any, in this event.

Additional Information: This is the vehicle contacted by the motor vehicle in-transport recorded in “Vehicle Number (This Vehicle).” Another vehicle must have been involved in this event for this data element to be a valid vehicle number (i.e., “Sequence of Events” for this event must be 12, 14, 45, 54, or 55).

Prior to 2015, this data element’s Locator Code or Data Element Number was C17.

SAS Name: **VNUMBER2**

Attribute Codes**2010-Later**

1-999	Vehicle Number
5555	Non-Harmful Event
9999	Not a Motor Vehicle

C18D Area of Impact (Other Vehicle)

Definition: This data element identifies the impact point on the other motor vehicle, if any, in this event.

Additional Information: This is the impact area of the vehicle recorded in "Vehicle Number (Other Vehicle)." Another vehicle must have been involved in this event for this data element to be a valid impact location (i.e., "Sequence of Events" for this event must be 12, 14, 45, 54, or 55).

Prior to 2015, this data element's Locator Code or Data Element Number was C17.

The VEVENT Data File

The Vevent data file includes harmful and non-harmful events for each in-transport motor vehicle. It contains the data elements ST_CASE, STATE, VEH_NO, EVENTNUM, and VEVENTNUM, which are described in the beginning of the Data Element Definitions and Codes section. The Vevent data file also contains the data elements on the following pages.

ST_CASE, VEH_NO, and VEVENTNUM are the unique identifiers for each record. ST_CASE and VEH_NO should be used to merge the Vevent data file with the Vehicle data file.

C18A Vehicle Number (This Vehicle)

Definition: This data element identifies the “Vehicle Number” (VEH_NO) of this in-transport motor vehicle described in this event.

Additional Information: This is the vehicle described in “Sequence of Events” for this event.

If Vehicle #1 (V1) impacts Vehicle #2 (V2), then we have at least 2 Vevent records.

Example:

<u>VEH_NO</u>	<u>EVENTNUM</u>	<u>VNUMBER1</u>	<u>SOE</u>	<u>VNUMBER2</u>
1	1	1	12	2
2	1	1	12	2

The explanation of these 2 records is as follows:

V1 was involved in event 1 where V1 impacts V2

V2 was involved in event 1 where V1 impacts V2

Prior to 2015, this data element’s Locator Code or Data Element Number was C17.

SAS Name: **VNUMBER1**

Attribute Codes**2010-Later**

1-999 Vehicle Number

C18B Area of Impact (This Vehicle)

Definition: This data element identifies the impact point, if any, on this in-transport motor vehicle that produced property damage or personal injury in this event.

Additional Information: This is the impact area of the vehicle recorded in "Vehicle Number (This Vehicle)" and described in "Sequence of Events."

Prior to 2015, this data element's Locator Code or Data Element Number was C17.

C18C Vehicle Number (Other Vehicle)

Definition: This data element identifies the “Vehicle Number” (VEH_NO) of the other motor vehicle, if any, in this event.

Additional Information: This is the vehicle contacted by the motor vehicle in-transport recorded in “Vehicle Number (This Vehicle).” Another vehicle must have been involved in this event for this data element to be a valid vehicle number (i.e., “Sequence of Events” for this event must be 12, 14, 45, 54, or 55).

Prior to 2015, this data element’s Locator Code or Data Element Number was C17.

SAS Name: **VNUMBER2**

Attribute Codes**2010-Later**

1-999	Vehicle Number
5555	Non-Harmful Event
9999	Not a Motor Vehicle

C18C Area of Impact (Other Vehicle)

Definition: This data element identifies the impact point on the other motor vehicle, if any, in this event.

Additional Information: This is the impact area of the vehicle recorded in "Vehicle Number (Other Vehicle)." Another vehicle must have been involved in this event for this data element to be a valid impact location (i.e., "Sequence of Events" for this event must be 12, 14, 45, 54, or 55).

Prior to 2015, this data element's Locator Code or Data Element Number was C17.

SAS Name: **AOI2**

The VSOE Data File

The Vsoe data file includes harmful and non-harmful events for each in-transport motor vehicle. It contains the data elements ST_CASE, STATE, VEVENTNUM, and VEH_NO, which are described in the beginning of the Data Element Definitions and Codes section. The Vsoe data file also contains the data elements on the following pages.

ST_CASE, VEH_NO, and VEVENTNUM are the unique identifiers for each record. ST_CASE and VEH_NO should be used to merge the Vsoe data file with the Vehicle data file.

C18A Area of Impact Associated with the Event

Definition: This data element identifies the impact point, if any, on this in-transport motor vehicle that produced property damage or personal injury in this event.

Additional Information: This is the impact area of the vehicle recorded in "Vehicle Number (This Vehicle)" and described in "Sequence of Events."

Prior to 2015, this data element's Locator Code or Data Element Number was C17.

V32 Sequence of Events

Definition: This data element describes this event. A motor vehicle traffic crash is a series of events resulting from an unstabilized situation. This series of harmful and non-harmful events is recorded in chronological order based on the PAR narrative and diagram.

Additional Information: From 2004 to 2009, Sequence of Events was collected at the vehicle level and up to six events (SEQ1-SEQ6) were stored in the Vehicle data file. Prior to 2016, this data element's Locator Code or Data Element Number was V31.

"First Harmful Event," "Most Harmful Event," and the "Sequence of Events" data elements have the same harmful event attributes. The harmful event attributes were modified to be consistent. "Sequence of Events" also has non-harmful event attributes.

The DAMAGE Data File

The Damage data file identifies each area of damage (as a separate record). It contains the data elements ST_CASE, STATE, and VEH_NO, which are described in the beginning of the Data Element Definitions and Codes section. The Damage data file also contains the data elements on the following pages.

ST_CASE and VEH_NO are the unique identifiers for each record. ST_CASE and VEH_NO should be used to merge the Damage data file with vehicles from the Vehicle data file.

V29B Damaged Areas

Definition: This data element identifies all the areas on this vehicle that were damaged in the crash as reflected in the case materials.

Additional Information: Prior to 2016, this data element's Locator Code or Data Element Number was V28B.

SAS Name: MDAREAS

The DISTRACKT Data File

The Distrackt data file identifies each driver distraction (as a separate record). It contains the data elements ST_CASE, STATE, and VEH_NO, which are described in the beginning of the Data Element Definitions and Codes section. The data file also contains MDRDSTRD which is described below.

ST_CASE, VEH_NO, and MDRDSTRD are the unique identifiers for each record. ST_CASE and VEH_NO should be used to merge the Distrackt data file with drivers from the Vehicle data file.

PC16 Driver Distracted By

Definition: This data element identifies the attribute(s) which best describe this driver's attention to driving prior to the driver's realization of an impending critical event or just prior to impact if realization of an impending critical event does not occur.

Additional Information: Distraction from the primary task of driving occurs when drivers divert their attention from the driving task to some other activity. Also, driving while daydreaming or lost in thought is identified as distracted driving by NHTSA. Physical conditions/impairments (fatigue, alcohol, medical condition, etc.) or psychological states (anger, emotional, depressed, etc.) are not identified as distractions by NHTSA.

Although the attribute 1 (Looked But Did Not See) is included in this element, this attribute is not considered a distraction and therefore should not be included in any distraction analysis.

SAS Name: MDRDSTRD

Attribute Codes

The DRIMPAIR Data File

The Drimpair data file identifies each driver impairment (as a separate record). It contains the data elements ST_CASE, STATE, and VEH_NO, which are described in the beginning of the Data Element Definitions and Codes section. The data file also contains DRIMPAIR which is described below.

ST_CASE, VEH_NO, and DRIMPAIR are the unique identifiers for each record. ST_CASE and VEH_NO should be used to merge the Drimpair data file with drivers from the Vehicle data file.

D23 Condition (Impairment) at Time of Crash- Driver

Definition: This data element identifies physical impairments to this driver that may have contributed to the crash as identified by law enforcement.

Additional Information: This data element attempts to identify physical impairments to this driver which may have contributed to the cause of the crash. These impairments can appear anywhere in the case materials--in the narrative section, in the violations section, in a column entitled "Contributing Factors" or "Driver Action," etc.

Some information that had been collected under "Related Factors- Driver Level" is now captured under this new data element.

The FACTOR Data File

The Factor data file identifies each vehicle factor (as a separate record). It contains the data elements ST_CASE, STATE, and VEH_NO, which are described in the beginning of the Data Element Definitions and Codes section. The data file also contains MFACTOR which is described below.

ST_CASE, VEH_NO, and MFACTOR are the unique identifiers for each record. ST_CASE and VEH_NO should be used to merge the Factor data file with the Vehicle data file.

PC4 Contributing Circumstances, Motor Vehicle

Definition: This data element describes this vehicle's possible pre-existing defects or maintenance conditions that may have contributed to the crash.

Additional Information: Most of these data elements can be found in Related Factor- Vehicle Level (SAS names VEH_CF1 and VEH_CF2 in the Vehicle data file in 2009 and prior, and VEH_SC1-VEH_SC2 in 2010).

SAS Name: MFACTOR

- 7 Hit-and-Run, Fail to Stop After Crash
- 8 Fail to Give Aid, Information, Wait for Police after Crash
- 9 Serious Violation Resulting in Death
- 10 Use of Telecommunications Device (*Since 2015*)

IMPAIRMENT OFFENSES

- 11 Driving While Intoxicated (*Alcohol or Drugs*) or BAC above Limit (*Any Detectable BAC for CDLs*)
- 12 Driving While Impaired
- 13 Driving under Influence of Substance not intended to intoxicate
- 14 Drinking While Operating
- 15 Illegal Possession of Alcohol or Drugs
- 16 Driving With Detectable Alcohol
- 18 Refusal to Submit to Chemical Test
- 19 Alcohol, Drug, or Impairment Violations Generally

SPEED-RELATED OFFENSES

- 21 Racing
- 22 Speeding (*Above the Speed Limit*)
- 23 Speed Greater Than Reasonable and Prudent (*Not Necessarily Over the Limit*)
- 24 Exceeding Special Speed Limit (*e.g., for Trucks, Buses, Cycles, or on Bridge, in School Zone, etc.*)
- 25 Energy Speed (*Exceeding 55 mph, Non-Pointable*)
- 26 Driving Too Slowly
- 29 Speed-Related Violations Generally

RULES OF THE ROAD – TRAFFIC SIGN & SIGNALS

- 31 Fail to Stop for Red Signal
- 32 Fail to Stop for Flashing Red
- 33 Violation of Turn on Red (*Fail to Stop & Yield, Yield to Pedestrians before Turning*)

D21 Violations Charged (continued)

2010-Later

- 34 Fail to Obey Flashing Signal (*Yellow or Red*)
- 35 Fail to Obey Signal Generally
- 36 Violate RR Grade Crossing Device/Regulations
- 37 Fail to Obey Stop Sign
- 38 Fail to Obey Yield Sign
- 39 Fail to Obey Traffic Control Device Generally

RULES OF THE ROAD – TURNING, YIELDING, SIGNALING

- 41 Turn in Violation of Traffic Control (*Disobey Signs, Turn Arrow or Pavement Markings; this is not a Right-on-Red violation*)
- 42 Improper Method & Position of Turn (*Too Wide, Wrong Lane*)
- 43 Fail to Signal for Turn or Stop
- 45 Fail to Yield to Emergency Vehicle
- 46 Fail to Yield Generally
- 48 Enter Intersection When Space Insufficient
- 49 Turn, Yield, Signaling Violations Generally

RULES OF THE ROAD – WRONG SIDE, PASSING & FOLLOWING

- 51 Driving Wrong Way on One-Way Road
- 52 Driving on Left, Wrong Side of Road Generally
- 53 Improper, Unsafe Passing
- 54 Pass on Right (*Drive off Pavement to Pass*)
- 55 Pass Stopped School Bus
- 56 Fail to Give Way When Overtaken
- 58 Following Too Closely
- 59 Wrong Side, Passing, Following Violations Generally

RULES OF THE ROAD – LANE USAGE

- 61 Unsafe or Prohibited Lane Change
- 62 Improper Use of Lane (*Enter of 3-Lane Road, HOV Designated Lane*)
- 63 Certain Traffic to Use Right Lane (*Trucks, Slow Moving, etc.*)
- 66 Motorcycle Lane Violations (*More than two per Lane, Riding Between Lanes, etc.*)
- 67 Motorcyclist Attached to another Vehicle
- 69 Lane Violations Generally

NON-MOVING – LICENSE & REGISTRATION VIOLATIONS

- 71 Driving While License Withdrawn (*Including Violation of Provisions of Work Permit (2010-2013)*)
- 71 Driving While License Withdrawn (*Since 2014*)
- 72 Other Driver License Violations
- 73 Commercial Driver Violations
- 74 Vehicle Registration Violations
- 75 Fail to Carry Insurance Card
- 76 Driving Uninsured Vehicle
- 79 Non-Moving Violations Generally

D21 Violations Charged (continued)

2010-Later**EQUIPMENT**

- 81 Lamp Violations
- 82 Brake Violations
- 83 Failure to Require Restraint Use (*By Self or Passenger*)
- 84 Motorcycle Equipment Violations (*Helmet, Special Equipment*)
- 85 Violation of Hazardous Cargo Regulations
- 86 Size, Weight, Load Violations
- 89 Equipment Violations Generally

LICENSE, REGISTRATION & OTHER VIOLATIONS

- 91 Parking
- 92 Theft, Unauthorized Use of Motor Vehicle
- 93 Driving Where Prohibited (*Sidewalk, Limited Access, Off Truck Route*)
- 95 No Driver Present/Unknown if Driver Present
- 97 Not Reported
- 98 Other Moving Violation
- 99 Unknown Violation(s)

The VISION Data File

The Vision data file identifies each visual obstruction (as a separate record). It contains the data elements ST_CASE, STATE, and VEH_NO, which are described in the beginning of the Data Element Definitions and Codes section. The data file also contains MVISOBSC which is described below.

ST_CASE, VEH_NO, and MVISOBSC are the unique identifiers for each record. ST_CASE and VEH_NO should be used to merge the Vision data file with the Vehicle data file.

PC14 Driver's Vision Obscured by

Definition: This data element records impediments to this driver's visual field that were noted in the case materials.

Additional Information: Most of these data elements can be found in "Related Factor – Driver Level" from 1982 to 2008. This data element was added to the Vehicle data file in 2009. In 2010, the data element was changed to identify all that apply in the crash and was therefore moved here to its own data file.

SAS Name: MVISOBSC

Attribute Codes**2010-Later**

- 2 Reflected Glare, Bright Sunlight, Headlights
- 3 Curve, Hill, or Other Roadway Design Features
- 4 Building, Billboard, or Other Structure
- 5 Trees, Crops, Vegetation
- 6 In-Transport Motor Vehicle (*Including Load*)
- 7 Not-in-Transport Motor Vehicle (*Parked, Working*)
- 8 Splash or Spray of Passing Vehicle
- 9 Inadequate Defrost or Defog System
- 10 Inadequate Vehicle Lighting System
- 11 Obstructing Interior to the Vehicle
- 12 External Mirrors
- 13 Broken or Improperly Cleaned Windshield
- 14 Obstructing Angles on Vehicle
- 95 No Driver Present/Unknown if Driver Present
- 97 Vision Obscured – No Details
- 98 Other Visual Obstruction
- 99 Unknown

The NMCRASH Data File

The Nmcrash data file identifies each non-motorist action or circumstance that may have contributed to the crash (as a separate record). It contains the data elements ST_CASE, STATE, VEH_NO, and PER_NO, which are described in the beginning of the Data Element Definitions and Codes section. The data file also contains MTM_CRSW which is described below.

ST_CASE, PER_NO, and MTM_CRSW are the unique identifiers for each record. ST_CASE, VEH_NO, and PER_NO should be used to merge the Nmcrash data file with non-motorists from the Person data file.

NM12 Non-Motorist Contributing Circumstances

Definition: This data element describes the action(s) and/or circumstances of this non-motorist that law enforcement indicated may have contributed to the crash.

Additional Information: Some information that had been collected under Person Level Related Factors are now captured under this new data element. Please note the "non-motorist" may include people in not-in-transport motor vehicles, however this data element is only collected for people who are not occupants of motor vehicles. Prior to 2014 this data element was called "Non-Motorist Action/Circumstances at Time of Crash".

SAS Name: MTM_CRSH

Attribute Codes

2010-	2014-	
2013	Later	
0	--	No Improper Action
--	0	None Noted
1	--	Dart/Dash
--	1	Dart-Out
2	2	Failure to Yield Right-Of-Way
3	3	Failure to Obey Traffic Signs, Signals or Officer
4	4	In Roadway Improperly (<i>Standing, Lying, Working, Playing</i>)
5	--	Entering/Exiting Vehicle
--	5	Entering/Exiting Parked or Stopped Vehicle
6	6	Inattentive (<i>Talking, Eating, etc.</i>)
7	7	Improper Turn/Merge
8	8	Improper Passing
9	9	Wrong-Way Riding or Walking
10	--	Driving on Wrong Side of Road
--	10	Riding on Wrong Side of Road
--	11	Dash
12	12	Improper Crossing of Roadway or Intersection (<i>Jaywalking</i>)
13	13	Failing to Have Lights on When Required
14	14	Operating Without Required Equipment
15	15	Improper or Erratic Lane Changing
16	16	Failure to Keep in Proper Lane or Running Off Road
17	17	Making Improper Entry to or Exit from Trafficway
18	--	Operating the Vehicle in Other Erratic, Reckless, Careless or Negligent Manner
--	18	Operating in Other Erratic, Reckless, Careless or Negligent Manner
19	19	Not Visible (<i>Dark Clothing, No Lighting, etc.</i>)
20	20	Passing with Insufficient Distance or Inadequate Visibility or Failing to Yield to Overtaking Vehicle
21	21	Other
98	--	Not Reported
99	99	Unknown

The NMIMPAIR Data File

The Nmimpair data file identifies each non-motorist impairment (as a separate record). It contains the data elements ST_CASE, STATE, VEH_NO, and PER_NO, which are described in the beginning of the Data Element Definitions and Codes section. The data file also contains NMIMPAIR which is described below.

ST_CASE, PER_NO, and NMIMPAIR are the unique identifiers for each record. ST_CASE, VEH_NO, and PER_NO should be used to merge the Nmimpair data file with non-motorists from the Person data file.

NM14 Condition (Impairment) at Time of Crash- Non-Motorist

Definition: This data element identifies physical impairments to this non-motorist that may have contributed to the crash as identified by law enforcement.

Additional Information: This data element attempts to identify physical impairments to this non-motorist which may have contributed to the cause of the crash. These impairments can appear anywhere in the case materials--in the narrative section, in the violations section, in a column entitled "Contributing Factors" or "Driver Action," etc.

Some information that had been collected under "Related Factors- Person Level" is now captured under this new data element.

SAS Name: NMIMPAIR

Attribute Codes

2010- 2014-

2013 Later

0	0	None/Apparently Normal
1	1	III, Blackout
2	2	Asleep or Fatigued
--	3	Walking with a Cane or Crutches
3	--	Walking with a Cane or Crutches, etc.
4	4	Paraplegic or Restricted to Wheelchair
5	5	Impaired Due to Previous Injury
6	6	Deaf
7	7	Blind
8	8	Emotional (<i>Depressed, Angry, Disturbed, etc.</i>)
9	9	Under the Influence of Alcohol, Drugs or Medication
10	10	Physical Impairment – No Details
96	96	Other Physical Impairment
98	98	Not Reported
99	99	Unknown if Impaired

The NMPRIOR Data File

The Nmprior data file identifies each non-motorist action at the time of their involvement in the crash (as a separate record). It contains the data elements ST_CASE, STATE, VEH_NO, and PER_NO, which are described in the beginning of the Data Element Definitions and Codes section. The data file also contains MPR_ACT which is described below.

ST_CASE, PER_NO, and MPR_ACT are the unique identifiers for each record. ST_CASE, VEH_NO, and PER_NO should be used to merge the Nmprior data file with non-motorists from the Person data file.

NM11 Non-Motorist Action/Circumstances

Definition: This data element describes the action(s) of the non-motorist immediately prior to their involvement in the crash.

Additional Information: Some information that had been collected under Person Level Related Factors are now captured under this new data element. Please note the "non-motorist" may include people in not-in-transport motor vehicles, however this data element is only collected for people who are not occupants of motor vehicles. Prior to 2014 this data element was called "Non-Motorist Action/Circumstances Prior to Crash".

SAS Name: MPR_ACT

Attribute Codes

2010- 2014-
2013 Later

1	1	Going to or from School (<i>K-12</i>)
2	2	Waiting to Cross Roadway
3	3	Crossing Roadway

11	--	Entering/Exiting a Vehicle
--	11	Entering/Exiting a Parked or Stopped Vehicle
12	12	Disabled Vehicle Related (<i>Working on, Pushing, Leaving/Approaching</i>)
14	14	Other
15	--	None
16	16	Movement Along Roadway – Direction Unknown (<i>Since 2012</i>)
98	98	Not Reported
99	99	Unknown

The SAFETYEQ Data File

The Safetyeq data file identifies each item of safety equipment (as a separate record). It contains the data elements ST_CASE, STATE, VEH_NO, and PER_NO, which are described in the beginning of the Data Element Definitions and Codes section. The data file also contains MSAFEQMT which is described below.

ST_CASE, PER_NO, and MSAFEQMT are the unique identifiers for each record. ST_CASE, VEH_NO, and PER_NO should be used to merge the Safetyeq data file with non-motorists from the Person data file.

NM13 Non-Motorist Safety Equipment Use

Definition: This data element indicates the safety equipment that was used by this non-motorist involved in the crash.

Additional Information: There can be one or more safety equipment responses for each non-motorist.

SAS Name: MSAFEQMT

Attribute Codes

2010- 2015-

2014 Later

5	5	Lighting
7	7	Other Safety Equipment
8	8	Not Reported
9	9	Unknown if Used

The VINDECODE Data File

The Vindecode data file provides vehicle specification data for all vehicle types, mainly passenger vehicles, trucks and motorcycles. It contains the data elements ST_CASE, STATE, and VEH_NO, which are described in the beginning of the Data Element Definitions and Codes section. ST_CASE and VEH_NO are the unique identifiers for each record. ST_CASE and VEH_NO should be used to merge the Vindecode data file with the Vehicle or Parkwork data file.

The Vindecode data file contains 81 data elements derived from the VIN using the RL Polk VIN verification and decoding program, VINtelligence. Descriptions of the data elements and their contents can be found in the Polk VINtelligence Deluxe Package and Field Descriptions documentation in [Appendix F: Changes to the FARS VIN Decoded Data Elements](#).

**Appendix B:
Rules for Derived Data Elements**

Several derived data elements are included in the data files. A derived data element is any element that is not coded (i.e., data directly entered into the system) but translated from existing data. Derived data elements include:

- translations from coded data elements (e.g., “Number of Drinking Drivers”)
- records counted from vehicle and person levels as crash level counters (e.g., “Number of Parked/Working Vehicles”),
- data extracted across several records (e.g., “First Harmful Event”), and
- element combinations (e.g., “Motor Carrier Issuing Authority and ID Number”).

The derived data elements are provided to facilitate analyses and as a common platform for presenting findings. These elements and the translations used to derive them are described in this Appendix.

Crash Level Counts

Number of Motor Vehicles in Transport (MVIT)

Accident. VE_FORMS

(also provided as Vehicle.VE_FORMS, Parkwork.PVE_FORMS, Person.VE_FORMS)

Logic of Derivation

All Vehicle records linked to the crash are used. This data element is derived as the count of all vehicles in the crash where “Unit Type” = 1. It is the number of records in the Vehicle data file.

Number of Parked/Working Vehicles

Accident. PVH_INVL

Logic of Derivation

All Vehicle records linked to the crash are used. This data element is derived as the count of all vehicles in the crash where “Unit Type” is in (2, 3 or 4). It is the number of records in the Parkwork data file.

Number of Persons in Motor Vehicles in Transport (MVIT)

Accident. PERMVIT

Logic of Derivation

All Person records linked to the crash are used. This data element is derived as the count of all persons in the crash where “Person Type” is in (1, 2 or 9).

Number of Persons Not in Motor Vehicles in Transport (MVIT)

Accident. PERNOTMVIT

Logic of Derivation

All Person records linked to the crash are used. This data element is derived as the count of all persons in the crash where “Person Type” is in (3, 4, 5, 6, 7, 8, 10 or 19).

Crash and Vehicle Level Derived Data Elements**Fatalities**

Accident.FATALS

Logic of Derivation

All Person records linked to the crash are used. This data element records the number of fatally injured persons in the crash and is derived by counting all persons with “Injury Severity” of 4 in the crash.

Fatalities in Vehicle

Vehicle.DEATHS

Logic of Derivation

All Person records linked to the vehicle are used. This data element records the number of fatally injured persons in the vehicle and is derived by counting all persons with “Injury Severity” of 4 in the vehicle.

Number of Drinking Drivers
Accident.DRUNK_DR

Attribute Labels	1975-1988, 2008-2015
No Drinking Drivers Involved in the Crash	0
Number of Drinking Drivers Involved in the Crash	x

Logic of Derivation

1975-1998 and 2008-2014: All Person records linked to the crash are used. The data element is derived as the sum of drivers in a crash that have (1) police-reported alcohol involvement, or (2) a positive alcohol test result. That is, it is the sum of records where “Person Type” equals 1 (Driver of a Motor Vehicle In Transport), and “Police Reported Alcohol Involvement” equals 1 (Yes, Alcohol Involved) or “Alcohol Test Result” greater than 0 and less than 95.

Logic of Derivation

2015: All Person records linked to the crash are used. The data element is derived as the sum of drivers in a crash that have (1) police-reported alcohol involvement, or (2) a positive alcohol test result. That is, it is the sum of records where “Person Type” equals 1 (Driver of a Motor Vehicle In Transport), and “Police Reported Alcohol Involvement” equals 1 (Yes, Alcohol Involved) or “Alcohol Test Result” greater than 0 and less than 941.

The DRUNK_DR element is unreliable for 1977, 1981, and 1999-2007, as it was incorrectly derived for those years.

Driver Drinking
Vehicle.DR_DRINK

Attribute Labels	1975-1981	1982-Later
No Drinking	0	0
Drinking	1	1
Unknown	9	--

Logic of Derivation

All Person records linked to the vehicle are used. Driver Drinking is derived as drivers that have (1) police-reported alcohol involvement, or (2) a positive alcohol test result. That is, if it is a vehicle where “Person Type” equals 1 (Driver of a Motor Vehicle In Transport), and “Police Reported Alcohol Involvement” equals 1 (Yes, Alcohol Involved) or “Alcohol Test Result” is greater than 0 and less than 95 (prior to 2015) / 995 (2015 and later), then 1 (Drinking), otherwise 0 (No Drinking).

Atmospheric Conditions

Accident.WEATHER

Attribute Labels	1988-2009	2010-2012	2013-Later
No Additional Atmospheric Conditions	1	0	0
Clear		1	1
Cloudy		10	10
Rain	2	2	2
Sleet, Hail (Freezing Rain or Drizzle)	3	3	
Sleet or Hail			3
Freezing Rain or Drizzle			12
Snow	4	4	4
Blowing Snow	5	11	11
Rain and Fog	6		
Sleet and Fog	7		
Fog, Smog, Smoke		5	5
Severe Crosswinds		6	6
Blowing Sand, Soil, Dirt		7	7
Other	8	8	8
Not Reported		98	98
Unknown	9	99	99

Logic of Derivation

This data element is derived from the coded data elements, Accident.WEATHER1 and Accident.WEATHER2. To derive WEATHER from these two data elements, the priority ranking of each attribute is as follows:

- Snow
- Blowing Snow
- Sleet or Hail
- Freezing Rain or Drizzle
- Rain
- Fog, Smog, Smoke
- Severe Crosswinds
- Blowing Sand, Soil, Dirt
- Other
- Cloudy
- Clear
- Not Reported
- Unknown
- No Additional Atmospheric Conditions

First Harmful Event

Accident.HARM_EV

(also provided as Vehicle.HARM_EV, Parkwork.PHARM_EV, Person.HARM_EV)

Logic of Derivation

Since 2010, this data element is derived from the set of all crash events. Each event in a crash is recorded in chronological order. The data element that records the event is “Sequence of Events” and includes both harmful and non-harmful events. First Harmful Event, therefore, is the first “Sequence of Events” value that is not between codes 60 and 71 (non-harmful events).

Initial Contact Point

Vehicle. IMPACT1, Parkwork.PIMPACT1

(also provided as Person.IMPACT1)

Logic of Derivation

Since 2010, this data element is derived from the set of all crash events for a vehicle. Each event in a crash is recorded in chronological order. The data element that records each impact for a vehicle is “Area of Impact (This Vehicle)” for “This Vehicle” or “Area of Impact (Other Vehicle)” for the “Other Vehicle”. The area of impact is only coded for harmful events, that is “Sequence of Events” values that are not between codes 60 and 71. Initial Contact Point, therefore, is the vehicle’s first recorded Area of Impact value for a harmful event. Note that the vehicle may be “This Vehicle” or the “Other Vehicle” in the crash event.

Make Model Combined

Vehicle. MAK_MOD, Parkwork. PMAK_MOD
(also provided as Person. MAK_MOD)

Logic of Derivation

This 5-digit data element is the combination of two data elements, the 2-digit “Vehicle Make” code followed by the 3-digit “Vehicle Model” code.

Motor Carrier Identification Number

Vehicle. MCARR_ID, Parkwork. PMCARR_ID

Logic of Derivation

This 11-character data element is the combination of two data elements, the 2-digit “Motor Carrier Issuing Authority” code followed by the 9-character “Identification Number”.

Appendix C: Auxiliary Data Files

A set of auxiliary files has been created since 1982. These files contain elements derived from the FARS datasets to make it easier to extract certain data classifications and topical areas, such as commonly used age groups, speeding involved crashes, and distraction involved crashes. There is an Accident (Acc_Aux), Vehicle (Veh_Aux), and Person (Per_Aux) level auxiliary file for each year of data. Refer to the FARS Auxiliary Analytical User's Manual for the derived elements and associated attributes. The manual can be found at [NCSA Publications-FARS/NASS GES/CRSS Manuals and Documentation](#). A listing of data elements in each file follows:

Accident File (ACC_AUX)

Variable	Description
A_CRAINJ	Crash Injury Type
A_CT	Crash Type
A_D15_19	Crashes Involving a Young Driver (Aged 15-19)
A_D15_20	Crashes Involving a Young Driver (Aged 15-20)
A_D16_19	Crashes Involving a Young Driver (Aged 16-19)
A_D16_20	Crashes Involving a Young Driver (Aged 16-20)
A_D16_24	Crashes Involving a Young Driver (Aged 16-24)
A_D21_24	Crashes Involving a Young Driver (Aged 21-24)
A_D65PLS	Crashes Involving an Older Driver (Aged 65+)
A_DIST	Involving a Distracted Driver
A_DOW	Day of Week
A_DROWSY	Involving a Drowsy Driver
A_HR	Involving a Hit and Run
A_INTER	Interstate
A_INTSEC	Intersection
A_JUNC	Junction
A_LT	Involving a Large Truck
A_MANCOL	Manner of Collision
A_MC	Involving a Motorcycle
A_PED	Involving a Pedestrian
A_PEDAL	Involving a Pedalcyclist
A_POLPUR	Involving a Police Pursuit
A_POSBAC	Involving a Driver with a Positive BAC Test Result
A_RD	Involving a Roadway Departure (FHWA definition)
A_REGION	NHTSA Region
A_RELRD	Relationship to the Trafficway
A_ROADFC	Roadway Function Class
A_ROLL	Involving a Rollover
A_RU	Land Use (Rural/Urban)
A_SPCRA	Involving Speeding
A_TOD	Time of Day
BIA	Tribal lands based on geographic location and spatial data
SPJ_INDIAN	Special Jurisdiction Indian Reservation
INDIAN_RES	Indian Reservation based on special jurisdiction and geographic location data

Vehicle File (VEH_AUX)

Variable	Description
A_BODY	Vehicle Type
A_CDL_S	CDL Status
A_DRDIS	Distracted Driver
A_DRDRO	Drowsy Driver
A_IMP1	Initial Impact Point
A_IMP2	Principal Impact Point
A_LIC_C	License Compliance
A_LIC_S	License Status
A_MC_L_S	Motorcycle License Status
A_SBUS	School Bus
A_SPVEH	Speeding Vehicle
A_VROLL	Rollover

Person File (PER_AUX)

Variable	Description
A_AGE1	Age Group 1
A_AGE2	Age Group 2
A_AGE3	Age Group 3
A_AGE4	Age Group 4
A_AGE5	Age Group 5
A_AGE6	Age Group 6
A_AGE7	Age Group 7
A_AGE8	Age Group 8
A_AGE9	Age Group 9
A_ALCTES	Alcohol Testing
A_EJECT	Ejection
A_HISP	Hispanic Origin
A_HRACE	Race and Hispanic Origin – Using OMB Guideline
A_LOC	Non-Motorist Location
A_PERINJ	Injury Type
A_PTYPE	Person Type
A_RCAT	Race – Using OMB Guidelines
A_REST	Restraint Use

**Appendix D:
Additional Data Element Information**

Analytical data classifications make up the majority of information provided in this appendix. The data classifications are primarily, but not solely, based on standards established for production of NCSA's Traffic Safety Facts publications and other data products produced by NCSA. It is important to note that these classifications are only meant as references and may be deviated from as a project or request dictates. However, to maintain consistency in data reporting, NCSA tends to adhere to these classifications.

Date of CrashTime of Day/Day of Week

Classification	Data Year and Code
	1975-Later
Time of Day	HOUR (Military)
Daytime (6:00 a.m. – 5:59 p.m.)	6-17
Nighttime (6:00 p.m. – 5:59 a.m.)	0-5, 18-24*
Unknown	99
Day of Week	DAY_WEEK w/ HOUR
Weekday 6 a.m. Monday thru 5:59 p.m. Friday	(DAY_WEEK=2 and 6<=HOUR<=23) or (DAY_WEEK in (3,4,5)) or (DAY_WEEK=6 and (0<= HOUR <=17 or HOUR=24*))
Weekend 6 p.m. Friday thru 5:59 a.m. Monday	(DAY_WEEK=6 and 18<= HOUR <=23) or (DAY_WEEK in (1,7)) or (DAY_WEEK=2 and (0<= HOUR <=5 or HOUR=24*))
Unknown	(DAY_WEEK =9) or (DAY_WEEK in (2,6) and HOUR =99)

* Hour 24 is the beginning of the day. In 2009 attribute 24 was dropped since 0 means the same thing.

Holidays

The length of a "FARS holiday" depends on the day on which the holiday occurs. NHTSA uses the following times for holiday analysis:

DAY OF HOLIDAY	TIME PERIOD USED FOR ANALYSIS
Sunday or Monday	6 p.m. Friday to 5:59 a.m. Tuesday
Tuesday	6 p.m. Friday to 5:59 a.m. Wednesday
Wednesday	6 p.m. Tuesday to 5:59 a.m. Thursday
Thursday	6 p.m. Wednesday to 5:59 a.m. Monday
Friday or Saturday	6 p.m. Thursday to 5:59 a.m. Monday

HOLIDAY DESCRIPTIONS AND CALENDARS

The following table gives a detailed description of the time periods included within the following major holidays: New Year's, Memorial Day, Fourth of July, Labor Day, Thanksgiving and Christmas. The number of whole days in the holiday period is shown in parentheses. Since the holiday period data retrieval is associated with the alcohol related data, the holiday periods are given from 1982 onwards to match with the BAC data.

Note: When using the Alcohol data files, the New Year's Day holiday period for 1982 will be incomplete since no Alcohol data files exist prior to 1982.

Date of Crash (continued)Holiday**HOLIDAY CALENDAR**

Year	New Year's Day	Memorial Day	Fourth of July	Labor Day	Thanksgiving Day	Christmas Day
1982	6:00 PM Thu. 12/31/1981 to 5:59 AM Mon. 01/04/1982 (3)	6:00 PM Fri. 05/28/1982 to 5:59 AM Tue. 06/01/1982 (3)	6:00 PM Fri. 07/02/1982 to 5:59 AM Tue. 07/06/1982 (3)	6:00 PM Fri. 09/03/1982 to 5:59 AM Tue. 09/07/1982 (3)	6:00 PM Wed. 11/24/1982 to 5:59 AM Mon. 11/29/1982 (4)	6:00 PM Thu. 12/23/1982 to 5:59 AM Mon. 12/27/1982 (3)

Manner of Collision

Note: From 1975 to 2001, the manner of collision is totally dependent on the directions of travel of the vehicles involved. The direction of travel of the vehicles is often misunderstood. The direction of a vehicle is determined by the precrash condition direction of travel, just before the vehicle goes out of control. Example (1): Assume two vehicles are heading toward each other on the same roadway, one going north and the other going south. If the southbound vehicle skids on a patch of ice and turns 180° and immediately is struck in the rear by the vehicle going north, then the manner of collision is "Head-On," not "Rear-End." Example (2): Had the vehicle going north sideswiped the southbound vehicle, which after the ice skid was pointed north, the manner of collision would be "Sideswipe Opposite Direction," even though both vehicles are pointed north at the time of the sideswipe. The precrash condition directions of travel, for both vehicles, determine the outcome. These examples involve a rotation of a vehicle just before the crash and can account for 20 to 30 percent of the coded cases. See *Impact* also in this Appendix.

Starting in 2002 and later, the manner of collision is dependent on the geometry of the points of impact. That is, Example (1) above is now coded 01, Front-to-Rear (includes Rear-End) and Example (2), is now coded 07 Sideswipe, Same Direction. This is a major change in the MAN_COLL data element. Care must be taken when using this data element over a time period that spans 2001 to 2002.

NHTSA'S Manner Of Collision Convention				
Classification (MAN_COLL)	Data Year and Code			
	1975-1977	1978-2001	2002-2009	2010-Later
Not Collision with Motor Vehicle in Transport	0	0	0	0
Rear-End	1	1	1	1
Head-On	2	2	2	2
Angle	4	4	3-6	6
Sideswipe	7	5, 6	7-8	7-8
Other	3	3	9-11	9-11
Unknown	9	9	99	98, 99

Note: Refers only to crashes in which the "First Harmful Event" is a collision between two motor vehicles in-transport (codes 12 and 13).

Since 2002, this data element has been based on the impact location (front, side, or rear) and vehicle orientation (facing in the same or opposite directions) of the contact vehicles in the First Harmful Event. The use of "direction of force" will no longer be used in determining this data element. Prior to 2002, the "direction of force" immediately preceding the collision was allowed to be considered, especially in head-on collisions.

Relation to Trafficway

FARS Description (REL_ROAD)	Data Year and Code		Classification
	1975-1997	1998-Later	
On Roadway	1	1	On roadway
Two-Way Continuous Left-Turn Lane*	-	11 (since 2001)	
Shoulder	2	2	
Median	3	3	
Roadside	4	4	
Outside Right-Of-Way	5	5	
Off Roadway - Location Unknown	6	6	
In Parking Lane	7 (since 1980)	7	
Gore	8 (since 1982)	8	
Separator	-	10	
Not Reported	-	98 (since 2010)	Unknown
Unknown	9	99	

IMPORTANT: Two-way continuous left-turn lane has been reclassified as On Roadway. Previously, two-way continuous left-turn lane was classified as off roadway/median.

*The attribute two-way continuous left-turn lane was introduced in 2001 and was described as a type of median, thus they were classified as off roadway/median. However, in 2003 the attribute description was revised and the two-way continuous left-turn lane was considered on the roadway, thus not a median. For analytical purposes, consider two-way continuous left-turn lanes as on the roadway, with the understanding that these instances may have been recorded under the Median attribute prior to 2001.

Trafficway with frontage road**Trafficway with multiple roadways in the same direction**

Relation to Trafficway (continued)**Gore**

Indian Reservation

The Fatality Analysis Reporting System's (FARS) Special Jurisdiction data and the geographic location (global position) of the crash are used to identify Indian Reservations. These data can be used in conjunction to provide a more accurate representation of fatal crashes occurring on Tribal lands.

Special Jurisdiction

This element identifies if the location on the trafficway where the crash occurred qualifies as a Special Jurisdiction even though it may be patrolled by state, county or local police (e.g., all State highways running through Indian reservations are under the jurisdiction of the Indian reservation).

Element Values:

- 0 No Special Jurisdiction (*Includes National Forests Since 2008*)
- 1 National Park Service
- 2 Military
- 3 Indian Reservation**
- 4 College/University Campus
- 5 Other Federal Properties (*Since 1977*)
- 8 Other (*Since 1976*)
- 9 Unknown

In order to code the crash as Indian Reservation (SP_JUR=3) the relevant information would need to be present on the Police Crash Report or the FARS Analyst would need to have the local knowledge that the particular location of the crash was within the Bureau of Indian Affairs (BIA) land.

Derived Data Element Using Geospatial Software

Bureau of Indian Affairs (BIA) dataset: This dataset is an extraction from PAD-US 1.1 (CBI Edition) of lands owned by the Bureau of Indian Affairs, Native American Tribes and Native Alaskan Corporations. The PAD-US 1.1 (CBI Edition) data set portrays the nation's protected areas with a standardized spatial geometry and numerous valuable attributes on land ownership, management designations, and conservation status (using national GAP and international IUCN coding systems). The PAD-US 1.1 (CBI Edition) defines protected areas to include all lands dedicated to the preservation of biological diversity and to other natural, recreation and cultural uses, and managed for these purposes through legal or other effective means (adapted from IUCN definition). PAD-US 1.1 (CBI Edition) attempts to include all available spatial data on these places. This dataset was uploaded to Data Basin and is available with additional information at:

Data Basin- Native American Lands

The FARS database contains Latitude and Longitude elements. These data elements are coded by the FARS Analysts based on the location information available on the Police Crash Report (either directly from a listed latitude/longitude or indirectly via the address of the crash (road name, mile marker etc.)). Not all FARS crashes have a valid latitude/longitude and these crashes are coded as having an unknown geospatial location.

FARS crash locations were imported into Geospatial software and overlaid on a BIA land layer. FARS crashes were then coded as being within the boundaries of BIA land or not (BIA=1 or 0). When analyzing the FARS data with Geospatial software there are inconsistencies between the FARS coding and Geospatial coding.

Derived Indian Reservation Data Elements (2001 and later)

Derived Indian Reservation data elements can be found on the Accident level auxiliary file – ACC_AUX.*. The first year of data available is 2001. The following Indian Reservation related data elements can be found in ACC_AUX.*:

- BIA – 1 indicates that the crash occurred on Tribal lands. The geographic location data collected in FARS was used in conjunction with spatial data on the Bureau of Indian Affairs (BIA) land boundaries to identify Tribal lands.
- SPJ_INDIAN – derived from FARS special jurisdiction (SP_JUR=3) element. 1 indicates that the crash occurred on an Indian Reservation.
- *INDIAN_RES – 1 indicates either BIA=1 or SPJ_INDIAN=1. This provides a more accurate representation of fatal crashes occurring on Tribal lands.

*Use the INDIAN_RES data element to obtain the most complete data.

ACC_AUX.* datasets can be merged with other FARS datasets by ST_CASE to obtain additional information on the crash.

Additional Information

For further details on identifying Indian Reservations, please refer to [Identifying Fatal Crashes Involving Native Americans/Alaskan Natives throughout the United States and on Tribal Reservations](#).

(continued)**

Fatal Motor Vehicle Traffic Crashes on Indian Reservations and
Fatalities in Crashes on Indian Reservations
Fatality Analysis Reporting System (FARS) 2001-2015 Final & 2016 Annual Files

Year	Fatal Crashes			Fatalities		
	Special Jurisdiction (FARS) Indian Reservation	GIS Bureau of Indian Affairs (BIA)	*BIA or Special Jurisdiction (FARS) Indian Reservation	Special Jurisdiction (FARS) Indian Reservation	GIS Bureau of Indian Affairs (BIA)	*BIA or Special Jurisdiction (FARS) Indian Reservation
2010	233	246	314	274	290	364
2011	245	275	341	279	314	388
2012	217	232	305	262	287	367
2013	202	217	279	234	247	316
2014	220	257	315	259	293	359
2015	244	261	319	285	298	369
2016	243	260	310	298	321	380

*Note: The Fatality Analysis Reporting System's (FARS) special jurisdiction data and the geographic location (global position) of the crash were used to identify Indian Reservations. Both of these data pieces were used to provide a more accurate representation of fatal crashes occurring on Tribal lands. The geographic location data collected in FARS was used in conjunction with spatial data on the Bureau of Indian Affairs (BIA) land boundaries to identify Tribal lands. Indian Reservations identified by the FARS special jurisdiction element and those identified by the GIS/Bureau of Indian Affairs are not mutually exclusive

[Return](#)

Trafficway Identifier

If "Route Signing" is 1 (Interstate), then "I-" is in the first two spaces of "Trafficway Identifier"

If "Route Signing" is 2 (US Highway), then "US-" is in the first three spaces of "Trafficway Identifier"

If "Route Signing" is 3 (State Highway), then "SR-" is in the first three spaces of "Trafficway Identifier"

If Route Signing is 4 (County Road), then "CR-" is in the first three spaces of Trafficway Identifier followed by the route number OR name if there is no number.

If Route Signing is other than 1, 2, 3 or 4, the route name or identifier is left-justified.

Immediately after the route designation (I-, US- or SR-), the corresponding highway number appears. For example, Interstate 70 should be coded as "I-70" and US 66 should be coded as "US-66." A dash is used in the highway designation between the capital letters and the number.

If one trafficway is both a State Highway and an Interstate Highway, "Route Signing" must always be coded "1-Interstate."

(a) If the "Trafficway Identifier" and "Milepoint" are available for only the State Highway then the "Route Signing" is coded as "1-Interstate." "I-" is in the first two spaces of "Trafficway Identifier" followed by the full State Highway Identifier as normal (including any letters.) If California business loop (CA215) is also Interstate 15, then "Trafficway Identifier" is code as "I-SR215" or "I-CA215."

(b) If the "Trafficway Identifier" and "Milepoint" are available for both the State Highway and the Interstate Highway, then "I-" appears in the first two spaces of "Trafficway Identifier" followed by the Interstate number. The Interstate "Milepoint" is coded. E.g., "I-15" (SR215) or "I-15" (CA215).

Similarly, if a State Highway is also a U.S. Highway, then the "Route Signing" is coded as "2-US Highway."

(a) If the "Trafficway Identifier" and "Milepoint" are available only for the State Highway, then the "Route Signing" is coded as "2-US Highway." "US-" appears in the first three spaces of "Trafficway Identifier" followed by the full State Highway Identifier as normal (including any letters). The State Highway "Milepoint" is coded. E.g.; If Florida Route 25 is also US Route 27, then code "US-SR25" or "US-FL25."

(b) If the "Trafficway Identifier" and "Milepoint" are available for both the U.S. Highway and the State Highway, then "US-" is in the first three spaces of "Trafficway Identifier" followed by the U.S. route number. The State Highway Identifier appears anywhere after the US route number. The US Route "Milepoint" is coded. E.g. "US-27" (SR25) or "US-27" (FL25).

Vehicle Body TypeBODY_TYP by NHTSA vehicle category

NHTSA has precise definitions for several vehicle categories, such as passenger cars, pickups, buses, etc. For some categories, one will also need the data element TOW_VEH.

NHTSA's Vehicle Body Type Classification			
Classification (BODY_TYP)	Data Year and Code		
	1975-1981	1982-1990	1991-Later
Passenger Cars	1-9	1-11, 67	1-11, 17 (since 2010)
Light Trucks & Vans ⁽⁴⁾	43, 50-52, or (60 and tow_veh=0)	12, 40, 41, 48-51, 53-56, 58, 59, 68, 69, or (79 and tow_veh=0 or 9)	14-16, 19-22, 24 ^(1,6) , 25 ^(2,6) , 28-41, 45-49, or (79 and tow_veh=0 or 9)
Large Trucks	53-59, or (60 and tow_veh=1)	70-72, 74-76, 78, or (79 and tow_veh in 1-5 ⁽⁸⁾)	60-64, 66, 67 ⁽⁵⁾ , 71, 72, 78, or (79 and tow_veh ⁽⁷⁾ in 1-4)
Motorcycles	15-18	20-29	80-89
Buses	25-29	30-39	50-59 (55 van-based >10k lbs since 2011)
Other/Unknown Vehicles	35-42, 44, 45, 99	13, 14, 42, 52, 73, 77, 80, 81, 82, 83, 88, 89, 90, 99	12, 13, 23 ⁽⁶⁾ , 42, 65, 73, 90, 91, 92, 93, 94 ⁽³⁾ , 95 (since 2012), 97, 99 Also, since 2004 (79 and tow_veh ⁽⁷⁾ =5 or 6) or 98 (since 2010)
Passenger Vehicles	1-9, 43, 50-52, or (60 and tow_veh=0)	1-12, 40, 41, 48-51, 53-56, 58, 59, 67-69, or (79 and tow_veh=0 or 9)	1-11, 14-22, 24 ⁽¹⁾ , 25 ⁽²⁾ , 28-41, 45-49, or (79 and tow_veh=0 or 9), or 17 (since 2010)
Utility Vehicles (a.k.a. On/Off Road)	43	12, 56, 68	14-16, 19
Pickups	50	50, 51	30-39
Vans	51	40, 41, 48, 49	20-22, 24 ^(1,6) , 25 ^(2,6) , 28, 29
Medium Trucks	53, 54, 56	70, 71, 75, 78	60-62, 64, 67 ⁽⁵⁾ , 71
Heavy Trucks	55, 57-59, or (60 and tow_veh=1)	72, 74, 76, or (79 and tow_veh in 1-5 ⁽⁸⁾)	63, 66, 72, 78, or (79 and tow_veh ⁽⁷⁾ in 1-4)
Combination Trucks	((53-56, 60) and tow_veh=1) or 57-59	((70-72, 75, 76, 78, 79) and tow_veh in 1-5 ⁽⁸⁾) or 74	((60-64, 71, 72, 78, 79) and tow_veh ⁽⁷⁾ in 1-4) or 66
Single Unit Trucks	(53-56, 60) and tow_veh =0	(70-72, 75, 76, 78, 79) and tow_veh in (0,9)	(60-62, 63, 64, 67, 71, 72, 78, 79) and tow_veh in (0,5,6 ⁽⁷⁾ ,9)

⁽¹⁾ Body type code 24 (van-based school bus) was added in 1993. When solely defining School Buses be sure to include body type code 24.

⁽²⁾ Body type code 25 (van-based transit bus) was added in 1993. When solely defining Transit Buses be sure to include body type code 25.

⁽³⁾ Body type coded 94 (motorized wheelchair) was added in 1997 and deleted in 1998.

⁽⁴⁾ "Light Trucks & Vans" is frequently referred to as just "Light Trucks."

Vehicle Body Type Classification (continued)

- (5) Body type code 67 (medium/heavy pickup (Ford Super Duty 450/550)) was added in 2001. For the purposes of medium and heavy truck classifications, this body type will be considered a medium truck.
- (6) Van-based bus (24, 25) and van-based motor home (23) body type codes were deleted in 2003.
These attributes were removed because a review of the FARS Analyst coding revealed that they were rarely capturing them.
- (7) New code was added in 2004 for Vehicle Trailing (tow_veh) - 5 (vehicle towing another motor vehicle). In 2009 the attribute was split into two to distinguish between fixed and non-fixed linkages (5 and 6). This attribute is not a part of the selection criteria for Light, Large, Heavy, or Combination Truck classifications. Beginning with 2004, an unknown truck type (light/medium/heavy) that was towing another vehicle - (BODY_TYP=79 and TOW_VEH=5,6) - should be classified as Other/Unknown. This classification is subject to change.
- (8) From 1982 to 1990, Vehicle Trailing (TOW_VEH) attribute value 5 (yes, two or more trailing units) existed in 1982 only. Including "5" in the range from 1982 to 1990 does not affect the classification.

Data element 13 Examples

[Return](#)

VIN Weight- Auto

FARS collects information on the weight of cars involved in fatal crashes. Vehicle weight is not generally available for light trucks, however, the weight data element, WGTCD_TR, is. NHTSA often partitions car weight into six classes. This has been done in *An Analysis of Fires in Passenger Cars, Light Trucks, and Vans*, Tessmer, DOT HS 808 208, 1994; *Passenger Car Weight and Injury Severity in Single-Vehicle Nonrollover Crashes*, Partyka and Boehly, 1989; ESV Report 89-2b-O-005 and *Development of Databases in Support of an Analysis of Fire Incidence Using the Fatal Accident Reporting System*, Walz and Klein, September 14, 1993. The partition is defined as:

Car Weight Classes	
Class	Weight Range in Pounds
Class 1	Car Weight < 1,950
Class 2	1,950 ≤ Car Weight < 2,450
Class 3	2,450 ≤ Car Weight < 2,950
Class 4	2,950 ≤ Car Weight < 3,450
Class 5	3,450 ≤ Car Weight < 3,950
Class 6	3,950 ≤ Car Weight

Note: If you are going to use this data element as a continuous data element, consider defining a new data element, say AUTO_WT as AUTO_WT = VIN_WT/1000. That is, AUTO_WT is the weight of the car in 1,000s of lbs. Its coefficient is less likely to be zero.

[Return](#)

Vehicle Identification Number (VIN)

Data elements = VIN_1 ... VIN_12 The 1st to 12th character of the vehicle identification number

The first character of the VIN usually identifies the country or Nation of Origin; the most common are:

VIN_1 =	1	U.S.
	2	Canada
	3	Mexico
	J	Japan
	K	Korea
	L	Taiwan
	S	England
	VF	France (V for Europe, F for France)
	W	West Germany
	Y	Sweden
	Z	Italy

1981-Later

The second and third characters of the VIN, more or less, identify the make of the vehicle; the most common AUTOMOBILE makes are:

VIN_2|VIN_3 =

2A - AVANTI	E3 - EAGLE	G2 - PONTIAC
A3 - MITSUBISHI	F1 - EAGLE	G3 - OLDSMOBILE
AB - ISUZU	MEDALLION	G4 - BUICK
AJ - JAGUAR	(IF VIN_1 = V	G6 - CADILLAC
AM - MASERATI (IF VIN_1 = Z)	SEE RENAULT)	G8 - SATURN
AM - AMERICAN MOTORS (IF VIN_1 = 1)	F1 - MERKUR (IF VIN_1 = W)	H4 - ACURA
AR - ALPHA ROMEO	F1 - RENAULT (IF VIN_1 = V	HM - HONDA
AW - AUDI	SEE EAGLE	JC - JEEP
AX - STERLING	MEDALLION)	LN - LINCOLN
B3 - DODGE	F1 - SUBARU (IF VIN_1 = J)	M1 - MAZDA
BA - BMW	F3 - PEUGEOT	ME - MERCURY
BB - BERTONE	FA - FORD (IF VIN_1 = 1)	MH - HYUNDAI
C3 - CHRYSLER	FA - FIAT (IF VIN_1 = Z)	N1 - NISSAN
CA - ROLLS ROYCE	FF - FERRARI	P3 - PLYMOUTH
CC - LOTUS	FR - PININFARINA	PO - PORSCHE
CE - DELOREAN	G1 - CHEVROLET	S3 - SAAB
CF - ASTON MARTIN		S3 - SUZUKI
DB - MERCEDES BENZ		T2 - TOYOTA
		V1 - VOLVO
		VW - VOLKSWAGEN

Vehicle Identification Number (VIN) (continued)**1981-Later**

The 10th letter or number of the VIN tells you the model year of the vehicle. Note that this may be different from when it was manufactured, as many automobile manufacturers start to produce next year's model this year. Find the model year by matching the 10th digit of your VIN to the table below:

VIN_10 =

<u>VIN (1st Run)</u>	<u>VIN (2nd Run)</u>
A = 1980	A = 2010
B = 1981	B = 2011
C = 1982	C = 2012
D = 1983	D = 2013
E = 1984	E = 2014
F = 1985	F = 2015
G = 1986	G = 2016
H = 1987	H = 2017
J = 1988	J = 2018
K = 1989	K = 2019
L = 1990	L = 2020
M = 1991	M = 2021
N = 1992	N = 2022
P = 1993	P = 2023
R = 1994	R = 2024
S = 1995	S = 2025
T = 1996	T = 2026
V = 1997	V = 2027
W = 1998	W = 2028
X = 1999	X = 2029
Y = 2000	Y = 2030
1 = 2001	1 = 2031
2 = 2002	2 = 2032
3 = 2003	3 = 2033
4 = 2004	4 = 2034
5 = 2005	5 = 2035
6 = 2006	6 = 2036
7 = 2007	7 = 2037
8 = 2008	8 = 2038
9 = 2009	9 = 2039

As shown, each letter or number has been assigned to two different years. To find out which one applies, compare it to the 7th letter or number in the VIN. If the 7th VIN position is a letter, then the vehicle is made in 2010 through 2039. If the 7th VIN position is a number, then the vehicle is made prior to 2010.

Police Pursuits

A pursuit is an event that is initiated when a law enforcement officer, operating an authorized emergency vehicle, gives notice to stop (either through the use of visual or audible emergency signals or a combination of emergency devices) to a motorist who the officer is attempting to apprehend and that motorist fails to comply with the signal by either maintaining his/her speed, increasing speed or taking other evasive action to allude the officer's continued attempts to stop the motorist.

Police Pursuits		
Classification	Data Year and Codes	
	1982-1993	1994-Later
Related Factors- Crash Level	CF1, CF2, CF3	
Police Pursuit Involved	-	20
Related Factors- Driver Level	DR_CF1, DR_CF2, DR_CF3 (1982-2009) DR_CF4 (1997-2009) DR_SF1, DR_SF2, DR_SF3, DR_SF4 (2010-Later)	
High Speed Chase with Police in Pursuit	37	-
Police Pursuing this Driver or Police Officer in Pursuit	-	37

FARS 1982-1993

If at least one driver in a crash has a "Related Factor-Driver Level" of *High Speed Chase with Police in Pursuit* (37) then that crash is considered a "police pursuit" crash and all fatalities in that crash are considered "fatalities in crashes involving police in pursuit."

(*DR_CF1=37*) or (*DR_CF2=37*) or (*DR_CF3=37*)

Specific fatality types in a "police pursuit" crash can be identified as follows:

1. *occupant of police vehicle* - all occupants (*PER_TYP IN (1,2,9)*) of special use vehicle police (*SPEC_USE=5*)
2. *occupant of chased vehicle* - all occupants (*PER_TYP IN (1,2,9)*) of vehicle with a driver having a "driver related factor" of high speed chase with police in pursuit (*DR_CF1=37 OR DR_CF2=37 OR DR_CF3=37*)
3. *occupant of other vehicle* - all other occupants (*PER_TYP IN (1,2,9)*) - excludes occupant of police vehicle and chased vehicle
4. *non-occupant* - pedestrians, pedalcyclists, and other non-occupants (*PER_TYP IN (3,4,5,6,7,8)*)

Police Pursuits (continued)***FARS 1994 and later***

If a crash has a “Related Factor- Accident Level” of *Police Pursuit Involved* (20) or a driver in the crash has a “Related Factor-Driver Level” of *High Speed Chase with Police in Pursuit* (37), then that crash is considered a “police pursuit crash” and all fatalities in that crash are considered “fatalities in crashes involving police in pursuit.”

(*CF1=20*) or (*CF2=20*) or (*CF3=20*) or (*DR_CF1=37*) or (*DR_CF2=37*) or (*DR_CF3=37*)
(or (*DR_CF4=37*) since 1997)

Note that data elements DR_CF1-DR_CF4 were renamed to DR_SF1-DR_SF4 in 2010.

Specific fatality types can be identified as follows:

1. *occupant of police vehicle* - all occupants (*PER_TYP IN (1,2,9)*) of special use vehicle police (*SPEC_USE=5*)
2. *occupant of chased vehicle* - all occupants (*PER_TYP IN (1,2,9)*) of vehicle with a driver having a driver related factor of high speed chase with police in pursuit (*DR_CF1=37* or *DR_CF2=37* or *DR_CF3=37* (or (*DR_CF4=37*) since 1997)).
3. *occupant of other vehicle* - all other occupants (*PER_TYP IN (1,2,9)*) - excludes occupant of police vehicle and chased vehicle
4. *non-occupant* - pedestrians, pedalcyclists, and other non-occupants (*PER_TYP IN (3,4,5,6,7,8,10,19)*)
5. *unknown* - (*PER_TYP=99*), this code existed for one year – 1996

[Return](#)

Speeding

A fatal crash is “speeding” related if any of the following applies:

1. At least one driver involved in the crash had a speeding related “Related Factor-Driver Level.” Note that in 2009 the “Related Factor-Driver Level” attributes associated with speeding related were deleted and a new data element, “Speed Related,” was introduced to capture this information. The element name was changed in 2013 to “Speeding Related.”
2. At least one driver involved in the crash had a speeding related “Violations Charged.”

Note: This definition was revised in 2002. The previous definition for “speeding” only looked at “Related Factor-Driver Level.” By expanding the definition to include “Violations Charged,” “speeding” fatal crashes and fatalities increase by less than one percent.

Fatal speeding-related crashes are not captured prior to 1982 using this scheme because “Violations Charged” did not identify speeding violations prior to 1982. This method only applies to 1982 through 2008 data.

NHTSA's Speeding Convention	Data Year and Codes			
	1982-1996	1997	1998-2007	2008
1. Related Factor- Driver Level	DR_CF1, DR_CF2, DR_CF3, DR_CF4 (DR_CF4 added in 1997)			
Driving too fast for conditions or in excess of the posted maximum		44		
Driving too fast for conditions		-		43
Driving in Excess of Posted Maximum		-		44
Racing		-	46	
2. Violations Charged	VIOL_CHG		VIOLCHG1, VIOLCHG2, VIOLCHG3 (starting in 2002)	
Speeding	2		-	
Alcohol or drugs and speeding	3		-	
Racing	-		21	
Speeding (above the speed limit)	-		22	
Speed greater than reasonable and prudent (not necessarily over the limit)	-		23	
Exceeding special speed limit (e.g.: for trucks, buses, cycles, or on bridge, in school zone, etc.)	-		24	
Energy speed (exceeding 55 mph, non-pointable)	-		25	
Speed related violations generally	-		29	

Speeding (continued)

A “Speeding Related” data element was added to the Vehicle file in 2009. A crash is “speeding” related if at least one driver involved in the crash was “Speeding Related” Yes. Only the “Speed Related” data element needs to be considered for 2009 and later data.

NHTSA’s Speeding Convention	Data Year and Codes	Classification
	2009-2012	
No	0	Not Speeding
Yes (includes the following): <ul style="list-style-type: none"> • Speed greater than reasonable or prudent (not necessarily over the limit) • Driving too fast for conditions • Speeding (above the speed limit) • Exceeding special limit (e.g.; for trucks, buses, cycles, on bridge, at night, in school zone, etc.) • Racing 	1	Speeding
No Driver Present/Unknown if Driver Present	8 (2011-2012)	Not Speeding
Unknown	9	Unknown

The “Speeding Related” data element was expanded in 2013.

NHTSA’s Speeding Convention	Data Year and Codes	Classification
	2013-Later	
No	0	Not Speeding
Yes, Racing	2	Speeding
Yes, Exceeded Speed Limit	3	
Yes, Too Fast for Conditions	4

*Not reported was introduced in 2010 although none appeared on the file in 2010. This attribute was deleted in 2011.

Person Type (continued)

Note: The early data has been modified to fit this format. For example, from 1975 to 1977 there was a value for fatal crashes involving a non-motorist in an animal drawn vehicle. This data has been reclassified into one of the values below.

- (1) Customarily, “Unknown Occupant” is placed in the “Passenger” category, unless they need to be distinguished from “Passengers”.
- (2) “Occupant of motor vehicle not in-transport” refers to occupants of parked motor vehicles (any motor vehicle stopped off the roadway). In 2005, this definition was expanded to include parked/stopped off roadway/working motor vehicles and occupants of motor vehicles in motion outside the trafficway boundaries. Prior to 2005, occupants of working motor vehicles (working highway maintenance vehicles, cherry pickers, etc.) were coded “08.” At that time, code “08” was labeled “Other Pedestrians.”
- (3) “Occupant of non-motor vehicle transport device” refers to persons riding in an animal-drawn conveyance, on an animal, or injured occupants of railway trains, etc.
- (4) The code for “other pedestrians (08)” was created in FARS in 1994. This code was the result of further detailing the previous coding of “other or unknown non-occupant (8)” as 1) other pedestrians and 2) unknown non-occupant. Since it is not possible to differentiate “other pedestrians” from “unknown non-occupants” prior to 1994, we have kept them in the “other non-occupant” category for consistency across data years. “Other pedestrians” is used for occupant of a transport device used as equipment (working highway maintenance trucks, cherry pickers, etc.), pedestrians using conveyances, and people in buildings. Examples of pedestrian conveyances are skateboard riders, people in wheelchairs, people on roller skates, and sled riders.
- (5) Prior to 2005, code “08” was labeled “Other Pedestrians” and also included occupants of motor vehicles used as equipment (working highway maintenance vehicles, cherry pickers, etc.). For occupants of working motor vehicles, see code “03.”
- (6) Prior to 2007, code “08” included persons in buildings. For persons in buildings, see code “10 – Persons In/On Buildings.”
- (7) “Unknown person type” existed in data years 1995 and 1996 only. It was found that this attribute did not add any value to the data element.

Restraint System/Helmet Use (continued)

FARS Description	Data Year and Code						Classification
	1975-1990 (MAN_REST)	1991-1993	1994-2007	2008-2009	2010-2012	2013-Later (REST_USE)	
	-	13	13	-	-	-	
Safety belt used improperly	-	14	14	-	-	-	
Child safety seat/booster seat used improperly	-	6	6	-	-	-	
Bicycle Helmet	-	-	-	97	97	97	
Other	-	99	99	99	99	99	
Unknown if used	9	9	99	99	99	99	Unknown
Unknown if helmet worn						29	
Not Reported					98	98	

**Improperly used* helmets are classified as "Not Used." In 2010, the Restraint/Helmet Mis-Use (REST_MIS) data element was introduced and "*Improperly Used*" attributes were removed from the Restraint Use (REST_USE) data element.

Historically, *child safety seat used improperly* was classified as "Not Used" in FARS. In June of 2003, this attribute was re-classified as USED. All other *improperly used* restraint systems were placed in categories as appropriate.

The majority of restraint usage analysis focuses on 1) child safety seat or belt use for passenger vehicle occupants or; 2) helmet use for motorcyclists. Be sure to include the appropriate body types in your selection criteria - see the section on [Vehicle Body Type Classification](#).

[Return](#)

Seating Position

Starting in 2003 Person Level Forms are submitted for uninjured occupants of van-based buses.

1982-Later

Seating Position

* For van-based buses, use the actual seating position if known, or use data element 51 for the second, third, and fourth rows, if actual seating position is not known.

[Return](#)

**Appendix E:
Changes in FARS Data Elements by SAS Data File and Year**

The tables below show each year a change was made to a data element. Elements are shown within the data set in which they can be found. Elements that appear in more than one data set are shown within the primary data set to which they belong. For example, MOD_YEAR is a Vehicle level element (V12. Vehicle Model Year) but it is also provided in the Person data file as a courtesy. Therefore, changes to this data element will only be found in the Vehicle table below.

This is a note for how to read the tables below:

The first row in which the letter "A" appears is the first year that data element was coded. If the letter "A" appears through the column there have been no significant changes in the way in which the data element has been coded. If the letter "B" appears in a column, there has been a significant change in the way the data element has been coded. The first row, which contains the letter "B," indicates which year the first change was made. The letter "C" indicates the year the second change was made, and so on.

**Appendix F:
Summary of 2010 and 2011 FARS Changes**

2010 FARS/NASS GES Standardization

The purpose of this document is to inform users of NHTSA's Fatality Analysis Reporting System (FARS) and National Automotive Sampling System General Estimates System (NASS GES) data about some of the more significant changes to the 2010 data as a result of the standardization of the data elements between the two systems. In addition to the changes outlined below, a listing of all specific data element changes can be found in the following table:

Variables with Changes in Definitions and Attributes

The FARS/NASS GES Standardization began in 2006, with the second phase being implemented in the 2010 data collection year. The definition and element attribute changes introduced in 2010 are the most substantive and most numerous changes in one year in the reconciliation of the FARS and NASS GES data systems. In the 2011 data collection year – the third and final planned phase of the FARS/NASS GES Standardization – nearly all remaining data element attribute and file structure differences will be addressed. As a single, unified data entry system, FARS/NASS GES will be compatible with the Model Minimum Uniform Crash Criteria (MMUCC), the guideline used by nearly all States to develop and revise their crash forms and databases. Once complete, the FARS/NASS GES Standardization will simplify crash data coding and analysis as well as reduce costs and errors.

Probably the most notable changes were the introduction of precrash information in FARS (already collected in NASS GES) and a change to case structure or how the groups of related data elements are organized. For example, in 2009 a FARS case consisted of Crash, Vehicle, Driver and Person coding forms. In 2010, the Person level form was split into Motor Vehicle Occupant and Non-Motor Vehicle Occupant forms, and the Precrash form was added (new to FARS, though not to NASS GES).

These structure changes also include changes to how the data are now stored and made available. For example, for FARS, there are now 16 data tables rather than 4. This results from the changes in the number of coding forms and from changes in specific data elements. Several data elements that used to allow only a specified number of responses now have a "select-all-that-apply" format. There is a separate data table for each of these data elements.

At the Crash level, a Crash Events Table was added to FARS (and modified in NASS GES). In NASS GES, Non-Harmful Events were added to the Crash Events Table.

The precrash information represents not only a new coding form, but more importantly, largely a new concept for FARS, attempting to collect data about the conditions, events and driver actions that preceded and may have contributed to the crash. Precrash data is intended to improve crash avoidance research and has been included in NASS GES since 1992.

The new FARS Precrash form information consists of 23 data elements, 9 of which were previously coded at the Crash level, 3 each at the Vehicle and Driver levels, and 8 new elements. Nine trafficway descriptor data elements were moved from the crash level to the new precrash level. These elements provide details about the characteristics of the trafficway selected for each vehicle.

A Pedestrian/Bicycle crash typing software application was added to the Non-Motor Vehicle Occupant form for both systems to help identify the precrash actions for parties involved in certain non-motorist-related crashes.

Type of Intersection was added to both systems. Bus Use and Vehicle Configuration were two Vehicle level elements that are new to NASS GES in 2010 and modified for FARS (element attributes were consolidated and redefined). Condition at Time of Crash was added at the Driver and the Non-Motor Vehicle Occupant levels for both systems. For motor vehicle occupants, there is now an Indication of Misuse of Restraint System or Helmet Use in both systems.

Some of the information that had been collected under FARS Related Factors was redistributed to new data elements. For example, some Person Related Factors have been removed and are now captured in two new Non-Motor Vehicle Occupant elements; Non-Motorist Action/Circumstances Prior to Crash and Non-Motorist Action/Circumstances at Time of Crash. Some Vehicle Related Factors are now captured under the new Precrash elements, Contributing Circumstances, Motor Vehicle and Driver Distracted By. The Driver Level element, Violations Charged, is now a “Select-all-That-Apply” element.

Multiple data elements that are part of the Model Minimum Uniform Crash Criteria (MMUCC) had the attribute “Not Reported” added in 2010 to account for information missing from the case source materials.

To ensure that data quality was not compromised as a result of the standardization, NHTSA refined and enhanced its quality control processes. These enhancements enable the identification of coding discrepancies and development of training tailored to eliminate or reduce these discrepancies.

The final phase of the FARS/NASS GES standardization will occur during the 2011 data collection year, at which point FARS and NASS GES, while remaining separate data systems, will share a single data entry system and uniform set of data elements.

New in 2010 FARS

There were many changes to the 2010 FARS, most of which are the result of NHTSA's efforts to standardize variables in FARS and the National Automotive Sampling System's (NASS) General Estimates System (GES). Additions, deletions, and changes are listed below.

2010 Data Elements with Changes in Definitions and Attributes

Below is a list of FARS data elements that had substantial changes for 2010.

The data elements in RED are new to 2010 FARS.

The data elements in BLUE are changed in 2010 FARS.

Trafficway Descriptor Data Elements in 2010

As part of the data standardization effort to harmonize the data in FARS and NASS GES and align both data systems with the data elements recommended in MMUCC, nine data elements were moved from the Crash Level in FARS to the a new Precrash Level method of collection. Some data elements also had title changes as a result. The changes are identified below with ***bold/italics***. Those data elements are:

2009 Crash Level Data elements	2010 Precrash Level Data elements
C21 Trafficway Flow (TRAF_FLO)	PC5 Trafficway <i>Description</i> (VTRAFWAY)
C22 Number of Travel Lanes (NO_LANES)	PC6 <i>Total Lanes in Roadway</i> (VNUM_LAN)
C23 Speed Limit (SP_LIMIT)	PC7 Speed Limit (VSPD_LIM)
C24 Roadway Alignment (ALIGNMNT)	PC8 Roadway Alignment (VALIGN)
C25 Roadway Profile (PROFILE)	PC9 Roadway <i>Grade</i> (VPROFILE)
C26 Roadway Surface Type (PAVE_TYP)	PC10 Roadway Surface Type (VPAVETYP)
C27 Roadway Surface Condition (SUR_COND)	PC11 Roadway Surface Condition (VSURCOND)
C29 Traffic Control Device (TRAF_CON)	PC12 Traffic Control Device (VTRAFCON)
C30 Traffic Control Device Functioning (T_CONT_F)	PC13 Traffic Control Device Functioning (VTCONT_F)

In the FARS data collection years 2009 and prior, the set of data elements above-left (C21-C27) provided details about the characteristics of the trafficway to which the crash had been assigned. Crashes were assigned to the trafficway on which the First Harmful Event occurred. If the First Harmful Event occurred outside the boundaries of a trafficway (e.g. private property), the crash was assigned to the trafficway on which the vehicle was traveling when the Unstabilized Situation began.

In at-intersection crashes, assignment was to the highest function class of trafficway at the intersection. If the vehicles were traveling on two different trafficways of equal function class prior to an at-intersection crash, it was assigned to the trafficway on which the motor vehicle precipitating the crash was traveling.

The data elements C29 Traffic Control Device and C30 Traffic Control Device Functioning were coded with respect to the control most applicable to the crash. If more than one device was present, the highest device (lowest number on the attribute list) most related to the crash was selected.

In the FARS data collection years starting in 2010, this set of data elements above-right (PC5-PC13) provide details about the characteristics of the trafficway that each in-transport motor vehicle was traveling on just prior to its Critical Precrash Event. The Critical Precrash Event is the event which made the crash imminent (i.e., something occurred which made the collision possible). For vehicles departing the trafficway prior to their critical precrash events, the trafficway selected for classification is the one the vehicle departed. If this vehicle is in a junction just prior to its critical precrash event, the trafficway selected for classification is the one it is on before entering the junction.

While these data elements were still collecting the same general information in 2010, there are some important differences to note. First, by being collected for each vehicle, different trafficway characteristics could be recorded for each vehicle in the crash. Second, in some circumstances the procedural change to being recorded for each vehicle based on its precrash location rather than the location of the first harmful event resulted in different data being provided than would have been in the same crash in prior years.

The types of crashes most affected by the change were those that occur in junction. For example, in a crash where two vehicles were traveling on the same trafficway in opposite directions (e.g. North-South) that have an at-intersection crash in the junction of a higher function class trafficway, the characteristics of the lower class trafficway that each of the vehicles were traveling on before entering the intersection area are recorded in the data elements PC5-PC13 for each vehicle. In prior years, the characteristics of the higher functional class trafficway would have appeared on the Crash Level. Also note that in such a case, on the Crash Level this crash would still be recoded to the higher functional class trafficway in the data elements C10 National Highway System, C11 Roadway Function Class, C12 Route Signing, and C13 Trafficway Identifier and none of the vehicle level characteristics can be attributed to this trafficway.

New in 2011 FARS**2011 Data Elements with Changes in Definitions and Attributes**

Below is a list of FARS data elements that have substantial changes for 2011.

DATA ELEMENT #	DATA ELEMENT NAME	NEW/ REVISED VALUES	NEW/ REVISED REMARKS	COMMENTS
C3	Number of Forms Submitted for Persons Not in Motor Vehicles	X		▪ Update Range to: <u>00</u> -99.
C14	Milepoint	X	X	▪ Changed format from 5 alphanumeric to 5 numeric . ▪ Updated element attributes with the addition of the decimal point.
C17	Crash Events- Sequence of Events		X	▪ Delete attribute 98 - Net Reported
C18	First Harmful Event	X	X	▪ Delete attribute 98 - Net Reported
C30	EMS Time at Hospital	X	X	▪ Added new attribute 9996 – Transport Terminated .
V4	Number of Occupants	X	X	▪ Delete attribute 98 - Net Reported
V9	Vehicle Make	X	X	▪ Added new Make 66 - Mahindra
V10	Vehicle Model	X		▪ Add new attribute 598 – Low Speed Vehicle (LSV) / Neighborhood Electric Vehicle (NEV) and 870 – Medium/Heavy Van-Based Vehicle .

DATA ELEMENT #	DATA ELEMENT NAME	NEW/REVISED VALUES	NEW/REVISED REMARKS	COMMENTS
V10	Body Type	X	X	<ul style="list-style-type: none"> ▪ Added new attributes: 55 – Van-Based Bus GVWR > 10,000 lbs. and 94 – Low Speed Vehicle (LSV) / Neighborhood Electric Vehicle (NEV) ▪ Updated attributes: 61 – Single-unit straight truck or Cab-Chassis (10,000 lbs. < GVWR < or = 19,500 lbs.), 62 – Single-unit straight truck or Cab-Chassis (19,500 lbs. < GVWR < or = 26,000 lbs.), 63 – Single-unit straight truck or Cab-Chassis (GVWR > 26,000 lbs.), 64 – Single-unit straight truck or Cab-Chassis (GVWR unknown).
V27	Location of Rollover	X	X	<ul style="list-style-type: none"> ▪ Add new attribute: 7 – In Parking Lane/Zone
V31	Sequence of Events	X	X	<ul style="list-style-type: none"> ▪ Removal of attribute 98 – Not Reported
V32	Most Harmful Event		X	<ul style="list-style-type: none"> ▪ Added new remarks. ▪ Removal of attribute 98 – Not Reported
D5	Driver's License State	X	X	<ul style="list-style-type: none"> ▪ Delete attribute 00 – No Driver Present
D6	Driver's Zip Code	X	X	<ul style="list-style-type: none"> ▪ Delete attribute 99997 – No Driver Present
D23/ NM14	Condition (Impairment) at Time of Crash	X	X	<ul style="list-style-type: none"> ▪ Updated attribute 99 – Unknown If Physically Impaired.
D24	Related Factors- Driver Level		X	<ul style="list-style-type: none"> ▪ Updated attribute 12 – Mother of Dead Fetus/ Mother of Infant Born Post Crash
PC7	Speed Limit	X	X	<ul style="list-style-type: none"> ▪ Change attribute range from 01-05 to 05-80 (<i>in 5 mph increments</i>).
PC12	Traffic Control Device	X	X	<ul style="list-style-type: none"> ▪ Updated attributes: 32 23 – School Zone

DATA ELEMENT #	DATA ELEMENT NAME	NEW/REVISED VALUES	NEW/REVISED REMARKS	COMMENTS
PC14	Driver Vision Obscured By	X	X	▪ Updated attribute: 95 - No Driver Present / <i>Unknown if Driver Present</i>
PC15	Driver Maneuvered to Avoid	X	X	▪ Updated attribute: 95 - No Driver Present / <i>Unknown if Driver Present</i>
PC16	Driver Distracted By	X	X	▪ Updated attribute: 16 - No Driver Present / <i>Unknown if Driver Present</i>
PC17	Pre-Event Movement (Prior to Recognition of Critical Event)	X	X	▪ Updated attributes: 02 – Decelerating in Roadway , 03 – Accelerating in Roadway , 04 – Starting in Roadway , 05 – Stopped in Traffic Lane in Roadway , 07 – Disabled or “ Parked ” in Travel Lane
PC19	Critical Event-Precrash (Event)	X	X	▪ Updated attributes: 15 – Turning left at trafficway junction , 16 – Turning right at trafficway junction , 80 – Pedestrian in roadway road , 81 – Pedestrian approaching roadway road , 83 – Pedalcyclist or other non-motorist in roadway road (specify) , 84 – Pedalcyclist or other non-motorist approaching roadway road (specify) , 85 – Pedalcyclist or other non-motorist unknown location (specify), 87 – Animal in roadway road , 88 – Animal approaching roadway road , 90 – Object in roadway road , 91 – Object approaching roadway road
P7/NM7	Person Type	X	X	▪ Deleted attribute: 88 – Not Reported .
P8/NM8	Injury Severity		X	▪ Deleted attribute: 8 – Not Reported
P26/NM25	Related Factors-Person Level (Motor Vehicle Occupant)	X	X	▪ Updated attributes: 18 – Mother of Dead Fetus/ Mother of Infant Born Post Crash

Summary of the SAS Naming Changes in 2011

Locator Code	2010 SAS Name	New 2011 SAS Name	Data Element Name
C3A	N/A	PERNOTMVIT	Number of Persons Not in Motor Vehicles in Transport (MVIT)
C4B	N/A	PVH_INVL	Number of Parked/Working Vehicles Involved
C5A	N/A	PERMVIT	Number of Persons in Motor Vehicles in Transport (MVIT)
V126	N/A	TIRE_SZE	Original Tire Size
V127	N/A	DISPLACE	Cubic Inch Displacement
V128	N/A	CYLINDER	Number of Cylinders

V136	N/A	MCYCL_CY	Number of Engine Cycles
NM4	N_MOT_NO	STR_VEH	Number of Motor Vehicle Striking Non-Motorist

The data elements in RED are new to 2011 FARS.

The data elements in BLUE are changed in 2011 FARS.

Appendix G: Changes to the FARS VIN Decoded Data Elements

FARS implemented a new structure for its VIN decoded data elements in 2013. This was warranted due to the renovation of the RL Polk VIN verification and decoding program. RL Polk upgraded their PC VINA VIN validation and decoding program to their new VINtelligence application, and no longer supports PC VINA. The FARS data collection software was therefore retooled to work with the VINtelligence application. The output is now stored in the Vindecode data file. The data file contains 100 VIN decoded data elements. Descriptions of these data elements are provided below from the Polk VINtelligence Deluxe Package and Field Descriptions documentation.

Note: The twelve characters of the VIN are still provided as individual data elements (V101-V112) in the Vehicle and Parkwork data files. The 24 VIN decoded data elements that used to be on the Vehicle, Parkwork and Person data files were discontinued in 2013. These data elements can still be found in the discontinued sections of the Vehicle and Parkwork data files in this Manual.

Element Identifier	SAS Name	Field Description
V200	ABS	(Brakes- ABS Code) A code that describes whether a vehicle has or does not have anti-lock brakes, and what kind of brakes they are. (Not coded for heavy truck). This is based on the series code that is assigned the vehicle from VINA.
V201	ABS_T	(Brakes- ABS Code) description
V202	BATKWRTG	The measure of total battery power expressed in kilowatts. For example: 71KW, 85KW, 75KW, 67KW.
V203	BATTYP	A value that identifies the kind of battery in the vehicle. For example: PbA- Lead Acid, NMH- Nickel Metal Hydride.
V204	BATTYP_T	The description of the Polk assigned code for the Battery Type Code. For example: PbA- Lead Acid, NMH- Nickel Metal Hydride.
V205	BATVOLT	The voltage rating of the battery as provided by the manufacturer.
V206	BLOCKTYPE	(Block Type) Description
V207	BODYSTYL	A Polk assigned code that describes the body style of the vehicle. For example, CP=Coupe.
V208	BODYSTYL_T	The description of the Polk assigned code Body Style Code For example: Coupe
V209	CARBBRLS	The number of barrels on a carbureted engine.
V210	CARBTYPE	Carburetion types include "Carburetor", "Fuel Injection", N/A
V211	CARBTYPE_T	The description of the Polk assigned code which identifies the vehicle carburetion type. For example Carburetor, Fuel Injection, Unknown or Electric.
V212	CYCLES	(Cycle Count) Refers to the cycle or stroke of an engine. 2-strokes are lightweight and simpler, but they burn oil, by design. Few cars on the road in North America are two-strokes, the last one offered was a 1967 Saab.
V213	CYLNDRS	Contains a code that represents the number of cylinders a vehicle's combustion engine can have.
V214	DISPCLMT	(Displacement Liters) displacement in rounded Liters, where 1,000 cubic centimeters = 1 liter. Even domestic makes will advertise displacement in terms of liters (e.g. 5.0 liter mustang, which equates to a 302 CID or 4967 cc displacement).
V215	DISPLCC	(Displacement CC) displacement in cubic centimeters. We intend to use this as the definitive, exact displacement value, i.e. 4967 cc.
V216	DISPLCI	(Displacement CID) displacement in cubic inches. This is a rounded, marketing

Element Identifier	SAS Name	Field Description
		value, like 302 cubic inches, instead of 4967 cc.
V217	DOORS	The number of doors the vehicle has
V218	DRIVETYP	(Drive Type) This element describes type of driving configuration for cars and trucks such as FWD, AWD, RWD.
V219	DRIVETYP_T	(Drive Type) description
V220	DRIVWHLs	Number of wheels driven by the power train. For example in a 6x4 configuration this would be the 4.
V221	DRL	(Daytime Running Lights)A Polk assigned code that identifies whether or not the vehicle has daytime running lights.
V222	DRL_T	(Daytime Running Lights) description
V223	ENGHEAD	(Head Configuration) Describes the cylinder head's camshaft/valve configuration.
V224	ENGHEAD_T	(Head Configuration) description
V225	ENGMFG	(Mfr.) A Polk assigned code given to the original equipment manufacturer of the within a vehicle
V226	ENGMFG_T	(Mfr.) description
V227	ENGMODEL	(Model) description
V228	ENGVINCD	(Code) Code derived from the VIN (not the secondary VIN for a motorcycle). Usually a single character, some manufacturers give full positions 4-8 and engine information from that; they do not break it down any further.
V229	ENGVVT	Used to determine if a car has Variable Valve Timing
V230	FUEL	(Fuel) What an internal combustion burns to move a piston in a cylinder
V231	FUEL_T	(Fuel) description
V232	FUELINJ	The type of fuel injection
V233	FUELINJ_T	The type of fuel injection used by a vehicle. For example, Direct, Throttle body
V234	GVWRANGE	Contains a code that identifies the Polk standard groupings of gross vehicle weights to which a vehicle may belong. This information is typically captured only for trucks.
V235	GVWRANGE_T	The description for the manufacturers assigned Gross Vehicle Weight (GVW) for trucks. This rating may or may not equal the actual GVW.
V236	INCOMPLT	Indicator that signifies whether the vehicle is considered "incomplete" (Y/N)
V237	MCYUSAGE	A further breakdown of body style for motorcycles to indicate if it is On-Road or Off-Road.
V238	MCYUSAGE_T	A further breakdown of body style for motorcycles to indicate if it is On-Road or Off-Road.
V239	MFG	(Vehicle Manufacturer Name) Standard abbreviation of the name of the vehicle manufacturer, i.e. General Motors, as defined by the National Crime Information Center
V240	MFG_T	(Vehicle Manufacturer Name) The name of the vehicle manufacturer, i.e. General Motors, as defined by the National Crime Information Center
V241	MSRP	Contains the base price of the vehicle as designated by the OEM's specifications. BASE PRICE includes only the price for the base model of the vehicle, excluding any optional equipment that may have been added as a result of the vehicle's TRIM LEVEL.
V242	NCICMAKE	Contains the Polk standardized abbreviation for the OEM's vehicle make. The vehicle make generally contains what the general public usually considers to be a vehicle brand name, for example, Chrysler, Dodge, Ford, Mercury, Toyota,

Element Identifier	SAS Name	Field Description
		GMC, Chevy, etc.
V243	ORIGIN	(Origin) A code that indicates the origin of a vehicle.
V244	ORIGIN_T	(Origin) description
V245	PLANT	(Plant Code) Plant code where vehicle was manufactured.
V246	PLNTCITY	(City) This is the city where the plant is located.
V247	PLNTCTRY	A code representing the country the plant is in.
V248	PLNTCTRY_T	(Country) This is the country where the plant is located. Example values are USA, Canada and Japan.
V249	PLNTSTAT	A code representing the state or province the plant is in.
V250	PLNTSTAT_T	(State or Province) This is the state or province (Canada) location of the plant.
V251	PSI_F	(Front Tire Pressure) Vehicle Mfr. recommendation for tire pressure, in pounds/sq. in.
V252	PSI_R	(Rear Tire Pressure) Vehicle Mfr. recommendation for tire pressure, in pounds/sq. in.
V253	REARSIZE	The size of the rear tires. example "17R245"
V254	REARSIZE_T	(Rear Tire Size Description) As in "17R245"
V255	RSTRNT	(Restraint Type) A Polk assigned code that identifies the type of restraints that a vehicle has based on VIN.
V256	RSTRNT_T	(Restraint Type) description
V257	SALECTRY	(Country Sold / Specific Market) Country where the vehicle is planned to be sold (may have different emissions standards).
V258	SALECTRY_T	(Country Sold / Specific Market) description
V259	SECURITY	(Security Type) Describes the security system (if any) installed on this model.
V260	SECURITY_T	(Security Type) description
V261	SEGMNT	The Polk standard segmentation code
V262	SEGMNT_T	Description of SEGMENTATION_CODE that represents the Polk Standard Segmentation applied.
V263	SHIPWEIGHT	Contains the base weight of the vehicle, rounded to the nearest one hundred pounds, as defined in the OEM's specifications. The base weight of a vehicle is the empty weight of the base model of the vehicle (i.e., the stripped down version of the vehicle)
V264	SUPCHRGR	Indicates if the engine has a supercharger or not.
V265	SUPCHRGR_T	Indicates if the engine has a supercharger or not. Yes, No or Unknown.
V266	TIREDESC_F	(Front Tire) More specific tire description (ex. Michelin Eagle P245/40ZR)"
V267	TIREDESC_R	(Rear Tire) More specific tire description (ex. Michelin Eagle P245/40ZR)"
V268	TIRESZ_F	Describes the size of the front tire. For example "17R245"
V269	TIRESZ_F_T	(Front Tire Size Description) As in "17R245"
V270	TKAXLEF	(Axle- Type, Front Axle) The location of the front axle of a truck tractor. Set forward increases stability on the highway, Setback increases maneuverability in tight spaces.
V271	TKAXLEF_T	(Axle- Type, Front Axle) short description
V272	TKAXLER	(Axle- Type, Rear Axle) Represents rear axle configuration on a truck tractor. Tandem axles increase load bearing capability.
V273	TKAXLER_T	(Axle- Type, Rear Axle) short description

Element Identifier	SAS Name	Field Description
V274	TKBEDL	(Bed Length) Code representing the manufacturer's description of the relative size of the cargo area of a pickup truck or van. A "long" Ford Ranger bed (compact pickup) may well be shorter than a "short" bed on an F350 (large industrial pickup).
V275	TKBEDL_T	(Bed Length) description
V276	TKBRAK	(Brake Type) The type of brakes on the Vehicle (currently commercial truck only). Truck VIN determines this currently
V277	TKBRAK_T	(Brake Type) description
V278	TKCAB	(Cab Configuration) Cab Type describes the physical configuration of a truck's cabin.
V279	TKCAB_T	(Cab Configuration) medium description
V280	TKDUTY	(Duty Type) A Polk assigned code that represents the duty type of a truck engine, based on manufacturer information.
V281	TKDUTY_T	(Duty Type) medium description
V282	TONRATING	(Tonnage Rating) description
V283	TURBO	Indicates if the engine has a turbocharger.
V284	TURBO_T	Indicates if the engine has a turbocharger. Yes, No or Unknown.
V285	VEHTYPE	A Polk assigned code that defines the type of a vehicle represented by a specific VIN. For example: M,P,C or T.
V286	VEHTYPE_T	The description of the Polk assigned code for the vehicle type code. For example: passenger, truck, motorcycle, commercial trailer.
V287	VINMAKE_T	(Make- Name) Full name of the make (i.e. Chevrolet)
V288	VINMODEL_T	(Model Code) description
V289	VINTRIM_T	The Trim of the vehicle
V290	VINTRIM1_T	The trim of the vehicle. This field is used when a VIN Pattern could have more than 1 trim assigned.
V291	VINTRIM2_T	The trim of the vehicle. This field is used when a VIN Pattern could have more than 2 trims assigned.
V292	VINTRIM3_T	The trim of the vehicle. This field is used when a VIN Pattern could have more than 3 trims assigned.
V293	VINTRIM4_T	The trim of the vehicle. This field is used when a VIN Pattern could have more than 4 trims assigned.
V294	VINYEAR	The marketing year defined by the OEM within which the vehicle was produced. The value contained in this attribute may not always match the calendar year in which the vehicle was actually manufactured. Many OEMs release models prior to calendar year.
V295	VLVCLNDR	(Valves Per Cylinder) Number of intake/exhaust valves per cylinder.
V296	VLVTOTAL	(Valves Total) Total number of intake/exhaust valves.
V297	WHEELS	The number of wheel ends on the vehicle. For example in a 6x4 configuration this would be the 6.
V298	WHLBLG	Contains the longest distance between the front and rear axles of a vehicle in inches for a particular series of that vehicle.
V299	WHLBSH	Contains the distance between the front and rear axles of a vehicle in inches of the base model of the vehicle.

**Appendix H:
Pedestrian and Bicyclist Data:
Availability of 2014 and 2015 Data**

The development of effective countermeasures to prevent pedestrian and bicyclist crashes is often hindered by State crash files that contain insufficient details about these types of crashes. To remedy this issue, Pedestrian and Bicycle Crash Typing was developed to describe the pre-crash actions of the involved parties to better define the sequence of events and precipitating actions leading to crashes between motor vehicles and pedestrians or bicyclists. In 2010, the National Highway Traffic Safety Administration (NHTSA) adopted parts of a stand-alone crash typing application called Pedestrian and Bicycle Crash Analysis Tool (PBCAT) into its two records based data collection systems, the Fatality Analysis Reporting System (FARS) and the National Automotive Sampling System (NASS) General Estimates System (GES). PBCAT was developed by the Federal Highway Administration's (FHWA) contractor, the University of North Carolina Highway Safety Research Center (UNC-HSRC). (More about the PBCAT can be found at http://www.pedbikeinfo.org/pbcat_us/.)

As part of the integration, NHTSA performed extensive quality control checks and analysis using the 2010 and 2011 data. The results of the analysis highlighted definitional differences between the PBCAT application and the coded data elements already included in FARS and NASS GES. As a result, NHTSA removed the Pbtype data file from the 2010 and 2011 FARS and NASS GES while research was conducted on how improvements could be made. Throughout the 2012 and 2013 data collection years, NHTSA continued to collect the pedestrian and bicycle data for internal use so that it could be monitored for consistency and stability. During this period NHTSA and FHWA worked collaboratively to identify issues and implement improvements. Following this period of research and evaluation, NHTSA began capturing new and improved pedestrian and bicyclist data beginning with the 2014 data collection year resulting in the following Pbtype data elements being reinstated:

- PB30 – Crash Type - Pedestrian
- PB31 – Crash Type Location - Pedestrian
- PB32 – Pedestrian Position
- PB33 – Pedestrian Initial Direction of Travel
- PB34 – Motorist Direction
- PB35 – Motorist Maneuver
- PB36 – Intersection Leg
- PB37 – Pedestrian Scenario
- PB38 – Crash Group – Pedestrian
- PB30B – Crash Type - Bicycle
- PB31B – Crash Location - Bicycle
- PB32B – Bicyclist Position
- PB33B – Bicyclist Direction
- PB38B – Crash Group - Bicyclist

The Ped/Bike Wizard Application

In FARS and NASS GES, pedestrian and bicycle crash typing is accomplished through a software application referred to as the Ped/Bike Wizard. The wizard is embedded within a larger set of elements collected for non-motorists (see [FARS/NASS GES/CRSS Coding and Validation Manual](#)). The wizard is automatically presented when a non-motorist with a certain person type is entered from the set of seven non-motorist person types collected in FARS and NASS GES. The Ped/Bike Wizard application is only presented for the following four person types:

- Pedestrian
- Persons on Personal Conveyances
- Bicyclist
- Other Cyclist

By following on-screen prompts and clicking on choices in the wizard, the FARS Analyst or NASS GES Case Coder enters data into the file without typing each specific data element's attribute (numeric code) represented in this manual. In the data entry process, the FARS Analyst or NASS GES Case Coder must analyze each crash and recognize the appropriate selection in the hierarchy established by the sequence of screens in the wizard. Entry of the data elements and attributes in this manual is structured in the Ped/Bike Wizard such that the selections available on each successive entry screen are limited by the prior choices.

Consequently, while all of the data elements collected by the Ped/Bike Wizard are defined in this manual, the wizard entry screens are limited by the FARS Analyst's or NASS GES Case Coder's selection at each step through the application.
